

## Vodafone GigaKombi Business: the fastest enterprise bundle

- Super-fast mobile and fixed: up to 500 mbps with the powerful fibre network and LTE Max
- Bigger bundle: more MBs, a fixed IP address and a personal agent
- Low cost: reasonably priced bundles starting at EUR 42.90 net per month

**Hanover, 19 March 2017 – An increasing number of enterprises are going digital with Vodafone's powerful fibre network. The Düsseldorf-based telecommunications group's new enterprise customer connections have quadrupled in number this year, driven by independent contractors, freelancers and small businesses opting to boost their success with the Vodafone fibre network. GigaKombi Business is a brand new bundle for enterprise customers, combining fixed and mobile with up to 500 mbps bandwidth, which Vodafone is launching on 1 April. It's the fastest bundle in the market. 50 percent more mobile MBs in all Red Business+ tariffs, a fixed IP address for operation of an own web and mail server and a personal agent round off this attractive enterprise customer offering.**

Enterprise customers can put together a custom GigaKombi Business bundle tailored to their requirements. On the fixed network front the customer can choose between the Vodafone cable and Vodafone DSL tariffs for office internet and telephony. A voice flatrate for calls to all German networks and EU landlines is included with every fixed network connection for full cost transparency. And the customer can subscribe to any Red Business+ tariff for their mobile communications. The Red Business+ tariffs include a telephony and SMS flatrate for Germany and super-fast data bundles of between 2 and 10 gigabytes. Vodafone is also giving GigaKombi Business customers 50% more MBs in each of the mobile tariffs. That's a total of between 3 and 15 GBs of data, depending on which Red Business+ tariff they choose. And Vodafone customers can use LTE networks in more than one hundred countries for fast mobile broadband when working abroad.

GigaKombi Business customers get a fixed IP address so they can operate their own mail and web servers and get mobile access to their business mails. Further business options will be introduced in coming months. The first will be a website builder, an intuitive toolkit that the individual or business can use to create their own personal website. All GigaKombi Business customers are assigned to a dedicated personal agent for telephone support. They also save money by opting for GigaKombi Business because the smallest bundle, with Internet & Phone Business 400 fixed network connection and the Red Business S+ mobile tariff, only costs EUR 42.90 net per month. That's a 35 percent monthly saving. Additional mobile contracts can be added to the bundle for employees for as little as EUR 9.95 a month, e.g. with the Red Business Starter tariff.

*Vodafone is exhibiting at this year's CeBIT in Hanover from 20 to 24 March 2017 in Pavilion 32. According to the motto of "Welcome to the German GIGANETWORK", the telecommunications group will be demonstrating how it is driving and designing the gigabit society: from smart, secure cities to smart factories, digital retailing and connected vehicles.*

## Information about Vodafone

Vodafone Germany is a leading integrated telecommunications company and Germany's largest cable television operator, offering fixed broadband, mobile communications, internet and TV services. As a gigabit company, Vodafone is a key contributor to the development of Germany's 5G infrastructure. The Düsseldorf-based company's continuous investments in faster fixed and mobile networks are taking Germany forward into the gigabit society.

Vodafone Germany offers a comprehensive ICT portfolio for enterprise customers, networking people and machines, facilitating secure corporate networks and storing enterprise data in the German cloud. Around 90% of all DAX-listed companies and 15 of Germany's 16 federal states are already Vodafone customers. Vodafone Germany has 14,000 employees and generates annual revenue of € 11 billion with 43.7 million SIM cards, 6.1 million fixed broadband customers and numerous digital solutions.

Vodafone Germany is the largest operating company of the Vodafone Group, one of the world's largest telecommunications companies with mobile operations in 26 countries and partners with mobile networks in 49 more. It also has fixed broadband operations in 17 countries. Vodafone has around 470 million mobile customers and 14.3 million fixed broadband customers around the world.
