# Getting started

## About This User Guide

This is the **Xperia™ M4 Aqua** User Guide for the **Android™ 6.0** software version. If you're not sure which software version your device is running, you can check it in the Settings menu.

- ! System and application updates can present the features in your device in another way than described in this User Guide. The Android™ version might not be affected in an update. For more information about software updates, see *Updating your device* on the 35 page.

### To check the current software version of your device

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **About phone** > **Android™ version**.

### To Find the Model Number and Name of Your Device

- 1 From your **Home screen**, tap .
- 2 Find and tap .

The device model number and name are displayed.

## Limitations to Services and Features

Some of the services and features described in this User Guide may not be supported in all countries or regions, or by all networks or service providers. The GSM International Emergency Number can always be used in all countries, regions, networks and by all service providers, provided that the device is connected to the cellphone network. Please contact your network operator or service provider to determine the availability of any specific service or feature and whether additional access or usage fees apply.

The use of certain features and applications described in this guide may require access to the internet. You may incur data connection charges when you connect to the internet with your device. Contact your wireless service provider for more information.

## Overview

- |                                |                                  |
|--------------------------------|----------------------------------|
| 1. Charging/Notification light | 11. Main camera lens             |
| 2. Proximity/Light sensor      | 12. Camera light                 |
| 3. Ear speaker                 | 13. GPS antenna area             |
| 4. Front camera lens           | 14. NFC™ detection area          |
| 5. Nano SIM card slot cover    | 15. Headset jack                 |
| 6. Power key                   | 16. Second microphone            |
| 7. Volume/Zoom key             | 17. Charger/USB cable port       |
| 8. Camera key                  | 18. Wi-Fi/Bluetooth antenna area |
| 9. Loudspeaker                 | 19. Memory card slot cover       |
| 10. Main microphone            |                                  |

## Assembly

- ! Your device only supports nano SIM cards.

### To insert the nano SIM card

- ! To prevent damage to your device, do not insert a nano SIM card that has been directly cut from a USIM card.
- 1 Detach the nano SIM card slot cover.
- 2 Insert the nano SIM card into the nano SIM card slot.
- 3 Re-attach the cover.
- ! If you insert a nano SIM card while the device is powered on, the device restarts automatically.

### To insert the memory card

- 1 Detach the memory card slot cover.
- 2 With the gold-colored contacts facing down, insert the memory card into the memory card slot, then re-attach the memory card slot cover.

### To remove the nano SIM card

- 1 Detach the nano SIM card slot cover.
- 2 Push the nano SIM card inward until it makes a clicking sound, then release it immediately.
- 3 Draw the nano SIM card fully outward and remove it.
- 4 Re-attach the cover.

### To Remove the Memory Card

- 1 Either turn off the device, or unmount the memory card under **Settings > Storage** > ▲, next to **SD card**.
- 2 Push the memory card inward, and then release it immediately.
- 3 Gently pull the memory card fully outward and remove it.
- 4 Re-attach the cover.

## Screen Protection

- ! Before using your device, remove the protective film by pulling up on the protruding tab.

It is recommended to protect your device with a Sony-branded screen cover or a protector intended for your Xperia™ model. The use of third-party screen protection

accessories may prevent your device from working correctly by covering sensors, lenses, speakers, or microphones and can invalidate the warranty.

## Starting Your Device for the First Time

It is recommended that you charge the battery for at least 30 minutes before starting up your device for the first time. You can still use your device while it is charging, see *Charging Your Device* on page 33.

The first time you start your device, a setup guide helps you to configure basic settings, personalize your device, and sign in to your accounts, for example a Google™ account.

### To turn on the device

- 1 Press and hold down the power key  until the device vibrates.
- 2 Enter your SIM card PIN when requested, and then tap .
- 3 Wait a while for the device to start.

### To Turn off the Device

- 1 Press and hold down the power key  until the options menu opens.
  - 2 In the options menu, tap **Power off**.
- ! It may take a while for the device to shut down.

## Why Do I Need a Google™ Account?

Your Xperia™ device from Sony runs on the Android™ platform developed by Google™. A range of Google™ applications and services is available on your device when you purchase it, for example, Gmail™, Google Maps™, YouTube™, and the Play Store™ application which gives you access to the Google Play™ online store for downloading Android™ applications. To get the most out of these services, you need a Google™ account. For example, a Google™ account enables you to do all of the following:

- Download and install applications from Google Play™.
- Synchronize your email, contacts, and calendar using Gmail™.
- Chat with friends using the Hangouts™ application.
- Synchronize your browsing history and bookmarks using the Google Chrome™ web browser.
- Identify yourself as the authorized user after a software repair using Xperia™ Companion.
- Remotely find, lock, or clear a lost or stolen device using the my Xperia™ or Android™ Device Manager services.

For more information about Android™ and Google™, go to <http://support.google.com>.

- ! It is crucial that you remember your Google™ account username and password. In some situations, you may need to identify yourself for security reasons using your Google™ account. If you fail to give your Google™ username and password in such situations, your device is locked. Also, if you have more than one Google™ account, be sure to enter the details for the relevant account.

### To Set up a Google™ Account on Your Device

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Accounts** > **Add account** > **Google**.
- 3 Follow the registration wizard to create a Google™ account, or sign in if you already have an account.

 You can also sign in to or create a Google™ account from the setup guide the first time you start your device. Or you can go online and create an account at [www.google.com/accounts](http://www.google.com/accounts).

### To remove a Google™ account

- 1 From your Homescreen, tap .
- 2 Tap **Settings** > **Accounts** > **Google**.
- 3 Select the Google™ account that you want to remove.
- 4 Tap  > **Remove account**.
- 5 Tap **Remove account** again to confirm.

 If you remove your Google™ account, any security features that are linked to your Google™ account will no longer be available.

 If you are lending your device to someone to use for an extended period, it is recommended to remove your Google™ account from the device.

# Device security

## Making Sure Your Device is Protected

Your device includes several security options strongly recommended in case of loss or theft.

These options are as follows:

- Set a secure screen lock on your device using a PIN, password, or pattern to prevent anyone from accessing or resetting your device. For more information, see *Screen Lock* on the 11 page.
- Add a Google™ account to prevent others from using your device if it gets stolen or wiped. For more information, see *Why Do I Need a Google™ Account?* on the 9 page.
- Activate either the “Protection by my Xperia” or the Android™ Device Manager web service. Using one of these services, you can remotely locate, lock, or clear a lost device. For more information, see *Finding a Lost Device* on the 17 page.

## Verifying the Ownership of Your Device

Certain protection features require you to either unlock your screen with your PIN, password, or pattern, or enter your Google™ account information. Below are examples of protection features and some of the required credentials:

Factory Data Reset protection	You must unlock your screen before you are allowed to perform a Factory Data Reset.
Protection by my Xperia	If you remotely reset your device using this service, you must enter the username and password for a Google™ account associated with the service. The device must be connected to the internet before the setup process can be completed. Otherwise, you will not be able to use your device after the reset.
Android™ Device Manager	If you remotely reset your device using this service, you must enter the username and password for a Google™ account. The device must be connected to the internet before the setup process can be completed. Otherwise, you will not be able to use your device after the reset.
Software repair	If you use the Xperia™ Companion software to perform a software repair, you're asked to enter your Google™ account username and password when you start the device after the repair is complete.

- ! For Android™ Device Manager, it is necessary to enter information from a Google™ account. This can be any Google™ account which you have set up on the device as an owner. If you cannot provide the relevant account information during a setup process, you won't be able to use the device at all.

## Screen Lock

There are several screen lock options available. The security level of each lock type is listed below in order of weakest to strongest.

- **Swipe**
  - no protection, but you have quick access to the homescreen.
- **Pattern**
  - draw a simple pattern with your finger to unlock your device.
- **PIN**
  - enter a numeric PIN of at least four digits to unlock your device.
- **Password**

– enter an alpha-numeric password to unlock your device.

! It is very important that you remember your screen unlock pattern, PIN, or password. If you forget this information, it may not be possible to restore important data, such as contacts and messages.

💡 If you have set up a Microsoft® Exchange ActiveSync® (EAS) account on your Xperia™ device, the EAS security settings may limit the lockscreen type to only a PIN or password. This occurs when your network administrator specifies a lockscreen type for all EAS accounts for security reasons. Contact the network administrator of your company or organization to check what network security policies are in effect for mobile devices.

### To Change Screen Lock Type

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Security** > **Screen lock**.

### To Create a Screen Lock Pattern

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Security** > **Screen lock** > **Pattern**.
- 3 Follow the instructions on your device.

! If your lock pattern is rejected five times in a row when you try to unlock your device, you must wait 30 seconds before you can try again.

### To change the screen lock pattern

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Security** > **Screen lock**.
- 3 Draw your screen unlock pattern.
- 4 Tap **Pattern** and follow the instructions on your device.

### To Create a Screen Lock PIN

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Security** > **Screen lock** > **PIN**.
- 3 Enter a numeric PIN, then tap **Continue**.
- 4 Re-enter and confirm your PIN, then tap **OK**.
- 5 Follow the instructions on your device.

### To Create a Screen Lock Password

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Security** > **Screen lock** > **Password**.
- 3 Enter a password, then tap **Continue**.
- 4 Re-enter and confirm your password, then tap **OK**.

### To activate the Swipe unlock function

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Security** > **Screen lock**.
- 3 Draw your screen unlock pattern, or enter your PIN or password if one of these screen lock types is enabled.
- 4 Tap **Swipe**.

## Resetting a Forgotten Screen Lock

If you forgot your screen lock PIN, password, or pattern, you may be able to reset it using the Protection by my Xperia service. No content on your device is lost after you perform a screen lock reset using this service.

To activate the Protection by my Xperia service, see *Finding a Lost Device* on the 17 page.

### To reset the screen lock using protection by my Xperia

- 1 Be sure you know your Google™ account username and password, and that you have enabled the Protection by my Xperia service on your device.
  - 2 Go to [myxperia.sonymobile.com](http://myxperia.sonymobile.com) using any internet-connected device.
  - 3 Sign in using the same Google™ account that you have set up on your device.
  - 4 Click on the picture of your device under **Your devices**.
  - 5 Select **Protect** or **Change PIN2** to replace the current screen lock with a new PIN code.
  - 6 Follow the onscreen instructions provided by Protection by my Xperia.
- ! Depending on your security settings, your device may lock after a screen lock reset. You then need to enter your Google™ account username and password in order to use the device.

## Unlocking Your Device Automatically

- ! The Smart Lock feature may not be available in every market, country, or region.

The Smart Lock feature makes unlocking your device easier by letting you set it to unlock automatically in certain situations. You can keep your device unlocked, for example, when it's connected to a Bluetooth® device or when you're carrying it with you.

You can set Smart Lock to keep your device unlocked using the following settings:

- **Trusted face:** Unlock your device by looking at it.
- **Trusted voice:** Set up voice recognition to search in any screen.
- **Trusted devices:** Keep your device unlocked when a trusted Bluetooth® or NFC device is connected.
- **Trusted places:** Keep your device unlocked when you're in a trusted location.
- **On-body detection:** Keep your device unlocked when you're carrying your device with you.

You have to manually unlock your device if you don't use it for 4 hours and after you restart it.

- ! The Smart Lock feature is developed by Google™ and the exact functionality may change over time due to updates from Google™.

### To Enable Smart Lock

- 1 Make sure you've set a pattern, PIN, or password for your screen lock.
- 2 From your Homescreen, tap .
- 3 Find and tap **Settings > Security > Trust agents**.
- 4 Drag the slider beside **Smart Lock (Google)** to the right.
- 5 Tap the back arrow next to **Trust agents**.
- 6 Find and tap **Smart Lock**.
- 7 Enter your pattern, PIN, or password. You need to enter this screen lock every time you want to change your Smart Lock settings.
- 8 Select a Smart Lock type.

## Setting When to Keep the Device Automatically Unlocked

You can set Smart Lock to keep your device unlocked using the following settings:

- **Trusted devices** – Keep your device unlocked when a trusted Bluetooth® or NFC device is connected.
- **Trusted places** – Keep your device unlocked when you're in a trusted location.
- **On-body detection** – Keep your device unlocked when you're carrying your device with you.
- **Trusted face** – Unlock your phone by looking at it.
- **Trusted voice** – Set up voice recognition to search in any screen.

You have to manually unlock your device when you don't use it for 4 hours and after you restart it.

## Connecting to trusted Bluetooth® devices

You can designate a connected Bluetooth® device as a trusted device and keep your Xperia™ device unlocked while it's connected to it. So if you have Bluetooth® devices that you connect to regularly, such as a car speaker or home entertainment system, a Bluetooth® watch or a fitness tracker, you can add them as trusted devices and bypass the added security of the lockscreen to save time. This feature is suitable if you're normally in a relatively secure place when you use these devices. In some cases, you may still need to manually unlock your device before a trusted device can be connected.

- ! It is not recommended to add devices that are constantly connected to your device as trusted devices, such as Bluetooth® keyboards or cases.
- 💡 As soon as a trusted Bluetooth® device is switched off or moves out of range, your screen locks and you need your PIN, pattern, or password to unlock it.

### To Add a Trusted Bluetooth® Device

- 1 Make sure your device is paired and connected to the Bluetooth® device that you want to add as a trusted device.
- 2 Find and tap **Settings > Lock screen & security > Smart Lock > Add trusted device > Bluetooth**.
- 3 Tap a device name to select it from the list of connected devices. Only paired devices appear in this list.
- 4 Depending on the security of your connection, you may need to manually unlock your device before the trusted device can keep it unlocked.

### To Remove a Trusted Bluetooth® Device

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Security > Smart Lock > Trusted devices**.
- 3 Tap the device you want to remove.
- 4 Tap **Remove trusted device**.

## Making Sure You're Secure when Using Trusted Devices

Different Bluetooth® devices support different Bluetooth® standards and security capabilities. There's a chance someone could keep your Xperia™ device unlocked by imitating your Bluetooth® connection, even if your trusted device is no longer nearby. Your device is not always able to determine whether your connection is secure from someone trying to imitate it.

When your device can't determine whether you're using a secure connection, you'll get a notification on your Xperia™ device and may need to manually unlock it before the trusted device can keep it unlocked.

- 💡 Bluetooth® connectivity range can vary depending on factors like the model of your device, the connected Bluetooth® device, and your environment. Depending on these factors, Bluetooth® connections can work over distances up to 100 meters.

## Connecting to Trusted Places

When the Trusted places feature is set up, the lockscreen security on your Xperia™ device gets disabled when you are in a designated trusted location. For this feature to work, you must have an internet connection (preferably over Wi-Fi) and allow your device to use your current location.

To set up trusted places, first make sure high-accuracy location mode or battery-saving location mode is enabled on your device before you add home or custom locations.

- ! The exact dimensions of a trusted location are an estimate and may extend beyond the physical walls of your home or other areas you have added as trusted locations. This feature can keep your device unlocked within a radius of up to 80 meters. Also be aware that location signals can be replicated or manipulated. Someone with access to specialized equipment could unlock your device.

### To Add Your Home Location

- 1 Make sure location mode is turned on and you are using either the **High accuracy** or **Battery saving** setting.
- 2 From your Homescreen, tap .
- 3 Find and tap **Settings > Security > Smart Lock > Trusted places > Home**.
- 4 Tap **Turn on this location**.

### To Edit Your Home Location

- 1 Make sure location mode is turned on and you are using either the **High accuracy** or **Battery saving** setting.
  - 2 From your Homescreen, tap .
  - 3 Find and tap **Settings > Security > Smart Lock > Trusted places**.
  - 4 Select your home location.
  - 5 Tap **Edit**.
  - 6 In the search bar, enter the location you want to use as your home location.
-  If your home has multiple buildings at the same address, the trusted place you want to add might be different from the actual address. To ensure better location accuracy, you can add the actual location of your home within the building complex as a custom place.

### To Remove Your Home Location

- 1 Make sure location mode is turned on and you are using either the **High accuracy** or **Battery saving** setting.
- 2 From your Homescreen, tap .
- 3 Find and tap **Settings > Security > Smart Lock > Trusted places > Home**.
- 4 Tap **Turn off this location**.

## Using Custom Locations

You can add any location as a trusted, custom place where your device can remain unlocked.

### To Add a Custom Place

- 1 Make sure location mode is turned on and you are using either the **High accuracy** or **Battery saving** setting.
- 2 From your Homescreen, tap .
- 3 Find and tap **Settings > Security > Smart Lock > Trusted places**.
- 4 Tap **Add trusted place**.
- 5 To use your current location as a trusted, custom place, tap **Select this location**.
- 6 Alternately, to enter another location, tap the magnification glass icon and type the address. Your device searches for the entered location. To use the suggested address, tap the address.
- 7 To fine-tune the location, tap the back arrow next to the address, then drag the location pin to the desired location and tap **Select this location**.

### To Edit a Custom Place

- 1 Make sure location mode is turned on and you are using either the **High accuracy** or **Battery saving** setting.
- 2 From your Homescreen, tap .
- 3 Find and tap **Settings > Security > Smart Lock > Trusted places**.
- 4 Select the place you want to edit.
- 5 Tap **Edit Address**.
- 6 To enter another location, tap the magnification glass icon and type the address. Your device searches for the entered location. To use the suggested address, tap the address.
- 7 To fine-tune the location, tap the back arrow next to the address, then drag the location pin to the desired location and tap **Select this location**.

### To Remove a Custom Place

- 1 Make sure location mode is turned on and you are using either the **High accuracy** or **Battery saving** setting.
- 2 From your Homescreen, tap .
- 3 Find and tap **Settings > Security > Smart Lock > Trusted places**.
- 4 Select the place you want to remove.
- 5 Tap **Delete**.

### Keeping Your Device Unlocked while You're Carrying It

Using the On-body detection feature, you can keep your device unlocked while you're carrying it in your hand or in a pocket or bag. The accelerometer in your device keeps your device unlocked while it senses that it's being carried. The device locks when the accelerometer detects that the device has been put down.

When you use the On-body detection feature, you need to be aware of the following behaviors:

- Any time you put your device down and it senses that it's no longer being carried, it locks automatically.
  - The device can take up to one minute to lock.
  - After you get into a car, bus, train, or other land vehicle, your device can take between 5 and 10 minutes to lock.
  - Note that when you get on an airplane or a boat (or another non-land-based vehicle), your device may not lock automatically, so be sure to lock it manually if needed.
  - When you pick up your device again or get out of the vehicle, just unlock it once and your device then stays unlocked for as long as you have it on you.
- ! The On-body detection feature can't distinguish whose body is connected. If you give your device to someone else while it's unlocked using On-body detection, your device may stay unlocked for the other user. Keep in mind that On-body detection as a security feature is less secure than a pattern, PIN, or password.

### To Enable On-Body Detection

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Security > Smart Lock > On-body detection**.
- 3 Drag the slider to the On position, and then tap **Continue**.

### SIM Card Protection

You can lock and unlock each SIM card that you use in your device with a PIN (Personal Identification Number). When a SIM card is locked, the subscription linked to the card is protected against misuse, meaning you have to enter a PIN every time you start your device.

If you enter the PIN incorrectly too many times, your SIM card will get blocked. You then need to enter your PUK (Personal Unblocking Key) and a new PIN. Your PIN and PUK are supplied by your service provider.

### To Set up a SIM Card Lock

- 1 From the Homescreen, tap .
- 2 Find and tap **Settings > Security > Set up SIM card lock**.
- 3 Drag the slider beside **Lock SIM card** to the On position.
- 4 Enter the SIM card PIN and tap **OK**. The SIM card lock is now active and you will be prompted to enter this lock every time you restart the device.

### To change the SIM card PIN

- 1 From the Homescreen, tap .
- 2 Find and tap **Settings > Security > Set up SIM card lock**.
- 3 Tap **Change SIM PIN**.
- 4 Enter the old SIM card PIN and tap **OK**.
- 5 Enter the new SIM card PIN and tap **OK**.
- 6 Retype the new SIM card PIN and tap **OK**.

### To unlock a locked SIM card

- 1 Enter the PUK code and tap ✓.
- 2 Enter a new PIN code and tap ✓.
- 3 Re-enter the new PIN code and tap ✓.

! If you enter an incorrect PUK code too many times, the SIM card becomes locked. If this happens, contact your service provider to get a new SIM card.

## Finding the Identification Number of Your Device

Your device has a unique identification number. This number is referred to as the IMEI (International Mobile Equipment Identity). You should keep a copy of this number. You may require it, for example, when you access the Xperia™ Care support service to register your device. Also, if your device is stolen, some network providers can use this number to stop the device from accessing the network in your country or region.

### To view your IMEI number on the label tray

- 1 Detach the memory card slot cover.
- 2 Insert the tip of an unfolded paper clip (or a similar object with a long, fine tip) into the hole in the label tray, then drag the tray outward. The IMEI number is displayed on the tray.

💡 To view the IMEI number, you can also open the phone dialer and enter **\*#06#**.

### To View Your IMEI Number via the Device Settings

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings** > **About phone** > **Status** > **IMEI information**.

## Finding a Lost Device

If you have a Google™ account, the “Protection by my Xperia” web service can help you locate and secure your device if you ever lose it. If you have activated this service on your device, you can:

- Locate your device on a map.
- Sound an alert even if the device is in Do not disturb mode.
- Remotely lock the device and make the device display your contact details to anyone who finds it.

- Remotely clear the internal and external memory of the device as a last resort.
- ! If you've cleared the internal memory of the device using the "Protection by my Xperia" web service, you must sign in to a Google™ account that was previously synced on this device the next time you turn on the device.
- ! The "Protection by my Xperia" service may not be available in all countries or regions.

### To Deactivate Protection by My Xperia

- 1 Make sure you have an active data connection, and enable location services on your device.
  - 2 From your Homescreen, tap .
  - 3 Find and tap **Settings > Security > Protection by my Xperia > Activate**.
  - 4 Mark the checkbox to agree to the terms and conditions of the service, and then tap **Accept**.
  - 5 If prompted, sign in to your Google™ account, or create a new account if you don't already have one.
  - 6 To verify that Protection by my Xperia can locate your device, go to [myxperia.sonymobile.com](http://myxperia.sonymobile.com) and sign in using the Google™ account you are using on your device.
- ! If you are sharing a device with multiple users, note that the Protection by my Xperia service is only available to the user who is logged in as the owner.

## Finding a Lost Device Using Android™ Device Manager

Google™ offers a location and security web service called Android™ Device Manager. You can use it in parallel with, or as an alternative to, the Protection by my Xperia service. If you lose your device, you can use Android™ Device Manager to:

- Find and show where your device is located.
- Ring or lock your device, erase everything on it, or add a phone number to the lockscreen.

For additional information about Android™ Device Manager, go to [www.support.google.com](http://www.support.google.com).

- ! Android™ Device Manager does not work if your device is turned off or if it does not have a connection to the internet. The Android™ Device Manager service may not be available in all countries or regions.

### To Activate Android™ Device Manager

- 1 If you are using a device with multiple users, be sure you are logged in as the owner.
- 2 Make sure you have an active data connection and that location services are enabled.
- 3 From your Homescreen, tap .
- 4 Find and tap **Settings > Google > Security**.
- 5 Drag the sliders beside **Remotely locate this device** and **Allow remote lock and erase** to the On position.
- 6 If prompted, agree to the terms and conditions by tapping **Activate**.
- 7 To verify that Android™ Device Manager can locate your device after you activate the service, go to [www.android.com/devicemanager](http://www.android.com/devicemanager) and sign in using your Google™ account.

# Learning the basics

## Using the touchscreen

### Tapping

- Open or select an item.
- Mark or unmark a checkbox or option.
- Enter text using the on-screen keyboard.

### Touching and holding

- Move an item.
- Activate an item-specific menu.
- Activate selection mode, for example, to select several items from a list.

## Pinching and spreading

- Zoom in or out on web pages, photos, and maps, and when you're taking photos or shooting videos.

## Swiping

- Scroll up or down a list.
- Scroll left or right, for example, between Homescreen panes.
- Swipe left or right to reveal more options.

## Flicking

- Scroll quickly, for example, in a list or on a web page. You can stop the scrolling movement by tapping the screen.

## Locking and Unlocking the Screen

When your device is on and left idle for a set period of time, the screen darkens to save battery power and locks automatically. This lock prevents unwanted actions on the touchscreen when you are not using it. When you buy your device, a basic screen swipe lock is already set. This means you have to swipe left or upward on the screen to unlock it. You can change the security settings later and add other kinds of locks. See *Screen Lock* on the 11 page.

### To activate the screen

- Briefly press the power key .

### To lock the screen

- When the screen is active, briefly press the power key .

## Homescreen

The Homescreen is the starting point for using your device. It's similar to the desktop on a computer screen. Your Homescreen can have up to twenty panes, which extend beyond the regular screen display width. The number of Homescreen panes is represented by a series of dots on the lower part of the Homescreen. The highlighted dot shows the pane that you are currently in.

- 1 Introduction to Xperia™ widget – Tap to open the widget and select a task, such as copying content from your old device or setting up Xperia™ services
- 2 Dots – Represents the number of Home screen panes

### To go to the Home screen

- Press .

### To browse the Home screen

## Homescreen Panes

You can add new panes to your Homescreen (up to a maximum of twenty panes) and delete panes. You can also set the pane that you want to use as the main Homescreen pane.

### To Set a Pane as the Main Homescreen Pane

- 1 Touch and hold any area on your Homescreen until the device vibrates.
- 2 Flick left or right to browse to the pane you want to set as your main Homescreen pane, and then tap  in the top-left corner of the screen.

### To add a pane to your Homescreen

- 1 Touch and hold any area on your Homescreen until the device vibrates.
- 2 To browse the panes, flick all the way to the right or left, then tap .

### To Delete a Pane from your Homescreen

- 1 Touch and hold any area on your Homescreen until the device vibrates.
- 2 Flick left or right to browse to the pane you want to delete, then tap  in the top-right corner of the pane.

## Homescreen Settings

### To Uninstall an Application from the Homescreen

- 1 Touch and hold any area on your Homescreen until the device vibrates.
  - 2 Flick left or right to browse the panes. All uninstalleable applications are indicated by .
  - 3 Tap the application you want to uninstall, and then tap **Delete**.
- 💡 Some apps indicated by  can only be disabled and not uninstalled. Disabling an app deletes all data, but the app can be enabled again from **Settings > Apps**.

### To Adjust the Size of Icons on Your Homescreen

- 1 Touch and hold any area on your Homescreen until the device vibrates, then tap .
- 2 Tap **Icon size**, then select an option.

## Application screen

The Application screen, which you open from the Homescreen, contains the applications that come pre-installed on your device as well as applications that you download.

### To view all applications on the Application screen

- 1 From your Home screen, tap .
- 2 Flick left or right on the Application screen.

### To Open an Application from the Application Screen

- When the Application screen is open, flick left or right to find the application, and then tap the application.

### To Search for an Application from the Application Screen

- 1 When the Application screen is open, tap **Search applications**.
- 2 Enter the name of the application you want to search for.

### To Open the Application Screen Menu

- When the Application screen is open, tap .

### To Move an Application on the Application Screen

- 1 When the Application screen is open, tap .
- 2 Make sure **Own order** is selected under **Sort apps**.
- 3 Touch and hold the application until the device vibrates, and then drag it to the new location.

### To Add an Application Shortcut to the Homescreen

- 1 On the Application screen, touch and hold an application icon until the device vibrates, and then drag the icon to the top of the screen. The Homescreen opens.
- 2 Drag the icon to the desired location on the Homescreen, then release it.

### To Arrange Applications on the Application Screen

- 1 When the Application screen is open, tap .
- 2 Tap **Sort apps**, then select an option.

### To Uninstall an Application from the Application Screen

- 1 Touch and hold any area on the Application screen until the device vibrates. All applications that can be uninstalled are then indicated by .
  - 2 Select the application you want to uninstall, and then tap **Delete**.
-  Some apps indicated by  can only be disabled and not uninstalled. Disabling an app deletes all data, but the app can be enabled again from **Settings > Apps**.

## Navigating Applications

You can navigate between applications using the navigation keys, the favorites bar, and the recently used applications window, which lets you switch easily between all recently used applications. The navigation keys are the Home key, the Recent apps key, and the Back key. Some applications get closed when you press the Home key  to exit, while others are paused or continue to run in the background. If an application is paused or running in the background, you can continue where you left off the next time you open the application.

- 1 Recently used applications window – Open a recently used application
- 2 Favorites bar – Use a shortcut to access applications or widgets
- 3 Recent apps key – Open the recently used applications window and the favorites bar
- 4 Home key – Exit an application and go back to the Homescreen
- 5 Back key – Go back to the previous screen within an application or close the application

### To open the recently used applications window

- Press .

### To Close All the Recently Used Applications

- Tap , then tap .

### To open a menu in an application

- While using the application, press .
-  A menu is not available in all applications.

## Widgets

Widgets are small applications that you can use directly on your Homescreen. They also function as shortcuts. For example, the Weather widget allows you to see basic weather

information directly on your Homescreen. But when you tap the widget, the full Weather application opens. You can download additional widgets from Play Store™.

### To add a widget to the Home screen

- 1 Touch and hold an empty area on your Homescreen until the device vibrates, then tap **Widgets**.
- 2 Find and tap the widget that you want to add.

### To Resize a Widget

- 1 Touch and hold a widget until the device vibrates, and then release it. If the widget can be resized, for example, the Calendar widget, then a highlighted frame and resizing dots appear.
- 2 Drag the dots inward or outward to shrink or expand the widget.
- 3 To confirm the new size of the widget, tap anywhere on the Homescreen.

### To Move a Widget

- Touch and hold the widget until the device vibrates, and then drag it to the new location.

### To Remove a Widget

- Touch and hold the widget until the device vibrates, and then drag it to **Remove from home screen**.

## Shortcuts and folders

Use shortcuts and folders to manage your applications and keep your Home screen tidy.

### Shortcuts and Folders Overview

- 1 Access an application by using a shortcut
- 2 Access a folder containing applications

### To Add an Application Shortcut to Your Homescreen

- 1 Touch and hold an empty area on your Homescreen.
- 2 In the customization menu, tap **Widgets > Shortcuts**.
- 3 Scroll through the list of applications and select an application. The selected application gets added to the Homescreen.

### To Move an Item on the Homescreen

- Touch and hold the item until the device vibrates, and then drag the item to the new location.

### To Remove an Item from the Homescreen

- Touch and hold the item until the device vibrates, and then drag the item to **Remove from home screen** at the top of the screen.

### To Create a Folder on the Homescreen

- Touch and hold an application icon or a shortcut until the device vibrates, and then drag and drop it on top of another application icon or shortcut.

### To Add Items to a Folder on the Homescreen

- Touch and hold an item until the device vibrates, and then drag the item to the folder.

### To rename a folder on the Home screen

- 1 Tap the folder to open it.
- 2 Tap the folder's title bar to show the **Folder name** field.
- 3 Enter the new folder name and tap **Done**.

## Background and Themes

You can adapt the Homescreen to your own style using wallpapers and themes.

### To change your Home screen wallpaper

- 1 Touch and hold an empty area on your Homescreen until the device vibrates.
- 2 Tap **Wallpapers** and select an option.

### To set a theme

- 1 Touch and hold an empty area on your Homescreen until the device vibrates.
- 2 Tap **Themes**.
- 3 Select an option and follow the instructions in your device.

- ! When you change a theme, the background also changes in some applications.

## Taking a screenshot

You can capture still images of any screen on your device as a screenshot. Screenshots you take are automatically saved in Album.

### To Take a Screenshot

- 1 Press and hold down the power key until a prompt window appears.
- 2 Tap [+].

- 💡 You can also take a screenshot by pressing and holding down the power key and volume down key at the same time. Once the screenshot is captured, you can release the keys.

### To View your Screenshot

- Drag the status bar fully downward, and then tap the screenshot you want to view.
- 💡 You can also view your screenshots in the Album application.

## Notifications

Notifications inform you of events such as new messages and calendar notifications as well as activities in progress, such as file downloads. Notifications appear in the following places:

- The status bar
- The Notification panel
- The lockscreen

### To Open or Close the Notification Panel

- 1 To open the Notification panel, drag the status bar downward, or simply double-tap it.
- 2 To close the Notification panel, drag or flick the panel upward.

### To Take Action on a Notification in the Notification Panel

- Tap the notification.

### To Dismiss a Notification from the Notification Panel

- Place your finger on a notification and flick left or right.
- ! Not all notifications can be dismissed.

### To Expand a Notification on the Notification Panel

- Drag the notification downward.
- ! Not all notifications are expandable.

### To Clear all Notifications from the Notification Panels

- Tap

### To Take Action on a Notification from the Lockscreen

- Double-tap the notification.

### To dismiss a notification from the lockscreen

- Place your finger on the notification and flick left or right.

### To Expand a Notification on the Lockscreen

- Drag the notification downward.
- ! Not all notifications are expandable.

## Managing Notifications on the Lockscreen

You can set up your device so that only selected notifications get displayed on your lockscreen. You can make all notifications and their content accessible, hide sensitive content for all notifications or specific apps, or choose not to show any notifications at all.

## To Select the Notifications to Display on the Lockscreen

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Sound & notification** > **When device is locked**.
- 3 Select an option.

## Notification Display Options on the Lockscreen

<b>Show all notification content</b>	Get all notifications on the lockscreen. When you have this setting turned on, keep in mind that all content (including the content of incoming email and chat messages) will be visible on your lockscreen unless you designate the relevant apps as <b>Hide sensitive content</b> in the <b>App notifications</b> settings menu.
<b>Hide sensitive notification content</b>	You must have a PIN, password, or pattern set up as your screen lock in order for this setting to be available. <b>Contents hidden</b> is displayed on the lockscreen when sensitive notifications arrive. For example, you'll get a notification for an incoming email or chat, but the content won't be visible on your lockscreen.
<b>Don't show notifications at all</b>	You won't get any notifications on the lockscreen.

## Setting the Notification Level for an App

You can set different notification behaviors for individual applications. For example, you can block all email notifications, prioritize Facebook™ notifications, and make the content of messaging notifications invisible on the lockscreen.

## To Set the Notification Level for an App

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Sound & notification** > **App notifications**.
- 3 Select the app you want to change the notification settings for.
- 4 Drag the relevant slider to the right.

## Notification Levels and Options for Specific Applications

<b>Block all</b>	Never show notifications for the selected app.
<b>Treat as priority</b>	Receive notifications from this app when Do not disturb is set to Priority only.
<b>Allow peeking</b>	Let this app emphasize certain notifications by sliding them briefly into view on the screen.
<b>Hide sensitive content</b>	When the device is locked, hide content in this app's notifications that might reveal private information.

## Notification Light

The notification light informs you about battery status and some other events. For example, a flashing white light means there is a new message or a missed call. The notification light is enabled by default but can be disabled manually.

- ! When the notification light is disabled, it only lights up when there is a battery status warning, such as when the battery level falls below 15 percent.

## To Enable or Disable the Notification Light

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Sound & notification**.
- 3 Tap the **Notification light** slider.

## Icons in the status bar

### Status icon

	No SIM card
	Signal strength
	No signal
	Roaming
	Sending and downloading LTE data
	Sending and downloading GPRS data
	Sending and downloading EDGE data
	Sending and downloading 3G data
	Sending and downloading HSPA+ data
	A Wi-Fi connection is enabled and data is being transmitted
	<p>A Wi-Fi connection is enabled, but there is no internet connection.</p> <p>This icon also appears when you are trying to connect to a secured Wi-Fi network. After a successful login, the exclamation mark disappears.</p> <p>If Google™ is blocked in your area, the exclamation mark may appear even when the device is connected to a Wi-Fi network and there is a working internet connection.</p>
	60% Battery status
	The battery is charging
	STAMINA mode is activated
	Ultra STAMINA mode is activated
	Airplane mode is activated
	The Bluetooth® function is activated
	The microphone is muted
	The speakerphone is on
	Do Not Disturb mode is activated
	Vibrate mode
	An alarm is set
	GPS is activated
	Synchronization is ongoing
	Problem with sign-in or synchronization
	The Hearing aid function is activated

! Depending on your service provider, network, or region, the functions or services represented by some icons in this list may not be available.

## To Manage Status Bar Icons

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Display > System icons**.
- 3 Mark the checkboxes for the system icons that you want to appear in the status bar.

## Notification Icons

	New text message or multimedia message
	Missed call
	Call on hold
	Call forwarding is turned on
	New voicemail message
	New email message
	Downloading data
	Uploading data
	Mobile data is disabled
	Perform a basic setup of your device
	A software update is available
	System updates are available
	Downloading system updates
	Tap to install the downloaded system updates
	Screenshot captured
	New Hangouts™ chat message
	Video chat with friends using the Hangouts™ application
	A small app is running
	A song is playing
	The radio is on
	The device is connected to a computer via a USB cable
	Internal storage is 75% full. Tap to transfer data to a memory card
	Warning
	More (undisplayed) notifications

- ! Not all icons that may appear on your device are listed here. These icons are for reference purposes only, and changes may be made without notice.

## To Block an Application from Sending Notifications

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Sound & notification > App notifications**.
- 3 Select an application.
- 4 Tap the slider beside **Block all** or **Hide sensitive content** to restrict notifications as desired.

## Applications Overview

! Some applications may not be included on your device or may not be supported by all networks or service providers in all areas.

-  Use the Clock application to set various kinds of alarms.
-  Use the Chrome web browser to navigate and view web pages, manage bookmarks, text, and images.
-  Use the Calculator application to perform basic calculations.
-  Use the Calendar application to keep track of events and manage your appointments.
-  Use the camera to take photos and record video clips.
-  Use the Contacts application to manage phone numbers, email addresses, and other information related to your contacts.
-  Access your downloaded applications, documents, and pictures.
-  Use the Email application to send and receive emails through both personal and work accounts.
-  Browse and listen to FM radio stations.
-  Use the Album application to manage, view, and edit your photos and videos.
-  Use the Gmail™ application to read, write, and organize email messages.
-  Search for information on your device and on the web.
-  View your current location, find other locations, and calculate routes using Google Maps™.
-  Use the Play Store™ application to find applications to buy or download for free.
-  Use the Messaging application to send and receive text and multimedia messages.
-  Use the Video application to play videos on your device and share content with your friends.
-  Use the Music application to organize and play music and audio books.
-  View news stories from News Suite.
-  Make phone calls by dialing the number manually or by using the smart dial function.
-  Optimize settings to suit your own requirements.
-  Use the Hangouts™ application to chat with friends online.
-  Identify music tracks that you hear playing in your surroundings, and get artist, album, and other information.
-  Use YouTube™ to watch videos from users around the world, and share your own.
-  The Xperia™ Movie Creator automatically creates short video collages using your existing photo and video collection.
-  Use the Support application to access user support on your device. For example, you can access a User guide, troubleshooting information, plus tips and tricks.

Use the Sketch application to create and explore images, and then share them with the world.

Use the What's New application to discover new games, apps, and media content.

Enjoy music, movies, apps, and games on your device, and get exclusive access to unique content available only with Xperia™ devices.

Stay connected with your gaming friends and the games you love to play, shop on the PlayStation@Store, and more.

Protect your device against viruses, malware, spyware, phishing attempts, and online exploitation.

# Battery and Maintenance

## Charging Your Device

- ! Always use an original Sony charger and USB cable intended for your specific Xperia™ model. Other chargers and cables may increase charging time, not charge at all, or may even damage your device. Make sure all USB ports and connectors are completely dry, before inserting the USB cable.

A wall socket charger will charge your device faster than charging via your computer. You can still use your device while charging.

If the battery is depleted, it may take up to 30 minutes for your device to respond to the charging. During this time, the screen may remain completely dark, not showing the charging icon. Also note that it can take up to 4 hours for a completely drained battery to charge fully.

- ! Your device has an embedded, rechargeable battery that can only be replaced by an authorized Sony repair center. You should never try to open or take apart the device yourself. Doing so can cause damage and void your warranty.

## To Charge Your Device

- 1 Plug the charger into a power outlet.
  - 2 Plug one end of the USB cable into the charger (or into the USB port of a computer).
  - 3 Plug the other end of the cable into the micro USB port on your device, with the USB symbol facing up. The notification light illuminates when charging begins.
  - 4 When the device is fully charged, disconnect the cable from your device by pulling it straight outward. Be sure not to bend the connector.
- ! Only use the charger provided with your device or another Sony charger intended for charging your device.
  - 💡 If the battery is completely depleted, it may take a few minutes before the notification light illuminates and the charging icon  appears.

## Battery Notification Light Status

Green	The battery is charging and the battery charge level is greater than 90%
Orange	The battery is charging and the battery charge level is less than 90%
Red	The battery is charging and the battery charge level is less than 15%

## Battery and Power Management

Your device has an embedded battery. To get the most use from it, keep track of the power consumed by different apps and features. Background power-saving features are activated by default to help you reduce battery consumption, and additional power saving modes are available to help you reduce battery consumption further when necessary.

Power-saving features lower the priority for certain non-essential device functions, such as higher-grade image performance, network activities such as location services, app synchronization and background Wi-Fi scanning. If you do not want an application to be affected, you can exempt it in the Battery Optimization menu. Phone calls and SMS are not affected.

- ! System updates may change the power saving features available on your device.

### To View Battery Consumption, Estimated Time, and Power-Saving Tips

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings** > **Battery**. An overview appears showing the battery percentage and an estimated battery time.
- 3 Tap **SHOW BATTERY USAGE** to view a list of features and services that have consumed battery power since the last charging cycle. Tap an item to get information on how to reduce its battery consumption.

### To View Battery Consumption For Applications

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings** > **Apps**.
- 3 Select an application and review its battery consumption under **Battery usage**.

### General Usage Tips to Improve Battery Performance

The following tips can help you improve battery performance:

- Lower the screen brightness level, see *Screen settings* on page 56.
- Turn off Bluetooth®, Wi-Fi, and location services when you don't need these features.
- Turn off your device or use Airplane mode if you are in an area with no or low network coverage. Otherwise, your device repeatedly scans for available networks, and this consumes power.
- Use a Wi-Fi network instead of roaming when abroad. Roaming is scanning for your home network and puts additional demands on your battery as your device must transmit with a higher output power, see *Wi-Fi* on page 45.
- Change the synchronization settings for your email, calendar, and contacts, see *Synchronizing with Online Accounts* on page 52.
- Check the applications that have a high battery consumption and consider the battery saving tips provided on your device for these applications.
- Change the notification level for an application, see *Notifications* on page 27.
- Turn off the location-sharing permission for an application, see *Application settings* on page 58.
- Uninstall applications that you are not using, see *Application screen* on page 23.
- Use a Sony original handsfree device to listen to music. Handsfree devices consume less battery than your device's loudspeakers.
- Restart your device every now and then.

## Battery Optimization

Battery optimization is a powerful and convenient built-in mode which improves your battery life significantly by reducing battery consumption when you are not using the device or certain apps.

This is achieved by suspending battery draining network activities, such as location services, syncing, and Wi-Fi scanning in the background when you have not been using your device for a long time.

Phone calls and SMS messaging are not affected.

You cannot disable Battery optimization, but you can make exemptions for certain applications.

### To Make Specific Applications Exempt From Battery Optimization

- 1 From your **Home screen**, tap .
  - 2 Find and tap **Settings** > **Battery**.
  - 3 Tap  and select **Battery optimization**. You will see a list of applications that are not optimized.
  - 4 To add or remove applications from this list, tap **Apps** and select or de-select an application from the list to edit its optimization settings.
  - 5 The list of applications that are not optimized will get updated according to your settings.
- ! You cannot exempt applications from being optimized by Ultra STAMINA mode.
- 💡 You can also configure **Battery optimization** from the **Apps** menu by tapping .

## Power-Saving Modes

There are several power-saving modes available for you to use if you want to make your battery last longer:

<b>STAMINA mode</b>	Depending on the STAMINA level, different features will be restricted or disabled in order to reduce battery consumption. These include rendering performance, animation and screen brightness, image enhancement, background app data syncing, vibration (except for incoming calls), streaming, and GPS (while the screen is off).  appears in the status bar.
<b>Ultra STAMINA mode</b>	In addition to the features disabled by STAMINA mode, Ultra STAMINA mode disables Cellular Data and Wi-Fi. The app selection is limited and widgets (except for Clock) are disabled. Calling and SMS are still available. The Homescreen is changed to a special Ultra STAMINA mode Homescreen and additional panes are disabled.  appears in the status bar.

### To Activate or Deactivate STAMINA Mode

- 1 From your **Home screen**, tap .
  - 2 Find and tap **Settings** > **Battery**.
  - 3 Tap **STAMINA mode** and tap the slider to activate or deactivate the function. When STAMINA mode is activated you can select additional options, for example you can adjust the Auto-start percentage according to your preferences.
- 💡 You can exempt applications from being optimized by STAMINA mode in the Battery Optimization menu.

### To activate Ultra STAMINA mode

- 1 From your **Home screen**, tap .
  - 2 Find and tap **Settings** > **Battery**.
  - 3 Tap **Ultra STAMINA mode**, and then tap **Activate**.
  - 4 Confirm to activate.
- ! You cannot exempt applications from being optimized by Ultra STAMINA mode.

### To Deactivate Ultra STAMINA Mode

- 1 Drag down the status bar to access the Notification panel.
  - 2 Tap **Deactivate Ultra STAMINA mode**.
  - 3 Tap **OK**.
- ! Deactivating Ultra STAMINA mode will restart your device.

## Updating your device

You should update the software on your device to get the latest functionality, enhancements, and bug fixes in order to ensure optimal performance. When a software

update is available,  appears in the status bar. You can also check for new updates manually, or schedule an update.

The easiest way to install a software update is to do it wirelessly from your device. However, some updates are not available for wireless download. You then need to use the Xperia™ Companion software on a PC or on an Apple® Mac® computer to update your device.

Before updating your device, consider the following:

- Ensure you have sufficient storage capacity before attempting to update.
- If you are using a device with multiple users, you must log in as the owner, that is, the primary user, to update the device.
- System and application updates can present the features on your device in another way than described in this User Guide. The Android™ version might not be affected after an update.

For more information about software updates, go to <http://support.sonymobile.com/software/>.

#### To check for new software

- 1 If you are using a device with multiple users, make sure you are logged in as the owner.
  - 2 From your Homescreen, tap .
  - 3 Find and tap **Settings** > **About phone** > **Software update**.
- ! If no new software is available, it's possible that you may not have enough free memory on your device. If your Xperia™ device has less than 500 MB of free internal memory (device memory) available, you do not receive any information about new software. The following notification appears in the Notification panel to warn of the lack of storage space:  
**Storage space running out. Some system functions may not work.**  
If you receive this notification, you must free up internal memory (device memory) before you can get notifications about new software being available.

## Updating Your Device Wirelessly

Use the Software update application to update your device software wirelessly. The updates you can download over a cellphone network depend on your service provider. It is recommended to use a Wi-Fi network instead of a cellphone network to download new software so you can avoid data traffic costs.

#### To download and install a system update

- 1 If you are using a device with multiple users, make sure you are logged in as the owner.
- 2 From your Homescreen, tap .
- 3 Find and tap **Settings** > **About phone** > **Software update**.
- 4 If a system update is available, tap **Download** to download it to your device.
- 5 When the download is finished, tap **Install** and follow the on-screen instructions to complete the installation.

#### To Set Up Automatic Installation

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings** > **About phone** > **Software update**.
- 3 Tap , then tap **Settings** and select an option.

## To Update Your Device Using a Computer

- 1 Using a USB cable, connect your device to the computer.
  - 2 Make sure the screen of your device is unlocked, and the USB connection mode on the device is set to **Transfer files (MTP)**.
  - 3 Open Xperia™ Companion, if it is not automatically launched.
  - 4 Make sure the computer can access the internet.
  - 5 **Computer:** If a new software update is detected, a popup window appears. Follow the on-screen instructions to run the relevant software updates.
- ! If you don't have the Xperia™ Companion software installed on the relevant computer, connect your device to the computer and follow the on-screen installation instructions. Make sure you are using the USB cable that came with your device and it is properly connected to the device and computer.

## Maintenance Using a Computer

### Xperia™ Companion

Xperia™ Companion is a software service which provides a collection of tools and applications you can use when you connect your device to a computer. With Xperia™ Companion, you can:

- Update or repair your device's software.
- Transfer your content from an old device using Xperia™ Transfer.
- Back up and restore content on your computer.
- Sync multimedia content—photos, videos, music, and playlists—between your device and computer.
- Browse files on your device.

To use Xperia™ Companion, you need an internet-connected computer running one of the following operating systems:

- Microsoft® Windows® 7 or later
- Mac OS® X 10.11 or later

Learn more and download Xperia™ Companion for Windows at <http://support.sonymobile.com/tools/xperia-companion/> or Xperia™ Companion for Mac at <http://support.sonymobile.com/tools/xperia-companion-mac/>.

### Managing Files Using a Computer

Use a USB cable connection between a Windows® computer and your device to transfer and manage your files.

Once the two devices are connected, you can choose whether to charge your device, transfer files, or use it for MIDI input. Your computer will detect your device when you select the **Transfer files (MTP)** connection mode. The default connection mode is set to **Charging only**.

With Xperia™ Companion you can access the file system of your device. If you do not have Xperia™ Companion installed, you are requested to install it when you connect your device to the computer.

- ! Always use the USB cable type intended for your Xperia™ model and make sure it is completely dry.

## USB Connection Mode

You can use the **Transfer files (MTP)** connection mode for managing files and updating device software. This USB mode is used with Microsoft® Windows® computers. Charging is enabled by default.

### To Change USB Connection Mode

- 1 Attach a USB connector to your device.
- 2 Drag down the status bar, and then tap **USB charging this device**.
- 3 Tap **Transfer files (MTP)**.

## Storage and Memory

Your device has several different storage and memory options.

- The **internal storage** is about **8 GB** and is used to store downloaded or transferred content along with personal settings and data. Some examples of data saved to internal storage are alarm, volume, and language settings; emails; bookmarks; calendar events; photos; videos and music.
- You can use a removable **memory card** with a storage capacity of up to **128 GB** to get more storage space. Media files and some apps, along with their associated data, can be moved to this type of memory to free up internal storage. Some apps, for example, the Camera app, can save data directly to a memory card.
- The **dynamic memory (RAM)** is about **2 GB** and cannot be used for storage. RAM is used to handle running applications and the operating system.

! You may have to purchase a memory card separately.

💡 Read more about the use of memory in Android devices by downloading the White paper for your device at [www.sonymobile.com/support/](http://www.sonymobile.com/support/).

## Improving Memory Performance

Your device memory tends to fill up as a result of normal usage. If the device starts to slow down, or applications suddenly shut down, you should consider the following:

- Always try to keep at least **250 MB** of free internal storage available.
- Close running applications that you are not using.
- Clear the cache memory for all applications.
- Uninstall downloaded applications that you don't use.
- Move applications to the memory card if the internal storage is full.
- Install applications to parts of the memory where there is more storage space.
- Transfer photos, videos, and music from the internal memory to the memory card.

- If your device can't read content on the memory card, you may need to format the card. Note that all content on the card gets erased when you format it.
- ! If you are sharing a device with multiple users, you must log in as the owner, that is, the primary user, to be able to perform certain actions, such as transferring data to the memory card and formatting the memory card.

#### To view the memory status

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Storage**.

#### To View the Amount of Free and Used RAM

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **About phone** > **Diagnostics** > **Facts**.

#### To clear the cache memory for all applications

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Storage**.
- 3 Tap **Internal storage** > **Cached data** > **OK**.

- ! When you clear the cache memory, you don't lose any important information or settings.

#### To transfer media files to the memory card

- 1 Make sure you have a memory card inserted in your device.
- 2 From your Homescreen, tap .
- 3 Find and tap **Settings** > **Storage** > **Transfer data to SD card**.
- 4 Mark the file types you want to transfer to the memory card.
- 5 Tap **Transfer**.

#### To stop applications and services from running

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Apps**.
- 3 Select an application or service, then tap **FORCE STOP** > **OK**.

#### To Format the Memory Card

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Storage**.
- 3 Tap **SD Card**, tap , and then tap **Settings** > **Format** > **Erase & format**.

- ! All content on the memory card gets erased when you format it. Be sure to make backups of all data that you want to save before formatting the memory card. To back up your content, you can copy it to a computer. For more information, see *Managing Files Using a Computer* on the 37 page.

## Backing Up and Restoring Content

Generally, you should not save photos, videos, and other personal content solely on the internal memory of your device. If your device is damaged, lost or stolen, the data stored on its internal memory may be impossible to recover. It is recommended to use the Xperia™ Companion software to make backups which save your data safely to an external device. This method is especially recommended if you are updating your device software to a newer Android version.

The Xperia™ Backup & restore application is recommended for backing up data before you do a factory data reset. With this application you can back up data to an online account, an SD card or to an external USB storage device that you have connected to your device using a USB Host adapter:

With the Google Backup & restore application, you can back up data to a Google server.

## Backing up Data to a Computer

Use the Xperia™ Companion software to back up data from your device to a PC or an Apple® Mac® computer. You can back up the following types of data:

- Contacts and call logs
- Text messages
- Calendar
- Settings
- Media files such as music and videos
- Photos and images

### To Back Up Your Data Using a Computer

- 1 Unlock the screen of your device and connect it to the computer using a USB cable.
  - 2 Open the Xperia™ Companion software on your computer if it is not automatically launched. After a few moments, the computer detects your device. Make sure to select **Transfer files (MTP)** mode on your device.
  - 3 Click on **Backup** on the Xperia™ Companion main screen.
  - 4 Follow the on-screen instructions to back up data from your device.
- ! If you do not have Xperia™ Companion installed, you are requested to install it when you connect your device to the computer.

### To Restore Your Data Using a Computer

- 1 Unlock the screen of your device and connect it to the computer using a USB cable.
  - 2 Open the Xperia™ Companion software on your computer if it is not automatically launched. After a few moments, the computer detects your device. Make sure to select **Transfer files (MTP)** mode on your device.
  - 3 Click on **Restore** on the Xperia™ Companion main screen.
  - 4 Select a backup file from the backup records, then click on **Next** and follow the on-screen instructions to restore data to your device.
- ! If you do not have Xperia™ Companion installed, you are requested to install it when you connect your device to the computer.

## Backing Up Data with the Xperia™ Backup & Restore Application

Using the Xperia™ Backup & Restore application, you can make an online backup or a local backup of data. For example, you can back up data manually or turn on the automatic backup function to save data periodically.

The Xperia™ Backup & Restore application is recommended for backing up data before you do a factory data reset. With this application you can back up the following types of data to an online account, an SD card, or an external USB storage device that you have connected to your device using a USB host adapter:

- Bookmarks
- Contacts and call logs
- Conversation
- Calendar data
- Email accounts
- Wi-Fi networks
- Device settings
- Applications
- Xperia™ Home layout

### To Back Up Content to an Online Account

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Backup & reset**.
- 3 To enable the automatic backup function, tap **Automatic backup**, then tap the on-off switch.
- 4 To enable the manual backup function, tap **More > Manual backup**.
- 5 Under **Where to store files**, tap **Select storage > Online account**.
- 6 If prompted, read the relevant terms and, provided you agree, tap **I agree**, then follow the on-screen instructions to sign in to your Google™ account.
- 7 Select the types of data to back up, then tap **Backup**.

### To Set Up the Automatic Backup Function

- 1 If you are backing up content to a USB storage device, make sure the storage device is connected to your device using a USB host adapter. If you are backing up to an SD card, make sure the SD card is properly inserted in your device. If you are backing up content to an online account, be sure you have signed in to your Google™ account.
- 2 From your Homescreen, tap .
- 3 Find and tap **Settings > Backup & reset**.
- 4 Under **Xperia™ Backup & restore**, tap **Automatic backup**.
- 5 To enable the automatic backup function, tap the on-off switch.
- 6 Select a backup frequency, where to save backup files, the time to back up, and the types of data to back up.
- 7 To save your settings, tap .

### To Back Up Content Manually

- 1 If you are backing up content to a USB storage device, make sure the storage device is connected to your device using a USB host adapter. If you are backing up to an SD card, make sure the SD card is properly inserted in your device. If you are backing up content to an online account, be sure you have signed in to your Google™ account.
- 2 From your Homescreen, tap .
- 3 Find and tap **Settings > Backup & reset**.
- 4 Under **Xperia™ Backup & restore**, tap **More**.
- 5 Tap **Manual backup**, then select a backup destination and the data types that you want to back up.
- 6 Tap **Backup**.
- 7 After the data is backed up, tap **Finish**.

### To Edit a Backup File

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Backup & reset**.
- 3 Under **Xperia™ Backup & restore**, tap **More**.
- 4 Tap **Edit backup file**, then select a backup source and the data types that you want to delete.
- 5 Tap **Delete data**.
- 6 Tap **OK** to confirm.
- 7 After the data is deleted, tap **Finish**.

### To Restore Backed-Up Content

- 1 If you are restoring content from a USB storage device, ensure the storage device is connected to your device using the USB Host adapter. If you are restoring content from an SD card, ensure the SD card is properly inserted in your device. If you are restoring content from an online account, make sure you have signed in to your Google™ account.
  - 2 From your Homescreen, tap .
  - 3 Find and tap **Settings > Backup & reset**.
  - 4 Under **Xperia™ Backup & restore**, tap **Restore data**, and then select a restore source and the data types that you want to restore.
  - 5 Tap **Restore data**.
  - 6 After the content is restored, tap **Finish**.
- ! Remember that any changes you make to your data and settings after you create a backup, including any applications you download, get deleted during a restore procedure.

### Backing Up Data with the Google Backup & Restore Application

Using the Google Backup & restore application, you can back up data to a Google server. You can also turn on the automatic restore function to restore application data and settings when you reinstall an application.

With this application, you can back up the following types of data:

- Applications
- Bookmarks
- Wi-Fi networks
- Other settings

### To back up data to an online account

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Backup & reset**.
- 3 Under **Google™ Backup & restore**, tap **Back up my data** and drag the slider to the right.

### To Enable Automatic Restore when you Reinstall an Application

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Backup & reset**.
- 3 Under **Google™ Backup & restore**, drag the slider beside **Automatic restore** to the right.

# Downloading applications

## Downloading Applications from Google Play™

Google Play™ is the official online Google store for downloading applications, games, music, movies, and books. It includes both free and paid applications. Before you start downloading from Google Play™, make sure you have a working internet connection, preferably over Wi-Fi to limit data traffic charges.

- ! To use Google Play™, you need to have a Google™ account. Google Play™ may not be available in all countries or regions.

### To Download an Application from Google Play™

- 1 From the **Home screen**, tap .
  - 2 Find and tap **Play Store**.
  - 3 Find an item you wish to download by browsing categories, or by using the search function.
  - 4 Tap the item to view its details, and follow the instructions to complete the installation.
- ! Some applications may need to access data, settings, and various functions on your device in order to work properly. Only install and give permissions to applications you trust. You can view the permissions granted to a downloaded application and also change their status by tapping the application under **Settings > Apps**.

## Downloading Applications from Other Sources

When your device is set to allow downloads from sources other than Google Play™, you can download applications directly from other websites by following the relevant download instructions.

- ! Installing applications of unknown or unreliable origin can damage your device. Download applications only from reliable sources. Contact the application provider if you have any questions or concerns.
- 💡 If you are using a device with multiple users, only the owner, that is, the primary user, can allow downloads from sources other than Google Play™. Changes made by the owner affect all other users.

### To allow downloading of applications from other sources

- 1 From your Homescreen, tap .
  - 2 Find and tap **Settings > Security**.
  - 3 Drag the slider beside **Unknown sources** to the right.
  - 4 Tap **OK**.
- ! Some applications may need to access data, settings and various functions on your device in order to work properly. Only install and give permissions to applications that you trust. You can view the permissions granted to a downloaded application and also change their status by tapping the application under **Settings > Apps**.

# Internet and networks

## Browsing the web

The Google Chrome™ web browser for Android™ devices comes pre-installed in most markets. Go to <http://support.google.com/chrome> and click the "Chrome for Mobile" link to get more detailed information about how to use this web browser.

### To Browse with Google Chrome™

- 1 From your **Home screen**, tap .
- 2 Find and tap .
- 3 If you are using Google Chrome™ for the first time, select to either sign in to a Google™ account or browse with Google Chrome™ anonymously.
- 4 Enter a search term or web address in the search and address field, then tap **Go** on the keyboard.

## Internet and MMS settings

To send multimedia messages, or to access the internet when there is no available Wi-Fi network, you must have a working cellular data connection with the correct internet and MMS (Multimedia Messaging Service) settings. Here are some tips:

- For most cellphone networks and service providers, internet and MMS settings come pre-installed on your device. You can then start using the internet and send multimedia messages right away.
  - It is possible to download internet and MMS settings later from the Settings menu.
  - You can manually add, change, or delete internet and MMS settings on your device anytime. If you change or delete an internet or MMS setting by mistake, download the internet and MMS settings again.
  - If you cannot access the internet over a cellular network, or if multimedia messaging is not working, even though the internet and MMS settings have been downloaded successfully to your device, refer to the troubleshooting tips for your device at [www.sonymobile.com/support/](http://www.sonymobile.com/support/) for network coverage, cellular data, and MMS issues.
- ! If STAMINA mode is activated to save power, all cellular data traffic gets paused when the screen is off. If this causes connection problems, try excluding some applications and services from being paused, or deactivate STAMINA mode temporarily. For more information, see *Battery and Power Management* on page 34.
- ! If you are sharing a device with multiple users, only the owner, that is, the primary user, can download internet and messaging settings from the Settings menu, but the downloaded settings are applicable to all users.

### To Download internet and MMS Settings

- 1 From your **Home screen**, tap .
  - 2 Find and tap **Settings > More > Internet settings**.
  - 3 Tap **ACCEPT**. Once the settings have been downloaded successfully,  appears in the status bar and cellular data traffic is turned on automatically.
- ! If the settings cannot be downloaded to your device, check the signal strength of your cellphone or **Wi-Fi** network connections. Move to an open location free from obstructions or get close to a window and then try again.

### To add internet and MMS settings manually

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **More** > **Mobile networks**.
- 3 Tap **Access Point Names** > **+**.
- 4 Tap **Name** and enter a name as desired.
- 5 Tap **APN** and enter the access point name.
- 6 Enter all other information as required. If you don't know what information is required, contact your network operator for more details.
- 7 When you're done, tap , then tap **SAVE**.
- 8 To select the APN that you have just added, tap the radio button beside the name of the APN. Once selected, this APN becomes the default APN for internet and MMS services.

### To View Downloaded internet and MMS Settings

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings** > **More** > **Mobile networks**.
- 3 Tap **Access Point Names**.
- 4 To view more details, tap any of the available items.

## Wi-Fi

Use Wi-Fi to surf the internet, download applications, or send and receive emails. Once you connect to a Wi-Fi network, your device remembers the network and automatically connects to it the next time you come within range.

Some Wi-Fi networks require you to log in to a web page before you can get access. Contact the relevant Wi-Fi network administrator for more information.

Available Wi-Fi networks may be open or secured:

- Open networks are indicated by  next to the Wi-Fi network name.
  - Secured networks are indicated by  next to the Wi-Fi network name.
- ! Some Wi-Fi networks do not show up in the list of available networks because they do not broadcast their network name (SSID). If you know the network name, you can add it manually to your list of available Wi-Fi networks.

### To Turn Wi-Fi On or Off

- 1 From your **Home screen**, tap .
  - 2 Find and tap **Settings** > **Wi-Fi**.
  - 3 Tap the slider to enable or disable Wi-Fi.
- ! It may take a few seconds before Wi-Fi is enabled.

### To Connect to a Wi-Fi Network Automatically

- 1 From your **Home screen**, tap .
  - 2 Find and tap **Settings** > **Wi-Fi**.
  - 3 Tap the slider to turn on **Wi-Fi**. All available Wi-Fi networks are displayed.
  - 4 Tap a Wi-Fi network to connect to it. For secured networks, enter the relevant password.  is displayed in the status bar once you are connected.
- 💡 To search for new available networks, tap , then tap **Refresh**. If you cannot connect to a Wi-Fi network successfully, refer to the relevant troubleshooting tips for your device at [www.sonymobile.com/support/](http://www.sonymobile.com/support/).

### To Add a Wi-Fi Network Manually

- 1 From your Homescreen, tap .
  - 2 Find and tap **Settings** > **Wi-Fi**.
  - 3 Tap  > **Add network**.
  - 4 Enter the **Network name (SSID)** information.
  - 5 To select a security type, tap the **Security** field.
  - 6 If required, enter a password.
  - 7 To edit advanced options, such as proxy and IP settings, tap **Advanced options** and then edit the options as desired.
  - 8 Tap **Save**.
- ! Contact your Wi-Fi network administrator to get the network SSID and password.

### Increasing Wi-Fi Signal Strength

There are a number of things you can do to improve Wi-Fi reception:

- Move your device closer to the Wi-Fi access point.
- Move the Wi-Fi access point away from any potential obstructions or interference.
- Don't cover the Wi-Fi antenna area of your device (the highlighted area in the illustration).

### Wi-Fi Settings

When you are connected to a Wi-Fi network or when there are Wi-Fi networks available in your vicinity, you can view the status of these networks. You can also enable your device to notify you whenever an open Wi-Fi network is detected.

#### To Enable Wi-Fi Network Notifications

- 1 Turn on Wi-Fi if it isn't on already.
- 2 From your Homescreen, tap .
- 3 Find and tap **Settings** > **Wi-Fi**.
- 4 Tap  > **Advanced**.
- 5 Drag the slider beside **Network notification** to the right.

#### To View Detailed Information About a Connected Wi-Fi Network

- 1 From the **Home screen**, tap .
- 2 Find and tap **Settings** > **Wi-Fi**.
- 3 Tap the Wi-Fi network you are currently connected to. Detailed network information is displayed.

### To Add a Wi-Fi Sleep Policy

- 1 From the Homescreen, tap .
- 2 Find and tap **Settings** > **Wi-Fi**.
- 3 Tap , then tap **Advanced** > **Keep Wi-Fi on during sleep**.
- 4 Select an option.

### To Find the MAC Address for Your Device

- 1 From the **Home screen**, tap .
- 2 Find and tap **Settings** > **Wi-Fi**.
- 3 Tap . The **MAC address** is displayed in the list.

## WPS

WPS (Wi-Fi Protected Setup™) is a wireless networking standard that helps you establish secure wireless network connections. If you have little background knowledge of wireless security, WPS makes it easy for you to set up Wi-Fi Protected Access® (WPA) encryption to secure your network. You can also add new devices to an existing network without entering long passwords.

Use one of these methods to enable WPS:

- Push button method – simply push a button on a WPS-supported device, for example, a router.
- PIN method – your device creates a random PIN (Personal Identification Number), which you enter on the WPS-supported device.

### To Connect to a Wi-Fi Network Using a WPS Button

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Wi-Fi**.
- 3 Turn on Wi-Fi if it is not already on.
- 4 Tap  > **Advanced** > **WPS Push Button**, and then press the WPS button on the WPS-supported device.

### To Connect to a Wi-Fi Network Using a WPS PIN

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Wi-Fi**.
- 3 Turn on Wi-Fi if it is not already on.
- 4 Tap  > **Advanced** > **WPS PIN Entry**.
- 5 On the WPS-supported device, enter the PIN that appears on your device.

## Sharing your mobile data connection

You can share your mobile data connection with other devices in several ways:

- **USB tethering**
  - share your mobile data connection with a single computer using a USB cable.
- **Bluetooth® tethering**
  - share your mobile data connection with up to five other devices via Bluetooth®.
- **Portable Wi-Fi hotspot**
  - share your mobile data connection simultaneously with up to 8 other devices, including devices that support WPS technology.

### To Share Your Data Connection Using a USB Cable

- 1 Deactivate all USB cable connections to your device.
  - 2 Using the USB cable that came with your device, connect your device to a computer.
  - 3 From your **Home screen**, tap .
  - 4 Find and tap **Settings > More > Tethering & portable hotspot**.
  - 5 Drag the slider beside **USB tethering** to the right, and then tap **OK** if prompted.  is displayed in the status bar once you are connected.
  - 6 To stop sharing your data connection, tap the **USB tethering** slider or disconnect the USB cable.
- ! You cannot share your device's data connection and SD card over a USB cable at the same time.

### To Share Your Mobile Data Connection with Another Bluetooth® Device

- 1 Make sure that your device and the other Bluetooth® device are paired with each other and that cellular data traffic is activated on your device.
  - 2 **Your device:** From your **Home screen**, tap .
  - 3 Find and tap **Settings > More > Tethering & portable hotspot**, and then tap the **Bluetooth tethering** slider to enable the function.
  - 4 **Bluetooth® device:** Set up the device so that it obtains its network connection using Bluetooth®. If the device is a computer, refer to the relevant instructions to complete the setup. If the device runs on the Android™ operating system, tap the settings icon beside the name of the device that it is paired with under **Settings > Bluetooth > Paired devices**, then mark the **Internet access** checkbox.
  - 5 **Your device:** Tap **Settings** next to the paired device. Then, mark the Internet access checkbox. Wait for  to appear in the status bar. Once it appears, the setup is complete.
  - 6 To stop sharing your mobile data connection, tap the **Bluetooth tethering** slider again to disable the function.
- ! The **Bluetooth tethering** function is turned off every time you turn off your device or turn off the Bluetooth® function.
- 💡 For more information about pairing and turning on mobile data traffic, see *To pair your device with another Bluetooth® device* on page 124 and *To Add a Virtual Private Network* on page 51.

### To Use Your Device as a Portable Wi-Fi Hotspot

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > More > Tethering & portable hotspot**.
- 3 Tap **Portable hotspot settings > Configure Wi-Fi hotspot**.
- 4 Enter the **Network name (SSID)** information.
- 5 To select a security type, tap the **Security** field. If required, enter a password.
- 6 Tap **Save**.
- 7 Tap , and drag the slider beside **Portable hotspot** to the right.
- 8 If prompted, tap **OK** to confirm.  appears in the status bar once the portable Wi-Fi hotspot is active.
- 9 To stop sharing your data connection via Wi-Fi, drag the slider beside **Portable hotspot** to the left.

### To Allow a WPS-Supported Device to Use Your Cellular Data Connection

- 1 Make sure that your device is functioning as a portable Wi-Fi hotspot.
- 2 From your **Home screen**, tap .
- 3 Find and tap **Settings > More > Tethering & portable hotspot > Portable hotspot settings**.
- 4 Tap the **Discoverable** slider to enable the function.
- 5 Under **Configure Wi-Fi hotspot**, make sure that your portable hotspot is secured by a password.
- 6 Tap **WPS Push Button**, then follow the relevant instructions. Alternatively, tap  > **WPS PIN Entry**, then enter the PIN that appears on the WPS-supported device.

### To Rename or Secure Your Portable Hotspot

- 1 From the **Home screen**, tap .
- 2 Find and tap **Settings > More > Tethering & portable hotspot**.
- 3 Tap **Portable hotspot settings > Configure Wi-Fi hotspot**.
- 4 Enter the **Network name (SSID)** for the network.
- 5 To select a security type, tap the **Security** field.
- 6 If required, enter a password.
- 7 Tap **Save**.

## Controlling Data Usage

You can keep track of the amount of data transferred to and from your device over your cellular data or Wi-Fi connection during a given period. For example, you can view the amount of data used by individual applications. For data transferred over your cellular data connection, you can also set data usage warnings and limits to avoid additional charges.

- ! Adjusting data usage settings can help you keep greater control over data usage, but cannot guarantee the prevention of additional charges.

### To Turn Data Traffic On or Off

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Data usage**.
- 3 Tap the **Mobile data traffic** slider to turn data traffic on or off.

- 💡 When data traffic is turned off, your device can still establish Wi-Fi and Bluetooth® connections.

### To Set a Data Usage Warning

- 1 Make sure mobile data traffic is turned on.
- 2 From your **Home screen**, tap .
- 3 Find and tap **Settings > Data usage**.
- 4 To set the warning level, drag the warning line to the desired value. You can also enter the data limit manually by tapping on the number displayed beside the line. You receive a warning notification when the amount of data traffic reaches the level you set.

### To Set a Mobile Data Usage Limit

- 1 Make sure mobile data traffic is turned on.
  - 2 From your **Home screen**, tap .
  - 3 Find and tap **Settings > Data usage**.
  - 4 Tap the **Mobile** tab.
  - 5 Tap the slider beside **Set cellular data limit** to enable the function, and then tap **OK**.
  - 6 To set the mobile data usage limit, drag the data limit line to the desired value. You can also set the data limit manually by tapping on the number displayed beside the line.
- ! Once your mobile data usage reaches the set limit, mobile data traffic on your device gets turned off automatically.

### To Control the Data Usage of Individual Applications

- 1 From your **Home screen**, tap .
  - 2 Find and tap **Settings > Data usage**.
  - 3 Tap the application that you want to control, then tap the **Restrict app background data** slider and tap **OK**.
  - 4 To access more specific settings for the application, tap **App settings** and make the desired changes.
-  The performance of individual applications may be affected if you change the related data usage settings.

### To Check Your Data Usage

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Data usage**.
- 3 Tap , then tap **Show Wi-Fi**.
- 4 To view information about the amount of data transferred via Wi-Fi, tap the **Wi-Fi** tab.
- 5 To view the information about the amount of data transferred via cellular data connection, tap the **Mobile data traffic**.

## Selecting mobile networks

Your device automatically switches between mobile networks depending on which mobile networks are available where you are. You can also manually set your device to use a particular mobile network mode, for example, WCDMA or GSM.

Different status icons are displayed in the status bar depending on the type or mode of network that you are connected to. Refer to *Status icon* on page 29 to see what the different status icons look like.

### To Select a Network Mode

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > More > Mobile networks**.
- 3 Tap **Preferred network type**, then select a network mode.

### To Select Another Network Manually

- 1 From your **Home screen**, tap .
  - 2 Find and tap **Settings > More > Mobile networks > Network operators**.
  - 3 Tap **Search mode**, then select **Manual**.
  - 4 Select a network.
-  If you select a network manually, your device will not search for other networks, even if you move out of range of the manually selected network.

### To Activate Automatic Network Selection

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > More > Mobile networks > Service providers**.
- 3 Tap **Search mode**, then select **Automatic**.

## Virtual private networks (VPNs)

Use your device to connect to virtual private networks (VPNs), which allow you to access resources inside a secured local network from a public network. For example, VPN connections are commonly used by corporations and educational institutions for users who need to access intranets and other internal services when they are outside of the internal network, for example, when they are traveling.

VPN connections can be set up in many ways, depending on the network. Some networks may require you to transfer and install a security certificate on your device. For

detailed information about how to set up a connection to your virtual private network, contact the network administrator of your company or organization.

- ! If you are using a device with multiple users, you may need to log in as the owner, that is, the primary user, to adjust the settings for VPN.

#### To Add a Virtual Private Network

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > More > VPN**.
- 3 Tap **+**.
- 4 Select the type of VPN to add.
- 5 Enter your VPN settings.
- 6 Tap **Save**.

#### To Connect to a Virtual Private Network

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > More > VPN**.
- 3 In the list of available networks, tap the VPN that you want to connect to.
- 4 Enter the required information.
- 5 Tap **Connect**.

#### To Disconnect from a Virtual Private Network

- 1 Double-tap the status bar to open the Notification panel.
- 2 Tap the notification for the VPN connection to turn it off.

# Synchronizing data on your device

## Synchronizing with Online Accounts

Synchronize your device with contacts, email, calendar events, and other information from online accounts, for example, email accounts such as Gmail™ and Exchange ActiveSync, Facebook™, and Flickr™. You can synchronize data automatically for such accounts by activating the auto-sync function. Or you can synchronize each account manually.

### To Set Up an Online Account for Synchronization

- 1 From your Homescreen, tap .
- 2 Tap **Settings** > **Accounts** > **Add account**, then select the account you want to add.
- 3 Follow the instructions to create an account, or sign in if you already have an account.

### To synchronize manually with an online account

- 1 From your Homescreen, tap  > **Settings** > **Accounts**.
- 2 Under **Accounts**, tap the name of the account that you want to synchronize with. A list of items appears showing what can be synchronized with the account.
- 3 Tap the items that you want to synchronize.

### To remove an online account

- 1 From your Homescreen, tap  > **Settings** > **Accounts**.
- 2 Under **Accounts** tap the name of the account that you want to remove.
- 3 Tap , then tap **Remove account**.
- 4 Tap **Remove account** again to confirm.

## Synchronizing with Microsoft® Exchange ActiveSync®

If your company uses a Microsoft Exchange ActiveSync account, you can access your corporate email messages, calendar appointments, and contacts directly on your device. After setup, you can find your information in the **Email**, **Calendar** and **Contacts** applications.

### To Set Up an EAS Account for Synchronization

- 1 Be sure to have your domain and server details available (as provided by your corporate network administrator).
  - 2 From your Homescreen, tap .
  - 3 Tap **Settings** > **Accounts** > **Add account** > **Exchange ActiveSync**.
  - 4 Enter your corporate email address and password.
  - 5 Tap **Next**. Your device begins to retrieve your account information. If a failure occurs, enter the domain and server details for your account manually and then tap **Next**.
  - 6 Tap **OK** to allow your corporate server to control your device.
  - 7 Select a synchronization method, a synchronization interval, and what data you want to sync with your device, such as contacts and calendar entries.
  - 8 Tap **Next**, then select the way to receive a notification when you receive new mail.
  - 9 Tap **Next** again. Enter a name for the corporate account, then tap **Finish setup**.
  - 10 If prompted, activate the device administrator to allow your corporate server to set certain security rules on your device, such as disabling voice recording and using storage encryption. Otherwise, the account setup fails.
- ! When you change the login password for an EAS account on your computer, you have to log in again to the EAS account on your device.

### To Change the Settings of an EAS Account

- 1 From your Homescreen, tap .
- 2 Find and tap **Email**, and then tap .
- 3 Tap **Settings**, select an EAS account, and then change the settings of the EAS account as desired.

### To set a synchronisation interval for an EAS account

- 1 From your Homescreen, tap .
- 2 Tap **Email**, then tap .
- 3 Tap **Settings** and select an EAS account.
- 4 Tap **Check frequency** > **Check frequency** and select an interval option.

### To Remove an EAS Account

- 1 From your Homescreen, tap  > **Settings** > **Accounts**.
- 2 Under **Accounts**, tap **Exchange ActiveSync**, then select the EAS account you want to remove.
- 3 Tap , then tap **Remove account**.
- 4 Tap **Remove account** again to confirm.

# Basic settings

## Accessing settings

View and change settings for your device from the Settings menu. The Settings menu is accessible from both the Application screen and the Quick settings panel.

### To open the device settings menu from the Application screen

- 1 From your Homescreen, tap .
- 2 Tap **Settings**.

### To view information about your device

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **About phone**.

### To Open or Close the Quick Settings Panel

- To open the Quick settings panel, drag the status bar downward.

### To Turn On the Flashlight

- 1 Drag the status bar downward using two fingers.
- 2 Tap .

### To Select which Settings to Display on the Quick Settings Panel

- 1 Drag the status bar downward, then tap .
- 2 In the bar at the top of the screen, touch and hold the icon for the quick setting you want to add, then drag and drop it in the lower part of the screen.

### To Rearrange the Quick Settings Panel

- 1 Drag the status bar downward, then tap .
- 2 Touch and hold an icon, then move it to the desired position.

## Volume settings

You can adjust the ringtone volume for incoming calls and notifications as well as for music and video playback.

### To adjust the ringtone volume with the volume key

- Press the volume key up or down.

### To Adjust the Media Playing Volume with the Volume Key

- When playing music or watching video, press the volume key up or down, even when the screen is locked.

### To Turn on Vibrate Mode

- Press the volume key up or down until  appears.

### To Adjust the Volume Levels

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Sound & notification**.
- 3 Drag the volume sliders to the desired positions.

- ! You can also press the volume key up or down and tap  to adjust the ringtone, media playback, or alarm volume levels separately.

### To Set Your Device to Vibrate for Incoming Calls

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Sound & notification**.
- 3 Tap the **Also vibrate for calls** slider to enable the function.

### To Set a Ringtone

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Sound & notification > Phone ringtone**.
- 3 Select an option from the list or tap **+** and select a music file that is saved on your device.
- 4 To confirm, tap **Done**.

### To Select the Notification Sound

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Sound & notification > Notification sound**.
- 3 Select an option from the list, or tap **+** and select a music file that is saved on your device.
- 4 To confirm, tap **Done**.

 Some applications have their own specific notification sounds, which you can select from the application settings.

### To Enable Touch Tones

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Sound & notification > Other sounds**.
- 3 Tap the sliders to enable or disable the different touch tones as desired.

## Do Not Disturb Mode

You can set your device to Do not disturb mode and decide how long your device will be in Do not disturb mode manually. You can also preset when your device will be in Do not disturb mode automatically.

### To Activate Do Not Disturb Mode

- 1 Drag the status bar downward to access the Quick settings panel.
- 2 Find and tap .
- 3 Select an option, then tap **Done**.

### To Quickly Shift Between Do Not Disturb/Vibrate/Sound Mode

- 1 Press the volume key up or down until , , or  appears.
- 2 Tap  or  to quickly shift between Vibrate/Sound mode. To activate Do not disturb mode, press the volume key down when in vibrate mode.

### To Schedule Do Not Disturb Mode Time Intervals

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Sound & notification > Do not disturb > Automatic rules**.
- 3 Select the time or event to schedule Do not disturb mode for, or add a new rule.
- 4 Enter the desired name for the rule, and then tap **OK**.
- 5 Find and tap **Days** and mark the checkboxes for the relevant days, then tap **Done**.
- 6 To adjust the start time, tap **Start time** and select a value, and then tap **OK**.
- 7 To adjust the end time, tap **End time** and select a value, and then tap **OK**. Your device stays in Do not disturb mode during the selected time interval.

## Setting Exceptions for Do Not Disturb Mode

You can select which types of notifications are allowed to sound in Do not disturb mode and you can filter exceptions based on who the notifications come from. The most common types of exceptions include:

- Events and reminders
- Calls
- Messages
- Alarms

#### To Allow Exceptions in Do Not Disturb Mode

- 1 From the Homescreen, tap .
- 2 Find and tap **Settings** > **Sound & notification** > **Interruptions** > **Allowed in Priority only**.
- 3 Drag the slider beside the desired option.

#### To Set Notifications as Exceptions in Do Not Disturb Mode

- 1 From the Homescreen, tap .
- 2 Find and tap **Settings** > **Sound & notification** > **Do not disturb** > **Allowed in Priority only**.
- 3 Select an option.

#### To Associate Exceptions with Specific Contact Types

- 1 From the Homescreen, tap .
- 2 Find and tap **Settings** > **Sound & notification** > **Do not disturb** > **Allowed in Priority only**.
- 3 Tap **Calls** or **Messages**.
- 4 Select an option.

#### To Allow Alarms to Sound in Do Not Disturb Mode

- 1 Press the volume key down until  appears.
- 2 Tap , and then adjust the slider beside .

## Screen settings

#### To Adjust the Screen Brightness Manually Regardless of Lighting Conditions

- 1 From your Homescreen, tap .
  - 2 Find and tap **Settings** > **Display** and tap the **Adaptive brightness** slider to disable this function, if it is not already disabled.
  - 3 Tap **Brightness level**.
  - 4 Drag the slider to adjust the brightness.
-  Lowering the brightness level helps the battery last longer.

#### To Enable or Disable Vibrate on Touch

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Sound & notification** > **Other sounds**.
- 3 Tap the **Vibrate on touch** slider to enable or disable the function.

#### To adjust the idle time before the screen turns off

- 1 From your Homescreen, tap .
  - 2 Find and tap **Settings** > **Display** > **Sleep**.
  - 3 Select an option.
-  To turn off the screen quickly, briefly press the power key .

#### To Adjust the Font Size

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Display** > **Font size**.
- 3 Select the preferred option.

### To Adjust the White Balance of the Display

- 1 From your **Home screen**, tap .
  - 2 Find and tap **Settings > Display > White balance**.
  - 3 Drag the sliders to the desired positions to adjust the white balance.
-  To revert the white balance setting back to its default values, tap  **Default values**.

### Smart backlight control

The smart backlight control keeps the screen on as long as the device is held in your hand. Once you put down the device, the screen turns off according to your sleep setting.

### To Enable or Disable the Smart Backlight Control Function

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Display > Smart backlight control**.
- 3 Tap the slider to enable or disable the function.

### Glove mode

Using glove mode, you can wear gloves and still navigate the screen on your device. When you use glove mode, a cursor ring appears on the area of the screen where a touch is registered.

### To Enable Glove Mode

- 1 From your **Home screen**, tap  **> Settings > Display**.
  - 2 Tap the **Glove mode** slider.
-  The sensitivity depends on the size of the contact area between the screen and the gloved finger that you use to navigate the screen.

### Screen Pinning

Use screen pinning to set your device to display only the screen for a specific application. For example, if you are playing a game and you accidentally touch the Home navigation key, the screen pinning feature prevents the active game app screen from being minimized. You can also use this feature when you lend your device to another person to make it harder for them to access more than one screen or application. For example, you can lend your phone to somebody to make a phone call and pin the screen to the Phone application so that the person can't easily use other apps such as Messaging or Email.

-  Screen pinning is not a security feature and does not fully prevent other users from unpinning a screen and accessing your device. To protect your data, you should set up your device to request a screen lock PIN, password, or pattern before someone can unpin the screen.

### To Enable or Disable Screen Pinning

- 1 From your **Home screen**, tap .
  - 2 Find and tap **Settings > Security > Screen pinning**.
  - 3 Tap the slider to enable or disable the function.
  - 4 If you have enabled Screen pinning, you can tap the **Lock device when unpinning** slider to enable or disable this additional security function.
-  A pattern, PIN, or password is not mandatory for screen pinning to work.

### To Pin a Screen

- 1 Make sure screen pinning is activated on your device.
- 2 Open an app and go to the screen you want to pin.
- 3 Tap .
- 4 To display the screen pinning icon , swipe upward.
- 5 Tap .
- 6 In the pop-up window that appears, tap **Got it**.

### To Unpin a Screen

- 1 On the pinned screen, touch and hold  and  at the same time.
  - 2 Release both buttons.
- 💡 If you selected a security option when you activated the screen pinning function, you have to enter your pattern, PIN, or password to unlock the device before the screen can be unpinned.

## Application settings

Some apps will ask for permissions once you start using them. You can allow or deny permissions individually for each app, either from the Settings menu or from the Permission confirm dialog. Permission requirements depend on the app's design.

### Allowing or denying permissions

You can choose whether to allow or deny permissions when the dialog is shown. If you have used another Android version previously, most apps will have already been granted the necessary permissions.

#### To allow a permission

- 1 To allow a permission, tap **Allow**.
- 2 When the confirm dialog appears for the second time, you can choose the **Never ask again** option if you wish.
- 3 A dialog will also explain why the app needs the permissions and what it uses them for specifically. To dismiss this dialog, tap **OK**.

#### To deny a permission

- To deny a permission, tap **Deny** when the dialog is shown.
- 💡 Some applications can still be used even if you have denied permissions.

### Critical permissions

Some permissions are mandatory for apps to work as intended. In such cases, a dialog will inform you.

#### To Configure Applications

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Apps > **.
- 3 Select a configuration option, such as **App permissions**, and then choose an application that you want to configure.

#### To Allow Critical Permissions

- 1 To allow a permission, tap **Continue > APP INFO > Permissions**.
- 2 Find the critical permission you need.
- 3 Drag the slider to the right.

### Allowing or Denying Automatic Application Updates

If the automatic update feature is enabled, your applications get updated without you being asked, so you may not realize that large volumes of data are being downloaded. In order to avoid potentially high data transfer costs, you can disable automatic updates or enable automatic updates only over Wi-Fi connection. You have to disable the automatic update feature both in the Play Store™ app and the What's New app (where available) to avoid the automatic updating of apps.

#### To Enable or Disable Automatic Updates for All Applications in the Play Store

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap , then tap **Settings > Auto-update apps**.
- 3 Select the preferred option.

### To Enable or Disable Automatic Updates for All Applications in What's New

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap , then tap **Settings > Auto-update apps**.
- 3 Select the preferred option.

### Application linking

Your device can determine the default app to handle a particular web link. This means that if the link is set, you don't need to select an app each time you open a link. You can change the default app any time you want.

### To Manage App Links from the Settings Menu

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Apps**.
- 3 Tap  and find **App links**.
- 4 Select an app and adjust the settings as desired.

## Resetting Your Applications

You can reset an application or clear application data if your application stops responding or causes issues with your device.

### To Reset Application Preferences

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Apps**.
- 3 Tap , then tap **Reset app preferences > RESET APPS**.

💡 Resetting application preferences does not delete any application data from your device.

### To Clear Application Data

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Apps**.
- 3 Select an application or service, then tap **Storage > CLEAR DATA > OK**.

! When you clear application data, data for the selected application is deleted from your device permanently. The option to clear application data is not available for every application or service.

### To Clear Application Cache

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Apps**.
- 3 Select an application or service, and then tap **Storage > CLEAR CACHE**.

! The option to clear the application cache is not available for every application or service.

### To Clear the Application Default Setting

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Apps**.
- 3 Select an application or service, and then tap **Open by default > CLEAR DEFAULTS**.

! The option to clear the application default setting is not available for every application or service.

## Daydream

Daydream is an interactive screen saver that automatically displays colors, photos or a slideshow while your device is docked or charging and the screen is idle.

💡 On a device with multiple users, each user can have individual Daydream settings.

### To Enable or Disable the Daydream Screen Saver

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Display > Daydream**.
- 3 Tap the slider to enable or disable the function.

### To Select Content for the Daydream Screen Saver

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Display > Daydream**.
- 3 Tap the slider to enable the function.
- 4 Select what you want to display when the screen saver is active.

### To Start the Daydream Screen Saver Manually

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Display > Daydream**.
- 3 Tap the slider to enable the function.
- 4 To activate the Daydream screen saver immediately, tap , and then tap **Start now**.

## Language Settings

You can select a default language for your device and change it again at a later time. You can also change the writing language for text input.

### To Change the Language

- 1 From the **Home screen**, tap .
  - 2 Find and tap **Settings > Language & input > Language**.
  - 3 Select an option.
  - 4 Tap **OK**.
- ! If you select the wrong language and cannot read the menu texts, find and tap . Then, select the text beside  and select the first entry in the menu that opens. You can then select the language you want.

## Date and time

You can change the date and time on your device.

### To Set the Date Manually

- 1 From the **Home screen**, tap .
- 2 Find and tap **Settings > Date & time**.
- 3 Disable the **Automatic date & time** function by tapping the slider.
- 4 Tap **Set date**.
- 5 Flick left or right, or use the arrows to set the desired date.
- 6 Tap **OK**.

### To Set the Time Manually

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Date & time**.
- 3 Disable the **Automatic date & time** function by tapping the slider.
- 4 Tap **Set time**.
- 5 Select the relevant values for the hour and minute.
- 6 Tap **OK**.

### To Set the Time Zone

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Date & time**.
- 3 Disable the **Automatic time zone** function by tapping the slider.
- 4 Tap **Select time zone**.
- 5 Select an option.

## Enhancing the sound output

You can enhance the sound of your device by manually enabling individual sound settings such as Equalizer and Surround sound. You can also enable the Dynamic normalizer to minimize volume differences between songs or videos.

### To Enhance the Sound Output Automatically

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Sound & notification > Audio settings**.
- 3 Enable the **ClearAudio+** function by tapping the slider.

### To Adjust the Sound Settings Manually

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Sound & notification > Audio settings**.
- 3 Disable the **ClearAudio+** and **DSEE HX** functions if they are enabled by tapping the sliders.
- 4 Tap **Sound effects > Equalizer**.
- 5 Select a preset arrangement from the drop-down list, or adjust the sound settings manually by dragging the sliders up or down.

- ! The manual adjustment of sound output settings has no effect on voice communication applications. For example, there is no change in the voice call sound quality.

### To Minimize Volume Differences Using the Dynamic Normalizer

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Sound & notification > Audio settings**.
- 3 Disable the **DSEE HX** function by tapping the slider if it is enabled.
- 4 Enable the **Dynamic normalizer** function by tapping the slider.

## Multiple User Accounts

Your device supports multiple user accounts so that different users can log in separately to the device and use it. Multiple user accounts work well in situations where you share the same device with other people or lend your device to someone to use for a while. The user who sets up the device for the first time becomes the owner of the device. Only the owner can manage the accounts of other users. Apart from the owner account, there are two different types of accounts:

- Regular User: This account type is suitable for someone who regularly uses your device.
  - Guest User: Enable the guest account option for someone who just wants to use your device temporarily.
- ! Some features are only available to the owner. For example, only the owner can allow downloads from sources other than Google Play™.

### About the Regular User Account

By adding Regular User accounts, you can allow different users to have different homescreens, wallpapers, and general settings. They also get separate access to applications and memory storage for files such as music and photos. You can add up to seven Regular User accounts on your device.

### To Add a Regular User Account

- 1 Make sure you are logged in as the owner, that is, the user who set up the device for the first time.
  - 2 From your Homescreen, tap .
  - 3 Find and tap **Settings > Users > Add user**.
  - 4 Tap **OK**. The new account is now created.
  - 5 Tap **SET UP NOW**. The screen locks and an icon representing the newly added user appears in the top-right corner.
  - 6 Unlock the screen by swiping left or upward.
  - 7 Follow the on-screen instructions to set up the account for the user.
- 💡 In cases where the person using the new account wants to set up the account but is not available at the time, you can tap **NOT NOW** in step 5. When the user is ready, they can select **Users** under **Settings** and see the new account, which appears as **New user**. Just tap the account and follow the instructions to finish setting it up.
- 💡 You can also add a regular user account from the status bar on any screen. Just drag the status bar downward and tap the user icon, and then tap **Add user**.

### To Delete a Regular User Account from Your Device

- 1 Be sure you are logged in as the owner.
- 2 From your Homescreen, tap .
- 3 Find and tap **Settings > Users**.
- 4 Tap  beside the name of the user you want to delete, then tap **Remove user > Delete**.

### About the Guest User Account

If someone just wants to use your device temporarily, you can enable a guest account for that user. In Guest mode, your device starts up as a freshly installed system with only the preinstalled apps. Once your guest is finished using your device, you can wipe the session clean so that the next guest can start fresh. The Guest User account is preinstalled and cannot be deleted.

### To Activate the Guest User Account

- 1 Make sure you are logged in as the owner, that is, the user who set up the device for the first time.
  - 2 From your **Home screen**, tap .
  - 3 Find and tap **Settings > Users > Guest**.
- 💡 You can also activate the guest user account from the status bar on any screen. Just drag the status bar fully downward and tap the user icon, and then tap **Add guest**.

### To Clear the Guest Session Data

- 1 Make sure you are logged in to the guest account.
  - 2 From your **Home screen**, tap .
  - 3 Find and tap **Settings > Users**.
  - 4 Find and tap **Remove guest**.
  - 5 Tap **Remove**.
- 💡 You can also clear the guest session from the status bar on any screen as long as you are logged in to the guest account. Just drag the status bar downward and tap the user icon, and then tap **Remove guest**.

## Switching between Multiple User Accounts

### To Switch between Multiple User Accounts

- 1 To view the list of users, drag the status bar downward using two fingers, then tap the user icon at the top right of the screen.
  - 2 Tap the icon representing the user account you want to switch to.
  - 3 If a password has been set for the account, enter this password to log in. Otherwise, just unlock the screen.
- 💡 When you switch to the guest account, tap **Start over** if you want to wipe the previous session or tap **Yes, continue** to continue the previous session.

## Settings for Multiple User Accounts

There are three different types of settings on devices with multiple users:

- Settings that can be changed by any user and affect all users. Examples include language, Wi-Fi, Airplane mode, NFC, and Bluetooth®.
- Settings that only affect an individual user account. Examples include automatic data syncing, screen lock, various accounts added, and wallpaper.
- Settings that are only visible to the owner and affect all users, for example, VPN settings.

# Typing text

## On-Screen Keyboard

You can enter text with the on-screen QWERTY keyboard by tapping each letter individually, or you can use the Gesture input feature and slide your finger from letter to letter to form words. If you prefer to use a smaller version of the on-screen keyboard and input text using only one hand, you can activate the one-handed keyboard instead.

You can select up to three languages for text input. The Smart language detection feature detects the language you are using and predicts the words for that language as you type. Some applications open the on-screen keyboard automatically, such as email and text messaging applications.

- 1 Delete a character before the cursor.
- 2 Enter a carriage return or confirm text input.
- 3 Enter a space.
- 4 Personalize your keyboard. This key disappears after the keyboard is personalized.
- 5 Display numbers and symbols. For even more symbols, tap +=.\$.
- 6 Switch between lower-case ⇧, upper-case ⇧, and caps ⇧. For some languages, this key is used to access extra characters in the language.

### To display the on-screen keyboard to enter text

- Tap a text entry field.

### To use the on-screen keyboard in landscape orientation

- When the on-screen keyboard is displayed, turn the device sideways.
- ! You may need to adjust the settings in some applications to enable landscape orientation.

### To enter text character by character

- 1 To enter a character visible on the keyboard, tap the character.
- 2 To enter a character variant, touch and hold a regular keyboard character to get a list of available options, then select from the list. For example, to enter "é," touch and hold "e" until other options appear, then, while keeping your finger pressed on the keyboard, drag to and select "é."

### To enter a period

- After you enter a word, double-tap the space bar.

### To Enter Text Using the Gesture Input Function

- 1 When the on-screen keyboard is displayed, slide your finger from letter to letter to trace the word you want to write.
- 2 After you finish entering a word, lift up your finger. A word suggestion appears based on the letters you have traced.
- 3 If the word you wish to use does not appear, tap  to see other options and select accordingly. If the desired option does not appear, delete the entire word and trace it again, or enter the word by tapping each letter individually.

### To Change the Gesture Input Settings

- 1 When the on-screen keyboard is displayed, tap +=@.
- 2 Tap , then tap **Keyboard settings**.
- 3 To activate or deactivate the Gesture input function, drag the slider beside **Gesture input** to the on or off position.

### To use the one-handed keyboard

- 1 Open the on-screen keyboard in portrait mode, then tap +=@.
  - 2 Tap , then tap **One-handed keyboard**.
  - 3 To move the one-handed keyboard to the left or right side of the screen, tap  or  accordingly.
-  To return to using the full on-screen keyboard, tap .

## Phonepad

The Phonepad is similar to a standard 12-key telephone keypad. It gives you predictive text and multi-tap input options. You can activate the Phonepad text input method via the keyboard settings. The Phonepad is only available in portrait orientation.

- 1 Choose a text input option. You can tap each character once and use word suggestions, or keep tapping the key until the desired character is selected.
- 2 Delete a character before the cursor.
- 3 Enter a carriage return or confirm text input.
- 4 Enter a space.
- 5 Display symbols and smileys.
- 6 Display numbers.
- 7 Change the character case and turn on the caps lock.

### To open the Phonepad for the first time

- 1 Tap a text entry field, then tap +=@.
- 2 Tap , then tap **Keyboard settings**.
- 3 Tap **Portrait keyboard**, then select the **Phonepad** option.

### To enter text using the Phonepad

- When  appears in the Phonepad, tap each character key only once, even if the letter you want is not the first letter on the key. Tap the word that appears or tap  to view more word suggestions and select a word from the list.
- When  appears in the Phonepad, tap the on-screen key for the character you want to enter. Keep tapping this button until the desired character is selected. Then do the same for the next character you want to enter, and so on.

### To enter numbers using the Phonepad

- When the Phonepad is displayed, tap 123. A Phonepad with numbers appears.

### To insert symbols and smileys using the Phonepad

- 1 When the Phonepad is displayed, tap &😊. A grid with symbols and smileys appears.
- 2 Scroll up or down to view more options. Tap a symbol or smiley to select it.

## Entering text using voice input

When you enter text, you can use the voice input function instead of typing the words. Just speak the words that you want to enter. Voice input is an experimental technology from Google™, and is available for a number of languages and regions.

### To Enable Voice Input

- 1 When the on-screen keyboard is displayed, tap +=@.
- 2 Tap , then tap **Keyboard settings**.
- 3 Drag the slider beside **Google™ voice typing key** to the right.
- 4 Tap  to save your settings. A microphone icon  now appears on your on-screen keyboard.

### To Enter Text Using Voice Input

- 1 Open the on-screen keyboard and make sure that the voice input feature is enabled.
- 2 Tap . When  appears, speak to enter text.
- 3 When you're finished, tap  again. The suggested text appears.
- 4 Edit the text manually if necessary.

## Editing text

You can select, cut, copy and paste text as you write. You can access the editing options by double-tapping the entered text. The editing options then become available via an application bar.

### Text Editing Bar

After selecting text by double-tapping on a word, an editing bar appears with several tools available:

- **Cut**
- **Copy**
- **Paste**
- **Share**
- **Select all**
- **Assist**

- ! The **Paste** option only appears when you have text saved on the clipboard.

### To Select Text

- 1 Double-tap a word to highlight it.
- 2 You can drag the tabs on both sides of the highlighted word to select more text.

### To Edit Text

- 1 Double-tap a word to make the application bar appear.
- 2 Select the text you want to edit, and then use the application bar to make your desired changes.

## Personalizing the On-Screen Keyboard

When entering text using the on-screen keyboard, you can access keyboard and other text input settings that help you, for example to set options for writing languages, text prediction and correction. You can get word suggestions for one language at a time by deactivating the Smart language detection feature.

The keyboard can use text that you have written in messaging and other applications to learn your writing style. There is also a Personalization guide that runs you through the most basic settings to get you started quickly. You can select to use other keyboards and switch between keyboards. For example, you can select the Xperia™ Chinese keyboard or the Xperia™ Japanese keyboard.

### To access the on-screen keyboard settings

- 1 When you enter text using the on-screen keyboard, tap +=@.
- 2 Tap , and then tap **Keyboard settings** and change the settings as desired.
- 3 To add a writing language for text input, tap **Writing languages** and mark the relevant checkboxes.

### To change the word suggestion settings

- 1 When you enter text using the on-screen keyboard, tap +=@.
- 2 Tap , then tap **Keyboard settings** > **Word suggestions**.
- 3 Select an option.

### To Change Writing Language Using the On-Screen Keyboard

- ! This feature is only available if you have added more than one input language and the Smart language detection feature is off, or if the languages that you selected include non-Latin languages.
- When you enter text using the on-screen keyboard, tap the writing language icon to switch between the selected writing languages. For example, tap **EN** until the desired writing language appears.

### To Change the Use My Writing Style Settings

- 1 When you enter text using the on-screen keyboard, tap +=@.
- 2 Tap , then tap **Keyboard settings** > **Use my writing style** and select an option.

### To Change the Smart Language Detection Settings

- ! To use Smart language detection, more than one language must be selected in **Writing languages**. Also note that only languages using the Latin alphabet are supported.
- 1 When the on-screen keyboard is displayed, tap +=@.
  - 2 Tap , then tap **Keyboard settings**.
  - 3 To activate or deactivate the Smart language detection function, drag the slider beside **Smart language detection** to the on or off position.

### To Select a Keyboard Layout Variant

- ! Layout variants for the on-screen keyboard may not be available for all writing languages. You can select different keyboard layouts for each writing language.
- 1 When you enter text using the on-screen keyboard, tap +=@.
  - 2 Tap , then tap **Keyboard settings**.
  - 3 Tap **Writing languages**, then tap  beside a writing language.
  - 4 Select a keyboard layout variant.
  - 5 Tap **OK** to confirm.

### To Select a Different Keyboard

- 1 When you enter text using the on-screen keyboard, tap  at the bottom-right of the screen.
  - 2 Select an option.
- 💡 To enable more keyboard options, tap **More keyboards**, then drag the relevant sliders to the right.

# Calling

## Making calls

You can make a call by manually dialing a phone number, by tapping a number saved in your contacts list, or by tapping the phone number in your call log view. You can also use the smart dial function to quickly find numbers from your contacts list and call logs by entering part of a contact number or name and selecting from the suggestions that appear.

- |   |                   |
|---|-------------------|
| 1 | View more options |
| 2 | Delete number     |
| 3 | Dialpad           |
| 4 | Call button       |

### To Open the Dialpad

- 1 From your Homescreen, tap .
- 2 Find and tap .
- 3 If the dialpad does not appear, tap .

### To Dial a Phone Number

- 1 From your **Home screen**, tap .
- 2 Find and tap .
- 3 If the call log appears, tap .
- 4 Enter the phone number, and tap .

- 💡 To delete a number entered by mistake, tap .

### To Make a Call Using Smart Dial

- 1 From your **Home screen**, tap .
- 2 Find and tap .
- 3 If the call log appears, tap .
- 4 Use the dialpad to enter letters or numbers that correspond to the contact you want to call. As you enter each letter or number, a list of possible matches appears.
- 5 Tap the contact that you want to call.

### To Make an International Call

- 1 From your **Home screen**, tap .
- 2 Find and tap . The call log is displayed.
- 3 Tap .
- 4 Touch and hold 0 until a "+" sign appears.
- 5 Enter the country code, the area code without the initial zeros, followed by the phone number. Then tap .

### To Add a Direct Dial Number to Your Homescreen

- 1 Touch and hold an empty area on your Homescreen until the device vibrates and the customization menu appears.
- 2 In the customization menu, tap **Widgets** > **Shortcuts**.
- 3 Scroll through the list of applications and select **Direct dial**.
- 4 Select the contact and the number that you want to use as the direct dial number.

### Showing or hiding your phone number

You can select to show or hide your phone number on call recipients' devices when you call them.

### To Show or Hide Your Phone Number During Outgoing Calls

- 1 From the **Home screen**, tap .
- 2 Find and tap **Settings** > **Call** > **Additional settings** > **Caller ID**, and choose an option.

! This option may not be provided by every operator.

### Receiving calls

If you receive an incoming call when the device is in sleep mode or the screen is locked, the phone application opens in fullscreen format. If you receive an incoming call when the screen is active, the incoming call is displayed as a heads-up notification, that is, in a minimized window that floats at the top of whatever screen is open. When such a notification arrives, you can choose to answer the call and open the phone application screen, or you can reject the call and stay on the current screen.

### To Answer an Incoming Call when the Screen is Inactive

- Drag  to the right.

### To answer an incoming call when the screen is active

- In the heads-up notification that appears at the top of the screen, tap **ANSWER**.
- 💡 Instead of answering the call, you can go to the main phone application screen by tapping the upper part of the heads-up notification window. Using this method, you get more options to manage the call. For example, you can decide to reject the call with a message or forward the call to the answering machine.

### To Decline an Incoming Call when the Screen is Inactive

- When a call comes in, drag  to the left.

### To Reject an Incoming Call when the Screen is Active

- In the heads-up notification that appears at the top of the screen, tap **DECLINE**.
- 💡 Instead of rejecting the call, you can go to the main phone application screen by tapping the upper part of the heads-up notification window. Using this method, you get more options to manage the call. For example, you can decide to reject the call with a message .

### To mute the ringtone for an incoming call

- When you receive the call, press the volume key.

### Using the Answering Machine

You can use the answering machine application on your device to answer calls when you are busy or miss a call. You can enable the automatic answering function and specify how many seconds should pass before a call is answered automatically. You can also manually route calls to the answering machine when you are too busy to answer them. Later, you can listen to any messages left on your answering machine.

- ! Before using the answering machine, you must record a greeting message.

### To record a greeting message for the answering machine

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Call > Answering Machine > Greetings**.
- 3 Tap **Record new greeting** and follow the on-screen instructions.

### To Enable or Disable Automatic Answering

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Call > Answering Machine**.
- 3 Tap the **Answering Machine** slider.

 If you don't set a time delay for the automatic answering of calls, the default value is used.

### To set a time delay for automatic answering

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Call > Answering Machine**.
- 3 Tap **Pick up after**.
- 4 Adjust the time by scrolling up and down.
- 5 Tap **Done**.

### To Forward an Incoming Call to the Answering Machine

- When a call comes in, tap **Response options**, and then select **Reject with Answering Machine**.

 When a call comes in, you can also just wait until the preset time delay elapses so that the answering machine picks up the call automatically.

### To listen to messages on the answering machine

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Call > Answering Machine > Messages**.
- 3 Select the voice message you want to listen to.

 You can also listen to answering machine messages directly from the call log by tapping .

## Rejecting a call with a text message

You can reject a call with a text message. When you reject a call with such a message, the message is automatically sent to the caller and stored in the Messaging conversation with the contact.

You can select from a number of predefined messages available on your device, or you can create a new message. You can also create your own personalized messages by editing the predefined ones.

### To Reject a Call with a Text Message When the Screen Is Inactive

- 1 When an incoming call arrives, tap **Response options**.
- 2 Select a predefined message or tap **Write new message**.

### To Reject a Call with a Text Message When the Screen Is Active

- 1 When an incoming call arrives, tap the upper part of the heads-up notification window where the phone number or the name of the contact is displayed.
- 2 Tap **Response options**.
- 3 Select a predefined message or tap **Write new message**.

### To Reject a Second Call with a Text Message

- 1 When you hear repeated beeps during a call, tap **Response options**.
- 2 Select a predefined message or tap **Write new message**.

### To Edit the Text Message Used to Reject a Call

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Call** > **Reject call with message**.
- 3 Tap the message you want to edit, then make the necessary changes.
- 4 Tap **OK**.

## Ongoing calls

- |   |   |
|---|---|
| 1 | End a call  |
| 2 | Make a second call                                      |
| 3 | Put the current call on hold or retrieve a call on hold |
| 4 | Enter numbers during a call                             |
| 5 | Mute the microphone during a call                       |
| 6 | Turn on the loudspeaker during a call                   |

### To change the ear speaker volume during a call

- Press the volume key up or down.

## Using the call log

In the call log, you can view missed calls , received calls  and dialed calls .

### To Open the Call Log

- 1 From your Homescreen, tap .
- 2 Find and tap .

### To view your missed calls

- 1 When you have missed a call,  appears in the status bar. Drag the status bar downwards.
- 2 Tap **Missed call**.

### To Call a Number from Your Call Log

- 1 From your **Home screen**, tap .
- 2 Find and tap . The call log is displayed.
- 3 To call a number directly from the call log, tap the number. To edit a number before calling, touch and hold the number, then tap **Edit number before call**.

### To Add a Number from the Call Log to Your Contacts

- 1 From your Homescreen, tap .
- 2 Find and tap .
- 3 Touch and hold a number displayed in the call log, and then tap **Add to Contacts**.
- 4 Select an existing contact to add the number to, or tap **Create new contact**.
- 5 Edit the contact details, and then tap **SAVE**.

### To View Call Log Options

- 1 From your **Home screen**, tap .
  - 2 Find and tap .
  - 3 Tap .
-  You can also access general call settings by following the steps above.

## Forwarding Calls

You can direct calls to a different recipient, such as to another phone number, another device, or an answering service.

### To Forward Calls

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Call**.
- 3 Tap **Call forwarding** and select an option.
- 4 Enter the number you want to forward calls to, then tap **Turn on**.

### To Turn Off Call Forwarding

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Call > Call forwarding**.
- 3 Select an option, then tap **Turn off**.

## Restricting Calls

You can block all or certain categories of incoming and outgoing calls. If you have received a PIN2 code from your service provider, you can also use a list of Fixed Dialing Numbers (FDNs) to restrict outgoing calls. If your subscription includes a voicemail service, you can send all incoming calls from a specific contact directly to voicemail. If you want to block a certain number, you can go to Google Play™ and download applications that support this function.

-  FDN is not supported by all network operators. Contact your network operator to verify if your SIM card or network service supports this feature.

### To Block Incoming or Outgoing Calls

- 1 From your **Home screen**, tap .
  - 2 Find and tap **Settings > Call**.
  - 3 Tap **Call Barring**, and then select an option.
  - 4 Enter the password and tap **Turn on**.
-  When you set up call barring for the first time, you need to enter a password. You must use this same password later if you want to edit call barring settings.

### To Enable or Disable Fixed Dialing

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Call > Fixed dialing numbers**.
- 3 Tap **Activate fixed dialing** or **Deactivate fixed dialing**.
- 4 Enter your PIN2 and tap **OK**.

### To Access the List of Accepted Call Recipients

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Call**.
- 3 Tap **Fixed dialing numbers > Fixed dialing numbers**.

### To Change the SIM Card PIN2

- 1 From the **Home screen**, tap .
- 2 Find and tap **Settings > Call**.
- 3 Tap **Fixed dialing numbers > Change PIN2**.
- 4 Enter the old SIM card PIN2 and tap **OK**.
- 5 Enter the new SIM card PIN2 and tap **OK**.
- 6 Confirm the new PIN2 and tap **OK**.

### To Send Incoming Calls from a Specific Contact Directly to Voicemail

- 1 From your **Home screen**, tap .
- 2 Find and tap .
- 3 Select the desired contact.
- 4 Tap  > .
- 5 Mark the checkbox beside **All calls to voicemail**.
- 6 Tap **SAVE**.

## Multiple calls

If you have activated call waiting, you can handle multiple calls at the same time. When it is activated, you will be notified by a beep if you receive another call.

### To Activate or Deactivate Call Waiting

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Call > Additional settings**.
- 3 To activate or deactivate call waiting, tap **Call waiting**.

### To Answer a Second Call and Put the Ongoing Call on Hold

- 1 When you hear repeated beeps during a call, drag  to the right.
- 2 Tap **Hold call**.

### To reject a second call

- When you hear repeated beeps during a call, drag  to the left.

### To Make a Second Call

- 1 During an ongoing call, tap . The call log is displayed.
- 2 Tap  to display the dialpad.
- 3 Enter the number of the recipient and tap . The first call is put on hold.

### To Switch Between Multiple Calls

- To switch to another call and put the current call on hold, tap **On hold**.

## Conference calls

With a conference or multiparty call, you can have a joint conversation with two or more people.

- ! For details about the number of participants that you can add to a conference call, contact your network operator.

### To Make a Conference Call

- 1 During an ongoing call, tap . The call log appears.
- 2 To display the dialpad, tap .
- 3 Dial the number of the second participant and tap . The first participant is put on hold temporarily.
- 4 To add the second participant to the call and start the conference call, tap .
- 5 To add more participants to the call, repeat the relevant steps as described above.

### To Have a Private Conversation with a Conference Call Participant

- 1 During an ongoing conference call, tap **Manage conference**.
- 2 Tap the telephone number of the participant you want to have a private conversation with.
- 3 To end the private conversation and return to the conference call, tap .

### To release a participant from a conference call

- 1 During an ongoing conference call, tap **Manage conference**.
- 2 Tap  next to the participant you want to release.

### To End a Conference Call

- During the conference call, tap .

## Voicemail

If your subscription includes a voicemail service, callers can leave voice messages for you when you can't answer calls. Your voicemail service number is normally saved on your SIM card. If not, you can get the number from your service provider and enter it manually.

### To Enter Your Voicemail Number

- 1 From the **Home screen**, tap .
- 2 Find and tap **Settings > Call > Voicemail > Voicemail settings > Voicemail number**.
- 3 Enter your voicemail number.
- 4 Tap **OK**.

### To call your voicemail service

- 1 From your Homescreen, tap .
- 2 Find and tap **Phone**. The call log is displayed.
- 3 Tap  to display the dialpad.
- 4 Touch and hold **1**.

## Emergency calls

Your device supports international emergency numbers, for example, 112 or 911. You can normally use these numbers to make emergency calls in any country, with or without a SIM card inserted if you are within range of a network.

### To Make an Emergency Call

- 1 From your Homescreen, tap .
- 2 Find and tap **Phone**. The call log is displayed.
- 3 Tap  to display the dialpad.
- 4 Enter the emergency number, then tap .

- 💡 You can make emergency calls even when no SIM card is inserted or when all outgoing calls are blocked.

### To Make an Emergency Call while the SIM Card is Locked

- 1 Tap **Emergency call**.
- 2 Enter the emergency number and tap .

### To Make an Emergency Call while the Screen Is Locked

- 1 If the active screen lock type is **Swipe**, tap  to display the dialpad, then enter the emergency number and tap .
- 2 If your screen is locked with a pattern, PIN or password, tap **Emergency call**, then enter the emergency number and tap .

# Contacts

## Transferring contacts

There are several ways to transfer contacts to your new device. You can sync contacts from an online account or import contacts directly from another device.

### Transferring Contacts Using a Computer

Xperia™ Transfer is an application that helps you to collect contacts from your old device and transfer them to your new device. Xperia™ Transfer, which you can access from within the Xperia™ Companion software, supports mobile devices that run on iOS/iCloud and Android™. If you are switching from an iOS device, the App Matching feature suggests the Android equivalents of your iOS apps.

To use Xperia™ Transfer, you need:

- An Internet-connected computer.
  - Your new Android™ device.
  - A USB cable for your new Android™ device.
  - Your old device.
  - A USB cable for your old device.
- 💡 You may not need your old device. For iOS devices, you can connect directly to iCloud or use a local backup. For previously owned Sony devices, you can use local backups.

#### To Transfer Contacts to Your New Device

- 1 Search for and download Xperia™ Companion for Windows at <http://support.sonymobile.com/tools/xperia-companion/> or Xperia™ Companion for Mac at <http://support.sonymobile.com/tools/xperia-companion-mac/> if the software is not already installed.
- 2 Using a USB cable, connect your device to the computer.
- 3 After successful installation, open the Xperia™ Companion software if it is not automatically launched, and then click *Xperia™ Transfer* and follow the relevant instructions to transfer your contacts.

### Transferring contacts using an online account

If you sync the contacts in your old device or your computer with an online account, for example, Google Sync™, Facebook™, or Microsoft® Exchange ActiveSync®, you can transfer your contacts to your new device using that account.

#### To synchronize contacts to your new device using a synchronization account

- 1 From your Homescreen, tap , then tap .
  - 2 Tap , then tap **Settings > Accounts & sync**.
  - 3 Select the account that you want to sync your contacts with, then tap  > **Sync now**.
- ! You need to be signed in to the relevant sync account before you can sync your contacts with it.

### Other methods for transferring contacts

There are several other ways to transfer contacts from your old device to your new device. For example, you can copy contacts to a memory card, use Bluetooth® technology, or save contacts to a SIM card. For more specific information about transferring the contacts from your old device, refer to the relevant User guide.

### To import contacts from a memory card

- 1 From your Homescreen, tap , then tap .
- 2 Press , then tap **Import contacts** > **SD card**.
- 3 Select where to store your contacts.
- 4 Select the files that you want to import and tap **OK**.

### To import contacts using Bluetooth® technology

- 1 Make sure you have the Bluetooth® function turned on and that your device is set to visible.
- 2 When you are notified of an incoming file to your device, drag the status bar downward and tap the notification to accept the file transfer.
- 3 Tap **Accept** to start the file transfer.
- 4 Drag the status bar downward. When the transfer is complete, tap the notification.
- 5 Tap the received file and select where to store your contacts.

### To import contacts from a SIM card

- ! You may lose information or get multiple contact entries if you transfer contacts using a SIM card.
- 1 From your Homescreen, tap , then tap .
  - 2 Tap , then tap **Import contacts** > **SIM card**.
  - 3 Select where to store your contacts.
  - 4 To import an individual contact, find and tap the contact. To import all contacts, tap **Import all**.

## Searching and viewing contacts

- 1 Search for contacts
- 2 View more options
- 3 Contacts, Favorites, and Groups tabs
- 4 Edit and view medical and emergency contact information
- 5 View contact details
- 6 Jump to contacts starting with the selected letter
- 7 Add a contact

### To search for a contact

- 1 From your Homescreen, tap , then tap .
- 2 Tap  and enter a phone number, name, or other information in the **Search contacts** field. The result list is filtered as you enter each character.

### To select which contacts to display in the Contacts application

- 1 From your Homescreen, tap , then tap .
- 2 Press , then tap **Filter**.
- 3 In the list that appears, mark or unmark the desired options. If you have synchronized your contacts with a synchronization account, that account appears in the list. To further expand the list of options, tap the account.

## Adding and editing contacts

### To Add a Contact

- 1 From your Homescreen, tap , then tap .
  - 2 Tap .
  - 3 If you have synchronized your contacts with one or more accounts and you are adding a contact for the first time, you must select the account you want to add this contact to. Alternately, tap **No backup** if you only want to use and save this contact on your device.
  - 4 Enter or select the desired information for the contact.
  - 5 When you are done, tap **SAVE**.
- ! After you select a synchronization account in step 3, that account will show as the default account offered the next time you add a contact. When you save a contact to a particular account, that account will show as the default account to save to the next time you add a contact. If you have saved a contact to a particular account and want to change it, you need to create a new contact and select a different account to save them to.
- 💡 If you add a plus sign and the country code before a contact's phone number, you do not have to edit the number again when you make calls from other countries.

### To Edit a Contact

- 1 From your Homescreen, tap , then tap .
  - 2 Tap the contact that you want to edit, then tap .
  - 3 Edit the desired information.
  - 4 When you are done, tap **SAVE**.
- ! Some synchronization services do not allow you to edit contact details.

### To Associate a Picture with a Contact

- 1 From your Homescreen, tap , then tap .
  - 2 Tap the contact that you want to edit, then tap .
  - 3 Tap , then select a method for adding the contact picture and edit as desired.
  - 4 After you add the picture, tap **SAVE**.
- 💡 You can also add a picture to a contact directly from the **Album** application. If you want to add a picture that is saved to an online account, you must download the picture first.

### To Personalize the Ringtone for a Contact

- 1 From your **Home screen**, tap , and then tap .
- 2 Tap the contact that you want to edit, and then tap .
- 3 Tap  > **Set ringtone**.
- 4 Select an option from the list or tap  to select a music file saved on your device, and tap **Done**.
- 5 Tap **SAVE**.

### To Delete Contacts

- 1 From your Homescreen, tap , then tap .
- 2 Touch and hold the contact you want to delete.
- 3 To delete all contacts, tap the downward arrow to open the drop-down menu, then select **Mark all**.
- 4 Tap , then tap **Delete**.

### To Edit Contact Information about Yourself

- 1 From your Homescreen, tap , then tap .
- 2 Tap **Myself**, then tap .
- 3 Enter the new information or make the changes you want.
- 4 When you are done, tap **SAVE**.

### To Create a New Contact from a Text Message

- 1 From your Homescreen, tap , and then find and tap .
- 2 Tap the icon next to the phone number, and then tap **Save**.
- 3 Select an existing contact, or tap **Create new contact**.
- 4 Edit the contact information and tap **SAVE**.

## Adding medical and emergency contact information

You can add and edit ICE (In Case of Emergency) information in the Contacts application. You can enter medical details, such as allergies and medications that you are using, plus information about relatives and friends who can be contacted in case of an emergency. After setup, your ICE information can be accessed from the security lockscreen. This means that even if the screen is locked, for example, by a PIN, pattern, or password, emergency personnel can still retrieve your ICE information.

- 1 Go back to the main Contacts screen
- 2 View more options
- 3 Show your medical and personal information as part of the ICE information
- 4 Medical information
- 5 ICE contact list
- 6 Create new ICE contacts
- 7 Use existing contacts as ICE contacts

### To show your medical and personal information as part of the ICE information

- 1 From your Homescreen, tap , then tap .
- 2 Tap **ICE – In Case of Emergency**.
- 3 Tap , then mark the **Show personal information** checkbox.

### To Enter Your Medical Information

- 1 From your Homescreen, tap , then tap .
- 2 Tap **ICE – In Case of Emergency**.
- 3 Tap , then tap **Edit medical info**.
- 4 Edit the desired information.
- 5 When you are done, tap **SAVE**.

### To Add a New ICE Contact

- 1 From your Homescreen, tap , then tap .
  - 2 Tap **ICE – In Case of Emergency**, then tap .
  - 3 If you have synchronized your contacts with one or more accounts and you are adding a contact for the first time, you must select the account you want to add this contact to. Alternately, tap **No backup** if you only want to use and save this contact on your device.
  - 4 Enter or select the desired information for the contact.
  - 5 When you are done, tap **SAVE**.
- ! The ICE contact must have at least a phone number which emergency personnel can call. If your device is locked by a security screen lock, emergency personnel can only see the phone number of the ICE contact, even if there is other information entered in the Contacts application about the contact.

### To Use Existing Contacts as ICE Contacts

- 1 From your Homescreen, tap , then tap .
  - 2 Tap **ICE – In Case of Emergency**, then tap .
  - 3 Mark the contacts you want to use as ICE contacts.
  - 4 When you are done, tap **Done**.
- ! The ICE contacts you select must have a phone number emergency personnel can call, as a minimum. If your device is locked by a security screen lock, emergency personnel can only see the phone number of the ICE contacts, even if there is other information entered in the Contacts application about the contacts.

### To make your ICE information visible from the security lockscreen

- 1 From your Homescreen, tap , then tap .
  - 2 Tap **ICE – In Case of Emergency**.
  - 3 Tap , then tap **Settings**.
  - 4 Mark the **ICE in lock screen** checkbox.
- ! Your ICE information is visible from the security lockscreen by default.

### To Enable Calls to ICE Contacts from the Security Lockscreen

- 1 From your **Home screen**, tap , and then tap .
  - 2 Tap **ICE – In Case of Emergency**.
  - 3 Tap , and then tap **Settings**.
  - 4 Mark the **Enable call in ICE** checkbox.
- ! Some networks or service providers may not support ICE calls.

## Favorites and groups

Contacts that you mark as favorites appear under the favorites tab in the Contacts application along with your most frequently called contacts or "top contacts". This way you get quicker access to these contacts. You can also assign contacts to groups, to get quicker access to a group of contacts from within the Contacts application.

### To mark or unmark a contact as a favorite

- 1 From the Homescreen, tap , then tap .
- 2 Tap the contact you want to add to or remove from your favorites.
- 3 Tap .

### To View Your Favorite Contacts

- 1 From your Homescreen, tap , then tap .
- 2 Tap **Favorites**.

### To Assign a Contact to a Group

- 1 In the Contacts application, tap the contact that you want to assign to a group.
- 2 Tap , then tap the bar directly under **Groups**.
- 3 Mark the checkboxes for the groups you want to add the contact to.
- 4 Tap **SAVE**.

## Sending contact information

### To Send Your Business Card

- 1 From your Homescreen, tap , then tap .
- 2 Tap **Myself**.
- 3 Tap , then tap **Share**.
- 4 Select an available transfer method and follow the on-screen instructions.

### To Send a Contact

- 1 From your Homescreen, tap , then tap .
- 2 Tap the contact whose details you want to send.
- 3 Tap , then tap **Share**.
- 4 Select an available transfer method and follow the on-screen instructions.

### To send several contacts at once

- 1 From your Homescreen, tap , then tap .
- 2 Press , then tap **Mark several**.
- 3 Mark the contacts you want to send, or select all if you want to send all contacts.
- 4 Tap , then select an available transfer method and follow the on-screen instructions.

## Avoiding duplicate entries in the Contacts application

If you synchronize your contacts with a new account or import contact information in other ways, you could end up with duplicate entries in the Contacts application. If this happens, you can join such duplicates to create a single entry. And if you join entries by mistake, you can separate them again later.

### To link contacts

- 1 From your Homescreen, tap , then tap .
- 2 Tap the contact that you want to link with another contact.
- 3 Press , then tap **Link contact**.
- 4 Tap the contact whose information you want to join with the first contact, then tap **OK** to confirm. The information from the first contact is merged with the second contact, and the linked contacts are displayed as one contact in the Contacts list.

### To separate linked contacts

- 1 From your Homescreen, tap , then tap .
- 2 Tap the linked contact that you want to edit, then tap .
- 3 Tap **Unlink contact** > **Unlink**.

## Backing up Contacts

You can use internal storage, a memory card, or a SIM card to back up contacts. See *Transferring contacts* on page 77 for more information about how to restore contacts to your device.

### To export all contacts to a memory card

- 1 From your Homescreen, tap , then tap .
- 2 Press , then tap **Export contacts** > **SD card**.
- 3 Tap **OK**.

### To export contacts to a SIM card

- ! When you export contacts to a SIM card, not all information may get exported. This is due to memory limitations on SIM cards.
- 1 From your Homescreen, tap , then tap .
- 2 Press , then tap **Export contacts > SIM card**.
- 3 Mark the contacts you want to export, or tap **Mark all** if you want to export all your contacts.
- 4 Tap **Export**.
- 5 Select **Add contacts** if you want to add the contacts to existing contacts on your SIM card, or select **Replace all contacts** if you want to replace the existing contacts on your SIM card.

# Messaging and chat

## Reading and sending messages

The Messaging application shows your messages as conversations, which means that all messages to and from a particular person are grouped together. To send multimedia messages, you need the correct MMS settings on your device. See *Internet and MMS settings* on page 44.

- ! The number of characters that you can send in a single message varies depending on the operator and the language you use. The maximum size of a multimedia message, which includes the size of added media files, is also operator dependent. Contact your network operator for more information.

- 1 Go back to the list of conversations
- 2 Call the message sender
- 3 View more options
- 4 Sent and received messages
- 5 Send a completed message
- 6 Add attachments

### To Create and Send a Message

- 1 From your Homescreen, tap , then find and tap .
  - 2 Tap .
  - 3 Enter the recipient's name or phone number, or other contact information that you have saved about the recipient, then select from the list that appears. If the recipient is not listed as a contact, enter the recipient's number manually.
  - 4 If you want to send a group message, repeat the procedure described above to add more recipients.
  - 5 Tap **Write message** and enter your message text.
  - 6 If you want to add an attachment, select the relevant attachment option.
  - 7 To send the message, tap .
- 💡 If you exit a message before sending, it gets saved as a draft. The conversation gets tagged with the word **Draft**.

### To read a received message

- 1 From your Homescreen, tap , then find and tap .
  - 2 Tap the desired conversation.
  - 3 If the message is not yet downloaded, tap and hold the message, then tap **Download message**.
- 💡 All received messages are saved by default to the device memory.

### To Reply to a Message

- 1 From your Homescreen, tap , then find and tap .
- 2 Tap the conversation containing the message.
- 3 Enter your reply and tap .

### To Forward a Message

- 1 From your Homescreen, tap , then find and tap .
- 2 Tap the conversation containing the message you want to forward.
- 3 Touch and hold the message you want to forward, then tap **Forward message**.
- 4 Enter the recipient's name or phone number, or other contact information that you have saved about the recipient, then select from the list that appears. If the recipient is not listed as a contact, enter the recipient's number manually.
- 5 Edit the message, if necessary, then tap .

### To save a file contained in a message you receive

- 1 From your Homescreen, tap , then find and tap .
- 2 Tap the conversation you want to open.
- 3 If the message has not been downloaded yet, tap and hold the message, then tap **Download message**.
- 4 Touch and hold the file you want to save, then select the desired option.

## Organizing your messages

### To delete a message

- 1 From your Homescreen, tap , then find and tap .
- 2 Tap the conversation containing the message you want to delete.
- 3 Touch and hold the message you want to delete, then tap **Delete message** > **Delete**.

### To delete conversations

- 1 From your Homescreen, tap , then find and tap .
- 2 Tap , then tap **Delete conversations**.
- 3 Mark the checkboxes for the conversations that you want to delete, then tap  > **Delete**.

### To Star a Message

- 1 From your Homescreen, tap , then find and tap .
- 2 Tap the conversation you want to open.
- 3 Touch and hold the message you want to star, then tap **Add star**.
- 4 To unstar a message, touch and hold the starred message, then tap **Delete star**.

### To view starred messages

- 1 From your Homescreen, tap , then find and tap .
- 2 Tap , then tap **Starred messages**.
- 3 All starred messages appear in a list.

### To Search for Messages

- 1 From your Homescreen, tap , then find and tap .
- 2 Tap .
- 3 Enter your search keywords. The search results appear in a list.

## Calling from a message

### To Call a Message Sender

- 1 From your Homescreen, tap , and then find and tap .
- 2 Tap a conversation, and then tap .

### To Save a Sender's Number as a Contact

- 1 From your Homescreen, tap , and then find and tap .
- 2 Tap the icon next to the phone number, and then tap **Save**.
- 3 Select an existing contact, or tap **Create new contact**.
- 4 Edit the contact information and tap **Save**.

## Messaging settings

### To Change Your Message Notification Settings

- 1 From your **Home screen**, tap , and then find and tap .
- 2 Tap , and then tap **Settings**.
- 3 To set a notification sound, tap **Notification sound**, and then select an option or tap  and select a music file that is saved on your device.
- 4 To confirm, tap **Done**.
- 5 To adjust additional notification settings, tap the sliders.

### To Enable or Disable Delivery Reports for Outgoing Messages

- 1 From your **Home screen**, tap , and then find and tap .
  - 2 Tap , and then tap **Settings**.
  - 3 Tap the **Delivery report** slider to enable or disable the function.
- ! After delivery reports are turned on, a check mark is displayed in messages that have been successfully delivered.

## Instant Messaging and Video Chat

You can use the Google Hangouts™ instant messaging and video chat application on your device to chat with friends who also use the application on computers, Android™ devices, and other devices. You can turn any conversation into a video call with several friends, and you can send messages to friends even when they are offline. You can also view and share photos easily.

Hangouts™ requires internet access and a Google™ account. Go to <http://support.google.com/hangouts> and click the "Hangouts on your Android" link for more detailed information about how to use this application.

- ! The video call function only works on devices with a front camera.

### To use the Hangouts™ application

- 1 From your Homescreen, tap .
- 2 Find and tap **Hangouts**.

# Email

## Setting Up Email

Use the email application on your device to send and receive email messages through your email accounts. You can have one or several email accounts at the same time, including corporate Microsoft Exchange ActiveSync accounts.

### To set up an email account

- 1 From your Homescreen, tap .
  - 2 Find and tap **Email**.
  - 3 Follow the instructions that appear on the screen to complete the setup.
- 💡 For some email services, you may need to contact your email service provider for information on detailed settings for the email account.

### To add an extra email account

- 1 From your Homescreen, tap .
- 2 Find and tap **Email**.
- 3 Tap , then tap **Settings > Add account**.
- 4 Enter the email address and password, then tap **Next**. If the settings for the email account cannot be downloaded automatically, complete the setup manually.
- 5 When you are finished, tap **Next**.

## Sending and Receiving Email Messages

- 1 View a list of all email accounts and recent folders
- 2 Search for email messages
- 3 Access settings and options
- 4 List of email messages
- 5 Write an email message

### To download new email messages

- When the email inbox is open, swipe downward on the message list.
- ! Before trying to download new email messages, make sure you have a working data connection. For more information about ensuring successful data connections, see *Internet and MMS settings* on page 44.

### To Read Your Email Messages

- 1 From your Homescreen, tap .
- 2 Find and tap **Email**.
- 3 If you are using several email accounts, drag the left edge of the screen to the right and select the account you want to check. If you want to check all your email accounts at once, drag the left edge of the screen to the right, then tap **Combined inbox**.
- 4 In the email inbox, scroll up or down and tap the email message that you want to read.

### To Create and Send an Email Message

- 1 From your Homescreen, tap , and then find and tap **Email**.
- 2 If you are using several email accounts, tap  and select the account you want to send the email from.
- 3 Tap , and then type the recipient's name or email address and select one or more recipients from the drop-down list.
- 4 Enter the email subject and message text, and then tap .

### To reply to an email message

- 1 In your email inbox, find and tap the message that you want to reply to, then tap **Reply** or **Reply all**.
- 2 Enter your reply, then tap .

### To Forward an Email Message

- 1 In your email inbox, find and tap the message that you want to forward, then tap **Forward**.
- 2 Enter the recipient's name or email address, then select one or more recipients from the drop-down list.
- 3 Enter your message text, then tap .

### To view an email message attachment

- 1 Find and tap the email message containing the attachment that you want to view. Email messages with attachments are indicated by .
- 2 After the email message opens, tap **Load**. The attachment starts to download.
- 3 After the attachment finishes downloading, tap **View**.

### To Save a Sender's Email Address to Your Contacts

- 1 Find and tap a message in your email inbox.
- 2 Tap the name of the sender, tap **Add to Contacts** then tap **OK**.
- 3 Select an existing contact, or tap **Create new contact**.
- 4 Edit the contact information, if desired, then tap **Save**.

## Organizing your email messages

### To Sort your Email

- 1 From your Homescreen, tap .
- 2 Find and tap **Email**.
- 3 If you are using several email accounts, tap  and select the account with the inbox you want to sort. If you want to sort email in all your email accounts at once, tap , and then tap **Combined inbox**.
- 4 Tap , and then tap **Sort**.
- 5 Select a sorting option.

### To Search for Emails

- 1 From your Homescreen, tap , and then find and tap **Email**.
- 2 If you are using several email accounts, tap  and select the account you want to search. If you want to search all your email accounts at once, tap , and then tap **Combined inbox**.
- 3 Tap **Q**.
- 4 Enter your search text, and then tap **Q** on the keyboard.
- 5 The search result appears in a list sorted by date. Tap the email message you want to open.

### To View All Folders for One Email Account

- 1 From your Homescreen, tap , and then find and tap **Email**.
- 2 Tap , and then select the account you want to check.
- 3 Under the account you want to check, select **Show all folders**.

### To delete an email message

- In your email inbox, flick the message that you want to delete to the right.

### To move an email message to another folder

- 1 In your email inbox, flick the message that you want to move to the left.
- 2 Tap **Move**, then select a folder.

## Email account settings

### To remove an email account from your device

- 1 From your Homescreen, tap .
- 2 Find and tap **Email**.
- 3 Press , then tap **Settings**.
- 4 Select the account you want to remove.
- 5 Tap **Delete account** > **OK**.

### To change the inbox check frequency

- 1 From your Homescreen, tap .
- 2 Find and tap **Email**.
- 3 Tap , then tap **Settings**.
- 4 Select the account for which you want to change the inbox check frequency.
- 5 Tap **Check frequency** > **Check frequency** and select an option.

### To set an Out of Office auto-reply in an Exchange Active Sync account

- 1 From your Homescreen, tap , then find and tap **Email**.
- 2 Press , then tap **Settings**.
- 3 Select the EAS (Exchange Active Sync) account for which you want to set an Out of Office auto-reply.
- 4 Tap **Out of office**.
- 5 Drag the slider beside **Out of office** to the right to turn on the function.
- 6 If needed, mark the **Set time range** checkbox and set the time range for the auto reply.
- 7 Enter your Out of Office message in the body text field.
- 8 Tap **OK** to confirm.

## Gmail™

If you have a Google™ account, you can use the Gmail™ application to read and write email messages.

1 View a list of all Gmail accounts and folders

2 Search for email messages

3 List of email messages

4 Write an email message

### To Learn More about Gmail™

- When the Gmail application is open, tap ≡, and then find and tap **Help**.

# Music

## Transferring Music to Your Device

There are different ways to transfer music from a computer to your device:

- You can transfer music files between your device and a computer using the provided USB cable. After connecting, select **Transfer files (MTP)** on your device and then simply copy and paste or drag and drop the files using the computer. See *Managing Files Using a Computer* on page 37.
  - You can use the Xperia™ Companion software to transfer your media files between the computer and your device. Learn more and download Xperia™ Companion for Windows at <http://support.sonymobile.com/tools/xperia-companion/> or Xperia™ Companion for Mac at <http://support.sonymobile.com/tools/xperia-companion-mac/>.
- ! The Music application may not support all music file formats. For more information about supported file formats and the use of multimedia (audio, image, and video) files, download the White Paper for your device at [www.sonymobile.com/support/](http://www.sonymobile.com/support/).

## Listening to Music

Use the Music application to listen to your favorite music and audiobooks.

- |    |  |
|----|--|
| 1  | Minimize the full-screen player  |
| 2  | Search all songs saved to your device  |
| 3  | View the current play queue  |
| 4  | Album art (if available)   |
| 5  | Progress indicator – drag the indicator or tap along the line to fast forward or rewind              |
| 6  | Elapsed time of current song   |
| 7  | Total length of current song   |
| 8  | Repeat all songs in the current play queue   |
| 9  | Tap to go to the next song in the play queue, touch and hold to fast-forward within the current song |
| 10 | Play or pause a song   |
| 11 | Tap to go to the previous song in the play queue, touch and hold to rewind within the current song   |
| 12 | Shuffle songs in the current play queue  |

## Music Homescreen

- 1 Tap ≡ in the top-left corner to open the Music menu
- 2 Scroll up or down to view content
- 3 Play a song using the Music application
- 4 Play all songs in shuffle mode
- 5 Return to the music player screen

### To Play a Song Using the Music Application

- 1 From your Homescreen, tap , and then find and tap .
- 2 Tap ≡.
- 3 Select a music category.
- 4 Tap a song to play it.

- ! You might not be able to play copyright-protected items. Verify that you have the necessary rights to the material you intend to share.

### To Find Song-Related Information Online

- While a song is playing in the Music application, tap the Album art, then tap **More about this**.
- 💡 Online resources related to the song can include videos on YouTube™, song lyrics, and artist information on Wikipedia.

### To edit music information and download album art

- 1 From the Music application, tap the Album art, and then tap **Edit music info**.
  - 2 Edit the information as desired.
  - 3 To set or download album art, tap , then select an option.
  - 4 When you are done, tap **SAVE**.
- 💡 You can also set album art to download automatically in the Music menu, under Settings.

### To adjust the audio volume

- Press the volume key.

### To Minimize the Music Application

- When a song is playing, tap  to go to the Homescreen. The Music application keeps running in the background.

### To Open the Music Application when it is Playing in the Background

- While a song is playing in the background, drag the status bar downward and tap the Music application.
- Alternatively, from your Homescreen, tap , and then find and tap .

## Music Menu

The Music menu gives you an overview of all the songs on your device. From here, you can manage your albums and playlists.

- |    |   |
|----|---|
| 1  | Return to the Music homescreen                    |
| 2  | View the current play queue                       |
| 3  | Browse all artists                                |
| 4  | Browse all albums                                 |
| 5  | Browse all songs                                  |
| 6  | Browse all folders                                |
| 7  | Browse all playlists                              |
| 8  | Play a shared music file stored on another device |
| 9  | View all subscribed or downloaded podcasts        |
| 10 | Open the settings menu for the Music application  |
| 11 | Open the support menu for the Music application   |

### To Open the Music Menu

- 1 From your Homescreen, tap , and then find and tap .
- 2 Tap .

### To Return to the Music Homescreen

- When the Music menu is open, tap **Home**.
- When the Music menu is open, tap on the screen to the right of the menu.

### To Delete a Song

- 1 From the Music menu, browse to the song you want to delete.
- 2 Touch and hold the song title, and then tap **Delete** in the list that appears.
- 3 Tap **Delete** again to confirm.

## Playlists

On the Music homescreen, you can create your own playlists from the music that is saved on your device.

### To Create Your Own Playlists

- 1 From the Music homescreen, touch and hold the name of the album or song that you want to add to a playlist.
  - 2 In the menu that opens, tap **Add to playlist** > **Create new playlist**.
  - 3 Enter a name for the playlist and tap **OK**.
- 💡 You can also open the Music homescreen menu, tap **Playlists**, and then tap **+** to create a new playlist.

### To Play Your Own Playlists

- 1 Open the Music menu, and then tap **Playlists**.
- 2 Under **Playlists**, select the playlist you want to open.
- 3 If you want to play all songs, tap any song or **Shuffle all**.

### To Add Songs to a Playlist

- 1 From the Music homescreen, browse to the song or album that you want to add to a playlist.
- 2 Touch and hold the song or the album title, then tap **Add to playlist**.
- 3 Tap the name of the playlist you want to add the album or song to. The album or song is now added to the playlist.

### To remove a song from a playlist

- 1 In a playlist, touch and hold the title of the song that you want to delete.
  - 2 Tap **Remove from playlist**.
- ! You might not be able to delete a song that is saved on the memory card or on your device's internal storage.

### To Delete a Playlist

- 1 Open the Music menu, and then tap **Playlists**.
  - 2 Touch and hold the playlist you want to delete.
  - 3 Tap **Delete**.
  - 4 Tap **Delete** again to confirm.
- ! You cannot delete smart playlists.

## Sharing music

### To share a song

- 1 From the Music homescreen, browse to the song or album that you want to share.
  - 2 Touch and hold the song title, then tap **Share**.
  - 3 Select an application from the list, then follow the on-screen instructions.
- 💡 You can also share albums and playlists in the same way.

## Enhancing the sound

### To Improve the Sound Quality Using the Equalizer

- 1 Open the Music menu, and then tap **Settings > Audio settings > Sound effects > Equalizer**.
- 2 To adjust the sound manually, drag the frequency band buttons up or down. To adjust the sound automatically, tap  and select a style.

### To Turn On the Surround Sound Feature

- 1 Open the Music menu, and then tap **Settings > Audio settings > Sound effects > Surround sound (VPT)**.
- 2 Flick left or right to select a setting, and then tap **OK** to confirm.

## Recognizing Music with TrackID™

Use the TrackID™ music recognition service to identify a song you hear playing in your surroundings. Just record a short sample of the song and you'll get artist, title, and album info within seconds. You can purchase tracks identified by TrackID™ and you can view TrackID charts to see what TrackID users around the globe are searching for. For best results, use TrackID™ in a quiet area.

- 1 Search for tracks, albums, and artists
- 2 Create an online TrackID™ profile
- 3 View current music charts
- 4 View TrackID™ options
- 5 View the history of your previous searches
- 6 Check out what others are tracking
- 7 Identify the music you're listening to

- ! The TrackID™ application and some features of the TrackID™ service may not be supported in all countries or regions or by all networks or service providers. TrackID™ can be connected to music streaming services available in your country.

### To Identify Music Using TrackID™ Technology

- 1 From your Homescreen, tap .
- 2 Find and tap **TrackID™**, then hold your device close to the music source.
- 3 Tap . If the song is recognized by the TrackID™ service, the results appear on the screen.

- 💡 To return to the **TrackID™** start screen, tap .

### To View Artist Information for a Song

- 1 After a song is recognized by the **TrackID™** application, the result is displayed on the TrackID™ homescreen.
- 2 Scroll to the result you want to view and then tap to open it.

### To Delete a Song from the Track History

- 1 Open the **TrackID™** application, then browse to the song that you want to delete.
- 2 Touch and hold the screen to make  appear.
- 3 Tap .

### To Use TrackID™ LIVE

You can use TrackID™ LIVE to see real-time LIVE trackings from around the world. There are two ways to start TrackID™ LIVE:

- Tap the map on the TrackID™ homescreen.
  - Or press , then tap TrackID™ LIVE.
- 💡 You can change how fast you want to get the trackings and you can mute or unmute the song previews.

# FM radio

## Listening to the radio

The FM radio in your device works like any FM radio. For example, you can browse and listen to FM radio stations and save them as favorites. You must connect a wired headset or headphones to your device before you can use the radio. This is because the headset or headphones act as an antenna. After one of these devices is connected, you can then switch the audio to the speaker, if desired.

- 1 Favorites list
- 2 Radio on/off button
- 3 View menu options
- 4 Tuned frequency
- 5 Save or remove a channel as a favorite
- 6 Tuning dial
- 7 Frequency band – drag left or right to move between channels
- 8 Move up the frequency band to search for a channel
- 9 A saved favorite channel
- 10 Move down the frequency band to search for a channel

### To listen to the FM radio

- 1 Connect a headset or a set of headphones to your device.
  - 2 From your Homescreen, tap .
  - 3 Find and tap **FM radio** . The available channels appear as you scroll through the frequency band.
- ! When you start the FM radio, available channels appear automatically. If a channel has RDS information, it appears a few seconds after you start listening to the channel.

### To move between radio channels

- Drag the frequency band left or right.

### To start a new search for radio channels

- 1 When the radio is open, tap .
- 2 Tap **Search for channels**. The radio scans the whole frequency band and marks all available channels.

### To switch the radio sound to the speaker

- 1 When the radio is open, press ⋮.
  - 2 Tap **Play in speaker**.
- 💡 To switch the sound back to the wired headset or headphones, press ⋮ and tap **Play in headphones**.

### To identify a song on the FM radio using TrackID™

- 1 While the song is playing on your device's FM radio, tap ⋮, then select **TrackID™**.
  - 2 A progress indicator appears while the TrackID™ application samples the song. If identification is successful, you are presented with a result or a list of possible results.
  - 3 To return to the FM Radio, tap ◀.
- ! The TrackID™ application and the TrackID™ service are not supported in all countries/regions, or by all networks and/or service providers in all areas.

## Favorite radio channels

### To save a channel as a favorite

- 1 When the radio is open, navigate to the channel that you want to save as a favorite.
- 2 Tap ☆.
- 3 Enter a name and select a color for the channel, then press **Save**.

### To listen to a favorite radio channel

- 1 Tap ★.
- 2 Select an option.

### To remove a channel as a favorite

- 1 When the radio is open, navigate to the channel that you want to remove.
- 2 Tap ★, then tap **Delete**.

## Sound settings

### To switch between mono and stereo sound mode

- 1 When the radio is open, press ⋮.
- 2 Tap **Enable stereo sound**.
- 3 To listen to the radio in mono sound mode again, press ⋮ and tap **Force mono sound**.

### To select the radio region

- 1 When the radio is open, press ⋮.
- 2 Tap **Set radio region**.
- 3 Select an option.

# Camera

## Taking Photos and Recording Videos

### To Take a Photo from the Lockscreen

- 1 To activate the screen, briefly press the power key .
- 2 To activate the camera, touch and hold the camera icon , then drag it to the left.
- 3 After the camera opens, tap .

### To take a photo using the camera key

- 1 Activate the camera.
- 2 Press the camera key fully down.

### To Take a Selfie Using the Front Camera

- 1 Activate the camera.
- 2 Tap .
- 3 To take the photo, press the camera key. The photo is taken as soon as you release the camera key.

### To use the still camera flash

- 1 When the camera is open, tap .
- 2 Select your desired flash setting.
- 3 Take the photo.

### To Use the Zoom Function

When the camera is open, pinch or spread on the camera screen. You can also use the volume key, pressing up or down.

- 1 To enable this function, tap then tap **More > Use Volume key as**
- 2 Select **Zoom**

### To Record a Video Using the Camera Key

- 1 Activate the camera.
- 2 Swipe the screen to select .
- 3 To start recording a video, press the camera key.
- 4 To stop recording, press the camera key again.

### To Record a Video

- 1 Activate the camera.
- 2 If video mode is not selected, swipe the screen to select .
- 3 Point the camera toward the subject.
- 4 To start recording, tap .
- 5 To pause when recording a video, tap . To resume recording, tap .
- 6 To stop recording, tap .

### To Take a Photo when Recording a Video

- To take a photo when recording a video, tap . The photo is taken as soon as you release the camera button.

### To view your photos and videos

- 1 Activate the camera, then tap a thumbnail to open a photo or video.
- 2 Flick left or right to view your photos and videos.

### To Delete a Photo or Recorded Video

- 1 Find the photo or video you want to delete.
- 2 Tap the screen to display the toolbar.
- 3 Tap .
- 4 Tap **Delete** to confirm.

## General camera settings

### Capturing Modes

#### Manual

Manually adjust camera settings such as resolution, white balance, and ISO.

#### Superior auto

Optimize your settings to suit any scene.

#### Video camera

Manually adjust video settings such as resolution, HDR video and focus mode.

#### Camera apps

Select camera applications manually.

- ! HDR video is only available if the video resolution is set to HD.

### To Switch between Capturing Modes and Camera Apps

- 1 Press and hold down the camera key.
- 2 Swipe the screen to the desired capturing mode or to the application list.

### Camera Apps

#### Sound Photo

Take photos with background sound.

#### AR effect

Take photos or videos with virtual scenes and characters.

#### Creative effect

Apply effects to photos or videos.

#### Sweep Panorama

Take wide-angle and panoramic photos.

### Style portrait

Take photos with real-time portrait styles.

### Multi camera

Record the same scene from multiple angles on a single screen.

## Multi-Camera Mode

Multi-camera mode lets you shoot a photo or video that combines different angles from two different sources. Two camera displays appear on your device screen—one from your device's camera, the other from a connected Xperia® device or a Sony camera that supports NFC and Wi-Fi Direct® technology.

So if you're at a concert venue, for example, and you want to capture a photo or video that combines a view of the band from one angle and the audience from another, you can use Multi-camera mode for the best effect.

You can set up Multi-camera mode using NFC, which launches the pairing of the two devices using Wi-Fi Direct® technology.

### To Use Multi-Camera Mode

- 1 Turn on the NFC function on both devices that you want to connect.
- 2 Activate the camera on your device.
- 3 Swipe the screen to select and then select .
- 4 On the screens of both devices, tap .
- 5 Touch the NFC detection areas of each device together. Both devices should now connect using Wi-Fi Direct® technology.
- 6 Once the devices are connected, two camera displays appear on your device screen—one from your device's camera, the other from the camera of the connected device.
- 7 To rearrange or reshape the camera displays, tap .
- 8 When you are finished editing and are ready to capture the final combined photo or video, tap **Done** > .

## Sweep Panorama

You can take wide-angle and panoramic photos from the horizontal or vertical direction in an easy press-and-sweep motion.

### To Take a Panoramic Photo

- 1 Activate the camera.
- 2 Swipe the screen to select , and then select .
- 3 To select a shooting direction, tap .
- 4 Press the camera key and move the camera slowly and steadily in the direction of movement indicated on the screen.

## Style Portrait

You can use the Style Portrait feature to apply touch-up effects to portrait photos as you take them to ensure the best results. You can also use the **Magic beam** setting to add a spotlight pattern for eyes.

### To Use the Style Portrait Feature

- 1 Activate the camera.
- 2 Swipe the screen to select , and then select .
- 3 To display all styles, tap the style name that is currently selected, for example, **Bubble**.
- 4 To add more styles, tap **More**.
- 5 Select the style you want to apply, and then tap to take a photo.

### To use the Magic beam feature

- 1 Activate the camera.
- 2 Swipe screen to select , then tap  > .
- 3 To apply an inside eye catchlight effect, select a customized pattern.

## Downloading Camera Applications

You can download free or paid camera applications from Google Play™ or other sources. Before you start downloading, make sure you have a working internet connection, preferably over Wi-Fi to limit data traffic charges.

### To Download Camera Applications

- 1 Open the camera application.
- 2 Swipe the screen to select , and then tap .
- 3 Select the application that you want to download, and follow the instructions to complete the installation.

## Using Smile Shutter™ to capture smiling faces

Use Smile Shutter™ technology to photograph a face just as it smiles. The camera detects up to five faces and selects one face for smile detection and auto-focus. When the selected face smiles, the camera automatically takes a photo.

### To turn on Smile Shutter™

- 1 Activate the camera.
- 2 Tap .
- 3 Find and tap **Smile Shutter** and select a smile level.

### To take a photo using Smile Shutter™

- 1 When the camera is open and Smile Shutter™ is turned on, point the camera at your subject. The camera selects which face to focus on.
- 2 The face selected appears inside a colored frame and the photo is taken automatically.
- 3 If no smile is detected, press the camera key to take the photo manually.

## Face detection

You can use face detection to bring an off-center face into focus. The camera automatically detects up to five faces, indicated by white frames. A colored frame shows which face has been selected for focus. Focus is set to the face closest to the camera. You can also tap one of the frames to select which face should be in focus.

### To Turn on Face Detection

- 1 Swipe the screen to select  **Manual** capturing mode.
- 2 Tap .
- 3 Tap **More** > **Focus mode** > **Face detection**.

### To Take a Photo Using Face Detection

- 1 When the camera is open and **Face detection** is turned on, point the camera at your subject. Up to five faces can be detected, and each detected face is framed.
- 2 Press the camera key halfway down. A colored frame shows which face is in focus.
- 3 To take the photo, press the camera key fully down.

## Adding Geographical Positions To Your Photos

Enable the Save location function to add the approximate geographical location to photos when you take them. The geographical location is determined by wireless networks and/or GPS technology.

When 📶 appears on the camera screen, Saving location is turned on but the geographical position has not been found. When 📍 appears, Saving location is turned on and the geographical location is available, so the geographical location can be added to your photo. When neither of these two symbols appears, Saving location is disabled.

### To Turn on Geotagging

- 1 From your Homescreen, tap .
- 2 Tap **Settings** > **Location**.
- 3 Tap the on-off switch.
- 4 Activate the camera.
- 5 Tap .
- 6 Tap **More** > **Save location**. Drag the slider to the right.

## Touch Capture

Identify a focus area, and then touch the camera screen with your finger. The photo is taken as soon as you release the screen.

## Touch Block

You can disable the touchscreen to avoid unintended touches when you are using the camera.

## Auto Photo Preview

You can choose to preview photos or videos just after you shoot them.

### Unlimited

The preview of the photo or video appears after you shoot it.

### 5 seconds

The preview of the photo or video appears for 5 seconds after you shoot it.

### 3 seconds

The preview of the photo or video appears for 3 seconds after you shoot it.

### Edit

The photo or video opens for editing after you shoot it.

### Off

The photo or video is saved after you shoot it, and no preview appears.

## Use Volume Key as

You can choose how you want to use the volume key when taking photos.

### Zoom

Use the volume key to zoom in or out.

### Volume

Use the volume key to adjust the volume.

### Shutter

Use the volume key to take photos.

## Sound

You can choose to turn the shutter sound on or off.

## Data storage

You can choose to save your data either to a removable SD card or to your device's internal storage.

### Internal storage

Photos or videos are saved on the device memory.

### SD card

Photos or videos are saved on the SD card.

## Quick launch

Use Quick launch settings to launch the camera when the screen is locked.

### Launch only

When this setting is activated, you can launch the camera when the screen is locked by pressing and holding down the camera key.

### Launch and capture

When this setting is activated, you can launch the camera and capture a photo automatically when the screen is locked by pressing and holding down the camera key.

### Launch and record video

When this setting is activated, you can launch the camera and start capturing video when the screen is locked by pressing and holding down the camera key.

Off

## White Balance

This setting, which is only available in **Manual** capturing mode, adjusts the color balance according to the lighting conditions. You can also adjust the exposure manually in the -2.0 EV to +2.0 EV range. For example, you can increase the image brightness or decrease the overall exposure by tapping the plus or minus controls accordingly when the white balance/exposure value/HDR adjusting icon  is displayed.

### Auto

Adjusts the color balance automatically to suit the lighting conditions.

### Incandescent

Adjusts the color balance for warm lighting conditions, such as under light bulbs.

### Fluorescent

Adjusts the color balance for fluorescent lighting.

### Daylight

Adjusts the color balance for sunny outdoor conditions.

### Cloudy

Adjusts the color balance for a cloudy sky.

## Still camera settings

### To adjust the still camera settings

- 1 Activate the camera.
- 2 To display all settings, tap .
- 3 Select the setting that you want to adjust, then edit as desired.

## Still camera settings overview

### Resolution

Choose between several resolutions and aspect ratios before taking a photo. A photo with a higher resolution requires more memory.

#### 13MP

##### 4128×3096(4:3)

13-megapixel resolution with 4:3 aspect ratio. Suitable for photos you want to view on non-widescreen displays or print in high resolution.

#### 9MP

##### 3920×2204(16:9)

9-megapixel resolution with 16:9 aspect ratio. Suitable for photos you want to view on widescreen displays.

#### 8MP

##### 3264×2448(4:3)

8-megapixel resolution with 4:3 aspect ratio. Suitable for photos you want to view on non-widescreen displays or print in high resolution.

**8MP**

**3840×2160(16:9)**

8-megapixel resolution with 16:9 aspect ratio. Suitable for photos you want to view on widescreen displays.

**3MP**

**2048×1536(4:3)**

3-megapixel resolution with 4:3 aspect ratio. Suitable for photos you want to view on non-widescreen displays or print in high resolution.

**2MP**

**1920×1080(16:9)**

2-megapixel resolution with 16:9 aspect ratio. Suitable for photos you want to view on widescreen displays.

**VGA**

**640×480(4:3)**

VGA format with 4:3 aspect ratio.

! This setting is only available in **Manual** capturing mode.

## Focus mode

The focus function controls which part of a photo should be sharp. When continuous autofocus is on, the camera keeps adjusting focus so the area within the colored focus frame stays sharp.

**Single autofocus**

The camera automatically focuses on the selected subject. Continuous autofocus is on. Touch and hold the camera screen until the yellow focus frame turns blue, indicating that the focus is set. The photo is taken when you release your finger.

**Face detection**

The camera automatically detects up to five human faces, indicated by frames on the screen. The camera automatically focuses on the nearest face. You can also select which face to focus on by tapping it on the screen. When you tap the camera screen, a blue frame shows which face is selected and in focus. Face detection cannot be used for all scene types. Continuous autofocus is on.

**Touch focus**

Touch a specific area on the camera screen to set the area of focus. Continuous autofocus is off. Touch and hold the camera screen until the yellow focus frame turns blue, indicating that the focus is set. The photo is taken when you release your finger.

**Object tracking**

When you select an object by touching it in the viewfinder, the camera tracks it for you.

! This setting is only available in **Manual** capturing mode.

## Self-Timer

With the self-timer, you can take a photo without holding the device. Use this function to take self-portraits or group photos where everyone can be in the photo. You can also use the self-timer if you want to avoid shaking the camera while taking photos.

**10 sec.**

Set a 10-second delay from when you press the shutter button until the photo is taken.

**2 sec.**

Set a 2-second delay from when you press the shutter button until the photo is taken.

**0.5 sec.**

Set a half-second delay from when you press the shutter button until the photo is taken.

**Off**

The photo is taken when you press the shutter button.

## Smile Shutter™

Use the Smile Shutter™ function to determine what kind of smile the camera reacts to before taking a photo.

## HDR

Use the HDR (High Dynamic Range) setting to take a photo against strong backlight or in conditions where the contrast is sharp. HDR compensates for the loss of detail and produces a picture that is representative of both dark and bright areas.

- ! This setting is only available in **Manual** capturing mode.

## ISO

The ISO sensitivity can be set to adjust automatically, or can be manually adjusted to sensitivity settings ranging from 100 to 3200.

- ! This setting is only available in **Manual** capturing mode.

## Metering

This function automatically determines a well-balanced exposure by measuring the amount of light striking the image you want to capture.

### Center

Determines the exposure based on the brightness of the center of the subject.

### Spot

Adjusts the exposure on a small part of the subject that you want to capture.

### Average

Calculates the exposure based on the amount of light striking the whole subject.

- ! This setting is only available in **Manual** capturing mode.

## Flash

Use the flash to take photos when lighting conditions are poor or when there is a backlight. The following options are available when you tap the flash icon  on the camera screen:

### **Auto**

The camera automatically determines whether the lighting conditions require the use of a flash.

### **Fill flash**

Use this setting when the background is brighter than the subject. This setting removes unwanted dark shadows.

### **Red-eye reduction**

Reduces the red color of eyes when taking a photo.

### **Off**

The flash is turned off. Sometimes photo quality can be better without the flash, even if lighting conditions are poor. Taking a good photo without using the flash requires a steady hand. Use the self-timer to avoid blurred photos.

### **Flashlight**

The flash shines continuously while taking pictures.

## Scene selection

Use the Scene selection feature to quickly set up the camera for common situations using pre-programmed scenes. The camera determines a number of settings for you to fit the selected scene, ensuring the best possible photo.

### **Off**

The Scene selection feature is off and you can take photos manually.

### **Soft skin**

Take photos of faces using an enhanced beauty effect.

### **Soft snap**

Use for shooting photos against a soft background.

-  **Anti motion blur**  
Use for minimizing camera shake when shooting a slightly dark scene.
-  **Landscape**  
Use for landscape photos. The camera focuses on distant objects.
-  **Backlight correction HDR**  
Use to improve details in high contrast shots. The built-in backlight correction analyzes the image and automatically adjusts it to give you a perfectly lit shot.
-  **Night portrait**  
Use for portrait photos taken at night or in poorly lit environments. Due to the long exposure time, the camera must be held still or placed on a stable surface.
-  **Night scene**  
Use when taking photos at night or in poorly lit environments. Due to the long exposure time, the camera must be held still or placed on a stable surface.
-  **Hand-held twilight**  
Use for taking hand-held low-light photos with reduced noise and blur.
-  **High sensitivity**  
Use for taking photos without a flash under low light conditions. Reduces blur.
-  **Gourmet**  
Use for shooting food arrangements in bright color.
-  **Pet**  
Use for taking photos of your pet. Reduces blur and red eyes.
-  **Beach**  
Use for taking photos of seaside or lakeside scenes.
-  **Snow**  
Use in bright environments to avoid overexposed photos.
-  **Party**  
Use for indoor photos in poorly lit environments. This scene picks up indoor background lighting or candlelight. Due to the long exposure time, the camera must be held still or placed on a stable surface.
-  **Sports**  
Use for taking photos of fast-moving objects. Short exposure time minimizes motion blurring.
-  **Document**  
Use for photos of text or drawings. Gives the photo increased, sharper contrast.
-  **Fireworks**  
Use for taking photos of fireworks in all their glory.

! This setting is only available in **Manual** capturing mode.

## Video camera settings

### To adjust the video camera settings

- 1 Activate the camera.
- 2 Swipe to .
- 3 To display settings, tap .
- 4 Select the setting that you want to adjust, then make your changes.

## Video camera settings overview

### Scene Selection

The Scene selection feature helps you quickly set up the camera for common situations using pre-programmed video scenes. Each scene setting is designed to produce the best possible video quality in a specific recording environment.

**AUTO** **Auto**  
Scene selection is automatic.

**SCN** **Off**

The Scene selection feature is off and you can shoot videos manually.

**Soft snap**

Use for shooting videos against soft backgrounds.

**Landscape**

Use for videos of landscapes. The camera focuses on distant objects.

**Night scene**

When turned on, light sensitivity is increased. Use in poorly lit environments. Videos of fast-moving objects may get blurred. Hold your hand steady, or use a support. Turn off night mode when lighting conditions are good to improve the video quality.

**Beach**

Use for videos of seaside or lakeside scenes.

**Snow**

Use in bright environments to avoid overexposed videos.

**Sports**

Use for videoing fast-moving objects. Short exposure time minimizes motion blurring.

**Party**

Use for indoor videos in poorly lit environments. This scene picks up indoor background lighting or candlelight. Videos of fast-moving objects may get blurred. Hold your hand steady, or use a support.

## Video Resolution

Adjust the video resolution for different formats.

**Full HD**

**1920×1080(16:9)**

Full HD (Full High Definition) format with 16:9 aspect ratio.

**HD**

**1280×720(16:9)**

HD (High Definition) format with 16:9 aspect ratio.

**VGA**

**640×480(4:3)**

VGA format with 4:3 aspect ratio.

**MMS**

Record videos suitable for sending in multimedia messages. The recording time of this video format is limited so that video files can fit in a multimedia message.

## Focus mode

The focus setting controls which part of a video-recorded subject should be sharp. When continuous autofocus is on, the camera keeps adjusting focus so that the area within the white focus frame stays sharp.

**Single autofocus**

The camera automatically focuses on the selected subject. Continuous autofocus is on.

**Face detection**

The camera automatically detects up to five human faces, indicated by frames on the screen. The camera automatically focuses on the nearest face. You can also select which face to focus on by tapping it on the screen. When you tap the camera screen, a yellow frame shows which face is selected and in focus. Face detection cannot be used for all scene types. Continuous autofocus is on.

**Object tracking**

When you select an object by touching it in the viewfinder, the camera tracks it for you.

## Smile Shutter™(video)

Use the Smile Shutter™ function to determine what kind of smile the camera reacts to before recording a video.

## Video stabilizer

When recording a video, it can be difficult to hold the device steady. The stabilizer helps you by compensating for small movements of the hand.

## Flashlight

Use the flash light to record videos when lighting conditions are poor or when there is a backlight. The video flash icon  is only available on the video camera screen. Note that the video quality can sometimes be better without a light even if lighting conditions are poor.

**On**

**Off**

## HDR video

Use the video HDR (High-Dynamic Range) setting to record a video against strong back light or in conditions where the contrast is sharp. Video HDR compensates for the loss of detail and produces a picture that is representative of both dark and bright areas.

# Photos and videos in Album

## Viewing Photos and Videos

Use the Album application to view photos and play videos you've taken with your camera, or to view similar content you've saved to your device. All photos and videos are displayed in a chronologically ordered grid.

- 1 Tap the icon to open the Album homescreen menu
- 2 View a slideshow of all images or just the ones you've added to your favorites
- 3 Drag the left edge of the screen to the right to open the Album homescreen menu
- 4 The date range of items in the current group
- 5 Tap a photo or video to open it in full-screen view
- 6 Scroll up or down to view content

### To View Photos and Videos

- 1 From your Homescreen, tap .
  - 2 Find and tap **Album**.
  - 3 Tap a photo or video you want to view. If prompted, tap .
  - 4 Flick left to view the next photo or video. Flick right to view the previous photo or video.
-  To set the screen to rotate automatically when turned sideways, tap **Auto-rotate screen** under **Settings > Display > Screen rotation**.

### To change the size of the thumbnails

- When viewing thumbnails of photos and videos in Album, spread two fingers apart to zoom in, or pinch two fingers together to zoom out.

### To zoom a photo

- When you are viewing a photo, spread two fingers apart to zoom in, or pinch two fingers together to zoom out.

### To watch a slideshow of your photos

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap  > **Slideshow** to start playing all the photos in an album.
- 2 Tap a photo to end the slideshow.

### To Play a Video

- 1 In Album, find and tap the video you want to play.
- 2 Tap .
- 3 If the playback controls are not displayed, tap the screen to display them. To hide the controls, tap the screen again.

### To pause a video

- 1 When a video is playing, tap the screen to display the controls.
- 2 Tap .

### To Fast-Forward and Rewind a Video

- 1 When a video is playing, tap the screen to display the controls.
- 2 Drag the progress bar marker left to rewind, or right to fast-forward.

### To adjust the volume of a video

- Press the volume key.

## Sharing and Managing Photos and Videos

You can share photos and videos that you've saved on your device. You can also manage them in different ways. For example, you can work with photos in batches, delete photos, and link them to contacts. If you have lots of photos saved on your device, it's a good idea to routinely transfer them to a computer or to an external storage device in order to avoid any inadvertent loss of data. Doing so also frees up more space on your device. See *Managing Files Using a Computer* on the 37 page.

- ! You might not be able to copy, send, or transfer copyright-protected items. Also, some items may not send if the file size is too large.

### To share a photo or video

- 1 In Album, find and tap the photo or video that you want to share.
- 2 Tap the screen to display the toolbars, then tap .
- 3 Tap the application that you want to use to share the photo, then follow the steps to send it.

### To use a photo as a contact picture

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap  > **Use as > Contact picture.**
- 2 Select a contact, then edit the photo as desired.
- 3 Tap **Save**.

### To use a photo as wallpaper

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap  > **Use as > Wallpaper.**
- 2 Follow the instructions on the screen.

### To rotate a photo

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap .
- 2 Tap **Rotate**, then select an option. The photo is saved in the new orientation.

### To delete a photo or video

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap .
- 2 Tap **Delete**.

### To Work with Batches of Photos or Videos in Album

- 1 When viewing thumbnails of photos and videos in Album, touch and hold an item until it's highlighted.
- 2 Tap other desired items to select and work with them. If you want to select all items, tap , then tap **Select all**.
- 3 Use the tools in the toolbar to work with your selected items.

## Analyzing photos with faces in Album

You can analyze any photos on your device that feature people's faces. Once activated, the photo analysis feature stays on, and new photos get analyzed as they are added. After running an analysis, you can then group all photos of the same person in one folder.

### To Turn on the Photo Analysis Feature

- 1 From your Homescreen, tap .
- 2 Find and tap **Album**.
- 3 Tap , then tap **Faces**. All photos on your device get analyzed and grouped in the Unnamed faces folder.

### To name a face

- 1 In the **Faces** tile, tap the **Unnamed faces** folder, then browse to the **Other faces** folder and choose the face that you want to name.
- 2 Tap **Add name**.
- 3 Type a name, then tap **Done** > **Add as new person**.

### To edit a face name

- 1 When you are viewing a face in full-screen view, tap the screen to display the toolbars, then tap  > **Edit name tags**.
- 2 Tap **OK**.
- 3 Tap the name of the face that you want to edit.
- 4 Edit the name, then tap **Done** > **Add as new person**.

## Editing photos with the Photo editor application

You can edit and apply effects to original photos that you've taken with your camera. For example, you can change the light effects. After you save the edited photo, the original unchanged version of the photo remains on your device.

### To edit a photo

- When you are viewing a photo, tap the screen to display the toolbars, then tap .

### To crop a photo

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap .
- 2 If prompted, select **Photo editor**.
- 3 Tap  > **Crop**.
- 4 Tap **Crop** to select an option.
- 5 To adjust the crop frame, touch and hold the edge of the crop frame. When the circles at the edges disappear, drag inward or outward to resize the frame.
- 6 To resize all sides of the crop frame at the same time, touch and hold one of the four corners. When the circles at the edges disappear, drag the corner accordingly.
- 7 To move the crop frame to another area of the photo, touch and hold inside the frame, then drag it to the desired position.
- 8 Tap .
- 9 To save a copy of the photo as you cropped it, tap **Save**.

### To Apply Special Effects to a Photo

- 1 When you are viewing a photo, tap the screen to display the toolbars, and then tap .
- 2 If prompted, select **Photo editor**.
- 3 Tap , , or , and then select an option.
- 4 Edit the photo as desired, and then tap **Save**.

### To Add a Photo Frame Effect to a Photo

- 1 When you are viewing a photo, tap the screen to display the toolbars, and then tap .
- 2 If prompted, select **Photo editor**.
- 3 Tap , and then select an option.
- 4 To save a copy of the edited photo, tap **Save**.

### To Adjust the Light Settings for a Photo

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap .
- 2 If prompted, select **Photo editor**.
- 3 Tap , then select an option and edit as desired.
- 4 To save a copy of the edited photo, tap **Save**.

### To Set the Saturation Level of Colors in a Photo

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap .
- 2 If prompted, select **Photo editor**.
- 3 Tap , then select an option.
- 4 To save a copy of the edited photo, tap **Save**.

## Editing videos with the Movie Creator application

You can edit videos that you've taken with your camera. For example, you can trim a video to the desired length or adjust the speed of a video. After you save the edited video, the original unchanged version of the video remains on your device.

### To Trim a Video

- 1 In the Album, find and tap the video you want to edit.
- 2 Tap the screen to display the toolbars, and then tap .
- 3 If prompted, select **Video Editor**, and then tap **Trim**.
- 4 To move the trim frame to another part of the timeline, touch and hold the edge of the trim frame and drag it to the desired position, and then tap **Apply**.
- 5 To save a copy of the trimmed video, tap **Save**.

### To Adjust the Speed of a Video

- 1 In the Album, find and tap the video you want to play.
- 2 Tap the screen to display the toolbars, and then tap .
- 3 If prompted, select **Video Editor**, and then tap **Speed**.
- 4 Select an option, touch and hold the edge of the timeline and drag it to the desired position, and then tap **Apply**.
- 5 To save a copy of the edited video, tap **Save**.

### To Capture a Photo from a Video

- 1 In the Album, find and tap the video you want to play.
- 2 Tap the screen to display the toolbars, and then tap .
- 3 If prompted, select **Video Editor**, and then tap **Photo Capture**.
- 4 With the help of the arrows, or by dragging the marker on the progress bar, select the preferred frame that you want to capture, and then tap **Save**.

## Hiding photos and videos

You can hide any photos and videos from the Album homescreen. Once photos and videos are hidden from the Album homescreen, they can only be viewed from the Hidden folder.

### To hide a photo or video

- 1 In Album, find and tap the photo or video that you want to hide.
- 2 Tap the screen to display the toolbars, then tap .
- 3 Tap **Hide** > **OK**.

### To View Your Hidden Photos and Videos

- 1 In Album, tap , and then tap **Hidden**.
- 2 Tap a photo or video to view it.
- 3 Flick left to view the next photo or video. Flick right to view the previous photo or video.

### To Unhide a Photo or Video

- 1 In Album, tap , and then tap **Hidden**.
- 2 Tap a photo or video that you want to unhide.
- 3 Tap the screen to display the toolbars, and then tap .
- 4 Tap **Don't hide**.

## Album Homescreen Menu

From the Album homescreen menu, you can browse your photo albums, including photos and videos taken using special effects, as well as content that you have shared online via services such as Picasa™ and Facebook. Once you are logged in to such platforms, you can manage content and view online images. From the Album application, you can also add geotags to photos, perform basic editing tasks, and use methods such as Bluetooth® wireless technology and email to share content.

- 1 Return to the Album application homescreen to view all content
- 2 View your favorite photos and videos
- 3 View all videos saved on your device
- 4 View your photos on a map or in Globe view
- 5 View all photos and videos taken with your device's camera using special effects
- 6 View all photos and videos saved on your device in different folders
- 7 View all photos with faces
- 8 View photos and videos on other devices in the same network
- 9 Open the Settings menu for the Album application
- 10 Open web support
- 11 Scroll up or down to view content

### To View Photos from Online Services in Album

- 1 From your Homescreen, tap .
- 2 Find and tap **Album**, and then tap .
- 3 Tap the desired online service, and then follow the on-screen instructions to get started. All available online albums that you have uploaded to the service are displayed.
- 4 Tap any album to view its content, and then tap a photo in the album.
- 5 Flick left to view the next photo or video. Flick right to view the previous photo or video.

## Viewing your photos on a map

Adding location information to photos is referred to as geotagging. You can view and tag your photos on a map and show friends and family where you were when you took a particular photo. See *Adding Geographical Positions To Your Photos* on page 101 for more information.

- 💡 If you have turned on location detection and activated geotagging in the camera, you can tag your photos directly for map viewing at a later stage.

- 1 View geotagged photos in Globe view
- 2 Search a location on the map
- 3 View menu options
- 4 Double tap to zoom in. Pinch to zoom out. Drag to view different parts of the map
- 5 A group of photos and/or videos geotagged with the same location
- 6 Thumbnails of the selected group of photos and/or videos. Tap an item to view it in full screen

- 💡 If several photos were taken at the same location, only one of them appears on the map. The total number of photos appears in the top right corner, for example, 5. To view all photos in the group, tap the cover photo and then tap one of the thumbnails at the bottom of the screen.

### To Add or Edit the Geotag of a Photo

- 1 When you are viewing a photo, tap the screen to display the toolbars.
- 2 Tap , and then tap **Add geotag** or **Edit geotag** to open the map screen.
- 3 Tap on the map to set the location for the photo.
- 4 To reset the location for the photo, tap the new location on the map.
- 5 When you are finished, tap **OK**.

### To View Geotagged Photos on a Map

- 1 From your Homescreen, tap .
- 2 Find and tap **Album**.
- 3 Tap , and then tap **Places**.
- 4 Tap the photo that you want to view on a map.

### To View Geotagged Photos on a Globe

- 1 From your Homescreen, tap .
- 2 Find and tap **Album**.
- 3 Tap , and then tap **Places** > .
- 4 Tap the photo that you want to view on a globe.

### To change the geotag of a photo

- 1 When viewing a photo on the map in Album, touch and hold the photo until its frame turns blue, then tap the desired location on the map.
- 2 Tap **OK**.

### To Change the Map View

- When viewing the map in Album, tap , and then switch between **Classic view** and **Satellite view**.

# Videos

## Watching videos in the Video application

Use the Video application to play movies and other video content that you've saved or downloaded to your device. The Video application also helps you get poster art, plot summaries, genre info, and director details for each movie. You can also play your movies on other devices that are connected to the same network.

- ! Some video files may not be playable in the Video application.

- 1 Tap the icon to open the Video homescreen menu
- 2 Display the most recently played video
- 3 Drag the left edge of the screen to the right to browse all downloaded and saved videos
- 4 View all videos saved to your device
- 5 View online videos
- 6 Tap to play saved or downloaded video files
- 7 View menu options of a video
- 8 Scroll up or down to view content

- ! Sony Entertainment Network with PlayStation™ Video is not available in every market. Additional terms and conditions apply.

### To Play a Video

- 1 From your Homescreen, tap , and then find and tap **Video**.
- 2 Find and tap the video you want to play. If the video is not displayed on the screen, tap  to open the homescreen menu, and then find and tap the video you want to play.
- 3 To display or hide the controls, tap the screen.
- 4 To pause playing, tap . To resume playing, tap .
- 5 To rewind, drag the progress bar marker to the left. To fast forward, drag the progress bar marker to the right.

### To Change Settings

- 1 From your Homescreen, tap , and then find and tap **Video**.
- 2 Tap  to open the homescreen menu, and then tap **Settings**.
- 3 Change the settings as desired.

### To change the sound settings while a video is playing

- 1 While a video is playing, tap the screen to display the controls.
- 2 Tap  > **Sound settings**, then change the settings as desired.
- 3 When you're finished, tap **OK**.

### To Share a Video

- 1 When a video is playing, tap ; then tap **Share**.
- 2 Tap the application that you want to use to share the selected video, then follow the relevant steps to send it.

## Transferring Video Content to Your Device

Before you start using the Video application, it's a good idea to transfer movies, TV shows, and other video content to your device from other devices, such as a computer. There are several ways to transfer your content:

- For Windows® only: Connect your device to a computer using a USB cable and drag and drop the video files directly using the file manager application on the computer. See *Managing Files Using a Computer* on the 37 page.
- If you have a PC or an Apple® Mac® computer, use Xperia™ Companion to organize content and transfer video files to your device.

## Managing video content

### To Get Movie Information Manually

- 1 Make sure your device has an active data connection.
- 2 When a video is playing, tap the screen to display the controls.
- 3 Tap  > **Information**.

### To Delete a Video

- 1 From your Homescreen, tap , then find and tap **Video**.
- 2 Tap  to open the Video home screen menu, then browse to the video file that you want to delete.
- 3 Touch and hold the video thumbnail, and then tap **Delete** from the list that appears.
- 4 Tap **Delete** again to confirm.

## Movie Creator

The Xperia™ Movie Creator automatically creates short videos using existing photos and videos. The application automatically determines the timeline to create its movie. For example, it can take a selection of photos and videos from a Saturday afternoon outing or from a weekly, monthly, or even a yearly period and create a movie for you. When this highlight-style movie is ready, you get notified. You can then edit it as desired. For example, you can edit the title, delete scenes, change the music, or add more photos and videos. You can create Highlight Movies by selecting photos and videos manually.

### To Open Movie Creator

- 1 From your Homescreen, tap .
- 2 Find and tap **Movie Creator**.

### To Enable or Disable Movie Creator Notifications

- 1 From your Homescreen, tap .
- 2 Find and tap **Movie Creator**.
- 3 Tap , then tap **Settings**, and tap the **Notifications** slider to enable or disable notifications.

### To enable or disable the automatic creation of Highlight Movies

- 1 From your Homescreen, tap .
- 2 Find and tap **Movie Creator**.
- 3 Tap , then tap **Settings**, and tap the **Auto creating** slider to enable or disable the function.

### To Manually Create a Highlight Movie

- 1 From your Homescreen, tap .
- 2 Find and tap **Movie Creator**.
- 3 Tap  > **Create new** > **Select photos and/or videos**.
- 4 Touch an item to select it, and then tap other items that you want to add to select them.
- 5 Tap **Create**. If you want to edit a Highlight Movie, tap **View story**, and then use the tools in the toolbar to edit as desired.

## PlayStation™ Video Service

Use the PlayStation™ Video service to buy and rent movies or TV shows that you can view not only on your Android™ device, but also on a PC, PlayStation® Portable (PSP®), PlayStation® 3, PlayStation® 4, or PlayStation® Vita. Choose from the latest Hollywood releases, action movies, comedies, classics, and a range of other categories.

You need to create a Sony Entertainment Network account if you want to buy or rent movies through the PlayStation™ Video service. If you already have a PlayStation® network account, then you can use that account instead.

- ! If you are using a device with multiple users, you must log in as the owner, that is, the primary user, to use the PS Video service.
- ! Sony Entertainment Network with PlayStation™ Video is not available in every market. Additional terms and conditions apply.

### To Get Started with PlayStation™ Video

- 1 From your Homescreen, tap .
- 2 Find and tap , and then follow the on-screen instructions to get started with PlayStation™ Video.

# Connectivity

## Mirroring the Screen of Your Device Wirelessly on a TV

You can use the Screen mirroring feature to show the screen of your device on a TV or other large display without using a cable connection. Wi-Fi Direct® technology creates a wireless connection between the two devices, so you can sit back and enjoy your favourite photos from the comfort of your couch. You can also use this feature to listen to music from your device using the TV's speakers.

- ! When using Screen mirroring, the image quality may sometimes be negatively impacted if there is interference from other Wi-Fi networks.

### To Mirror the Screen of Your Device on a TV Screen

- 1 **TV:** Follow the instructions in the User Guide of your TV to turn on the Screen mirroring function.
  - 2 **Your device:** From your **Home screen**, tap .
  - 3 Find and tap **Settings** > **Device connection** > **Screen mirroring**.
  - 4 Tap **Start**.
  - 5 Tap **OK** and select a device.
- ! Your TV must support Screen mirroring based on Wi-Fi CERTIFIED Miracast™ for the function to work. If your TV does not support Screen mirroring, you may need to purchase a wireless display adapter separately. Also, when using Screen mirroring, do not cover the Wi-Fi antenna area of your device.

### To stop screen mirroring between devices

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Device connection** > **Screen mirroring**.
- 3 Tap **Disconnect**, then tap **OK**.

## Sharing Content with DLNA Certified™ Devices

You can view or play media content saved to your device on other devices such as a TV or a computer. These devices must be on the same wireless network and can be Sony TVs or speakers, or products that are DLNA Certified™ by the Digital Living Network Alliance. You can also view or play content from other DLNA Certified™ devices on your device.

After you set up media sharing between devices, you can listen to music files stored on your home computer from your device or view photos taken with your device's camera on a large-screen TV, for example.

## Playing Files from DLNA Certified™ Devices on Your Device

When you play files from another DLNA Certified™ device on your device, this other device acts as a server. In other words, it shares content over a network. The server device must have its content sharing function enabled and give access permission to your device. It also must be connected to the same Wi-Fi network as your device.

### To Use Your Device to Play a Music Track Stored on Another Device

- 1 Make sure the device you want to share files with is connected to the same Wi-Fi network as your device.
- 2 From your **Home screen**, tap , then find and tap .
- 3 Tap , then tap **Home network**.
- 4 Select a device from the list of connected devices.
- 5 Browse the folders of the connected device and select the track you want to play. Once selected, the track starts playing automatically.

### To Play a Shared Video on Your Device

- 1 Make sure the devices you want to share files with are connected to the same Wi-Fi network as your device.
- 2 From your Homescreen, tap , and then find and tap **Video**.
- 3 Tap , and then tap **Home network**.
- 4 Select a device from the list of connected devices.
- 5 Browse the folders of the connected device and select the video you want to play.

### To View a Shared Photo on Your Device

- 1 Make sure the devices you want to share files with are connected to the same Wi-Fi network as your device.
- 2 From your Homescreen, tap , and then find and tap **Album**.
- 3 Tap , and then tap **Home network**.
- 4 Select a device from the list of connected devices.
- 5 Browse the folders of the connected device and select a photo to view it.

## Playing files from your device on DLNA Certified™ devices

Before you can view or play media files from your device on other DLNA Certified™ devices, you must set up file sharing on your device. The devices that you share content with are called client devices. For example, a TV, computer or tablet can act as client devices. Your device works as a media server when it makes content available to client devices. When you set up file sharing on your device, you must also give access permission to client devices. After you do so, such devices appear as registered devices. Devices that are waiting for access permission are listed as pending devices.

### To Set up File Sharing with other DLNA Certified™ Devices

- 1 Connect your device to a Wi-Fi network.
  - 2 From your Homescreen, tap , then find and tap **Settings > Device connection > Media server**.
  - 3 Tap the **Share media** slider to enable this function.
  - 4 Use your computer or another DLNA™ client device on the same Wi-Fi network to connect to your device.
  - 5 A notification appears in the status bar of your device. Open the notification and set access permissions for each client device attempting to connect to your device.
- ! The steps for accessing media on your device using a DLNA™ client differ between client devices. Refer to your client device User guide for more information. If your device is inaccessible to a client on the network, check if your Wi-Fi network is working.
- 💡 You can also access the **Media server** menu from certain applications like Music, Album, or Video by tapping , and then tapping **Settings > Media server**.

### To stop sharing files with other DLNA Certified™ devices

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Device connection > Media server**.
- 3 Drag the slider beside **Share media** to the left.

### To set access permissions for a pending device

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Device connection > Media server**.
- 3 Select a device from the **Pending devices** list.
- 4 Select an access permission level.

### To Change the Name of a Registered Device

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Device connection > Media server**.
- 3 Select a device from the **Registered devices** list, then select **Change name**.
- 4 Enter a new name for the device, then tap **OK**.

### To change the access level of a registered device

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Device connection > Media server**.
- 3 Select a device from the **Registered devices** list.
- 4 Tap **Change access level** and select an option.

### To Get Help with Sharing Content with Other DLNA Certified™ Devices

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Device connection > Media server**.
- 3 Tap , and then tap **Help**.

## Connecting Your Device to USB Peripherals

You can use a USB host adapter to connect your device to USB accessories such as USB mass storage devices and USB mice. If the USB device has a micro USB connector, a USB host adapter is not necessary.

- ! This device has a capless USB port. If your device gets exposed to water, ensure the USB port is completely dry before inserting a USB cable.
- ! USB host adapters are sold separately. Sony does not guarantee that all USB accessories are supported by your device.

### To connect a USB accessory using a USB host adapter

- 1 Attach the USB Host adapter to your device, then connect the adapter to the USB accessory.
  - 2 From your Homescreen, tap .
  - 3 Find and tap **Settings > Device connection > USB Connectivity > Detect USB device**.
- ! Additional steps or software may be required to set up game controllers, USB audio and USB Ethernet accessories. Sony does not guarantee that all USB accessories are supported by your device.

### To access content on a USB mass storage device using a USB Host adapter

- 1 Attach the USB Host adapter to your device, then connect the adapter to the USB mass storage device.
  - 2 From your Homescreen, tap .
  - 3 Find and tap **Settings > Device connection > USB Connectivity > Detect USB device**.
  - 4 To access files and folders on the USB storage device, use a file manager app such as File Commander.
- 💡 You can also open the relevant media application on your device to view content directly. For example, you can open the Album application to view photos stored on USB mass storage devices.

### To set up your device to detect USB devices

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Device connection > USB Connectivity > Detect USB device**.

## NFC

Use Near Field Communication (NFC) to share data with other devices, such as videos, photos, web page addresses, music files, or contacts. You can also use NFC to scan tags that give you more information about a product or service as well as tags that activate certain functions on your device.

NFC is a wireless technology with a maximum range of one centimeter, so the devices sharing data must be held close to each other. Before you can use NFC, you must first turn on the NFC function, and the screen of your device must be active.

The NFC detection area is located on the back of the device. Hold your device close to another device or an NFC reader so the NFC detection areas touch each other.

- ! NFC may not be available in all countries or regions. Using certain apps, some NFC functions can be enabled even when the device is switched off. Note that not all devices support this feature.

#### To Turn on the NFC Function

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **More**.
- 3 Tap the on-off switch beside **NFC**.

#### To Share a Contact with Another Device Using NFC

- 1 Make sure both devices have the NFC function turned on, and that both screens are active.
- 2 To view contacts, go to your Homescreen, tap , and then tap .
- 3 Tap the contact you want to share.
- 4 Hold your device and the receiving device close to each other so that the NFC detection areas of each device touch. When the devices connect, a thumbnail of the contact appears.
- 5 Tap the thumbnail to start the transfer.
- 6 When the transfer is done, the contact information is saved on the receiving device and displayed on its screen.

#### To Share a Music File with Another Device Using NFC

- 1 Make sure both your device and the receiving device have the NFC function turned on, and that both screens are active.
- 2 To open the Music application, tap , and then find and tap .
- 3 Select a music category and browse to the track you want to share.
- 4 Tap the track to play it. You can then tap  to pause the track. The transfer works whether the track is playing or paused.
- 5 Hold your device and the receiving device close to each other so that the NFC detection areas of each device touch. When the devices connect, a thumbnail of the track appears.
- 6 Tap the thumbnail to start the transfer.
- 7 When the transfer is done, the music file is saved on the receiving device and displayed on its screen.

### To Share a Photo or Video with Another Device Using NFC

- 1 Make sure both devices have the NFC function turned on, and that both screens are active.
- 2 To view photos and videos on your device, go to your Homescreen, tap , and then find and tap **Album**.
- 3 Tap the photo or video you want to share.
- 4 Hold your device and the receiving device close to each other so that the NFC detection areas of each device touch. When the devices connect, a thumbnail of the photo or video appears.
- 5 Tap the thumbnail to start the transfer.
- 6 When the transfer is done, the photo or video is saved on the receiving device and displayed on its screen.

### To Share a Web Address with Another Device Using NFC

- 1 Make sure both devices have the NFC function turned on, and that both screens are active.
- 2 From your Homescreen, tap .
- 3 To open the web browser, find and tap .
- 4 Load the web page you want to share.
- 5 Hold your device and the receiving device close to each other so that the NFC detection areas of each device touch. When the devices connect, a thumbnail of the web page appears.
- 6 Tap the thumbnail to start the transfer.
- 7 When the transfer is done, the web page is displayed on the screen of the receiving device.

## Scanning NFC tags

Your device can scan various kinds of NFC tags. For example, it can scan embedded tags on a poster, on a billboard advertisement, or beside a product in a retail store. You can receive additional information, such as a web address.

### To scan an NFC tag

- 1 Make sure your device has the NFC function turned on and that the screen is active.
- 2 Place your device over the tag so that the NFC detection area touches it. Your device scans the tag and displays the content collected. Tap the content of the tag to open it.

## Connecting to an NFC-Compatible Device

You can connect your device to other NFC-compatible devices produced by Sony, such as a speaker or a headphone. When establishing this kind of connection, refer to the User Guide of the compatible device for more information.

- ! You may need to have Wi-Fi or Bluetooth® activated on both devices for the connection to work.

## Bluetooth® Wireless Technology

Use the Bluetooth® function to send files to other Bluetooth®-compatible devices, or to connect to handsfree accessories. Bluetooth® connections work better within 10 meters (33 feet), with no solid objects in between. In some cases you have to manually pair your device with other Bluetooth® devices.

- ! Interoperability and compatibility among Bluetooth® devices can vary.
- ! If you are using a device with multiple users, each user can change the Bluetooth® settings, and the changes affect all users.

### To Turn on the Bluetooth® Function

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Bluetooth**.
- 3 Tap the on-off switch beside **Bluetooth** so the Bluetooth® function is turned on.  
Your device is now visible to nearby devices and a list of available Bluetooth® devices appears.

### Naming your device

You can give your device a name. This name is shown to other devices after you have turned on the Bluetooth® function and your device is set to visible.

### To Give Your Device a Name

- 1 Be sure the Bluetooth® function is turned on.
- 2 From your Homescreen, tap .
- 3 Find and tap **Settings** > **Bluetooth**.
- 4 Tap  > **Rename this device**.
- 5 Enter a name for your device.
- 6 Tap **Rename**.

### Pairing with another Bluetooth® device

When you pair your device with another device, you can, for example, connect your device to a Bluetooth® headset or a Bluetooth® car kit and use these other devices to share music.

Once you pair your device with another Bluetooth® device, your device remembers this pairing. When pairing your device with a Bluetooth® device, you may need to enter a passcode. Your device will automatically try the generic passcode 0000. If this does not work, refer to the user guide for your Bluetooth® device to get the device passcode. You do not need to re-enter the passcode the next time you connect to a previously paired Bluetooth® device.

- ! Some Bluetooth® devices, for example, most Bluetooth® headsets, require you to both pair and connect with the other device.
- ! You can pair your device with several Bluetooth® devices, but you can only connect to one Bluetooth® profile at the same time.

### To pair your device with another Bluetooth® device

- 1 Make sure the device you want to pair with has the Bluetooth® function activated and is visible to other Bluetooth® devices.
- 2 From your device's Homescreen, tap .
- 3 Find and tap **Settings** > **Bluetooth**.
- 4 Drag the slider beside **Bluetooth** to turn on the Bluetooth® function. A list of available Bluetooth® devices appears.
- 5 Tap the Bluetooth® device you want to pair with.
- 6 Enter a passcode, if required, or confirm the same passcode on both devices.

### To connect your device to another Bluetooth® device

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Bluetooth**.
- 3 Tap the Bluetooth® device you want to connect to.

### To Unpair a Bluetooth® Device

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Bluetooth**.
- 3 Under **Paired devices**, tap  beside the name of the device you want to unpair.
- 4 Tap **Forget**.

### Sending and receiving items using Bluetooth® technology

Use Bluetooth® technology to share items with other Bluetooth® compatible devices such as phones or computers. You can send and receive the following kinds of items:

- Photos and videos
- Music and other audio files
- Web pages

### To send items using Bluetooth®

- 1 **Receiving device:** Make sure the Bluetooth® function is turned on and that the device is visible to other Bluetooth® devices.
- 2 **Sending device:** Open the application which contains the item that you want to send, and scroll to the item.
- 3 Depending on the application and on the item that you want to send, you may need to, for example, touch and hold the item, open the item, and press . Other ways to send an item may exist.
- 4 Select **Bluetooth**.
- 5 Turn on Bluetooth® if you are asked to do so.
- 6 Tap the name of the receiving device.
- 7 **Receiving device:** If asked, accept the connection.
- 8 **Sending device:** If asked, confirm the transfer to the receiving device.
- 9 **Receiving device:** Accept the incoming item.

### To receive items using Bluetooth®

- 1 Make sure that the Bluetooth® function is on and is visible to other Bluetooth® devices.
- 2 The sending device now starts sending data to your device.
- 3 If prompted, enter the same passcode on both devices, or confirm the suggested passcode.
- 4 When you are notified of an incoming file to your device, drag the status bar downward and tap the notification to accept the file transfer.
- 5 Tap **Accept** to start the file transfer.
- 6 To view the progress of the transfer, drag the status bar downward.
- 7 To open a received item, drag the status bar downward and tap the relevant notification.

### To view files you have received using Bluetooth®

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Bluetooth**.
- 3 Press  and select **Show received files**.

# Smart apps and features that save you time

## Controlling Accessories and Settings with Smart Connect™

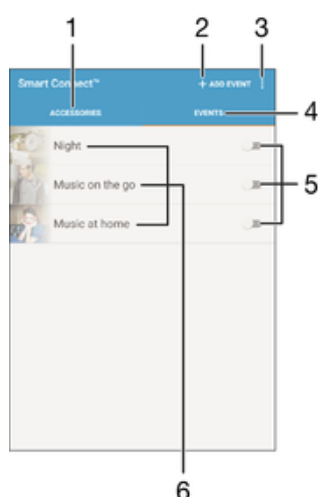

Use the Smart Connect™ application to set what happens in your device when you connect or disconnect an accessory. For example, you can decide to always start the FM radio application when you connect a headset.

You can also set Smart Connect™ to read out incoming text messages. Or you can use the application to set a specific action or a group of actions to launch on your device at certain times of the day. For example, when you connect your headset between 7AM and 9AM, you can decide that:

- The FM radio application starts.
- The web browser opens the morning paper.
- The ring volume is set to vibrate.

With Smart Connect™, you can also manage accessories such as SmartTags and SmartWatch. Refer to the User guide of the specific accessory for more information.

- ! If you are using a device with multiple users, you must log in as the owner, that is, the primary user, to use the Smart Connect™ application.

- |   |                                      |
|---|--------------------------------------|
| 1 | Tap to display available accessories |
| 2 | Add an accessory or an event         |
| 3 | View menu options                    |
| 4 | Tap to display all events            |
| 5 | Tap to activate an event             |
| 6 | Tap to view details of an event      |

### To Create a Smart Connect™ Event

- 1 From your Homescreen, tap , then find and tap **Other** > .
- 2 If you are opening Smart Connect™ for the first time, tap **OK** to close the introduction screen.
- 3 On the **Events** tab, tap **+**.
- 4 If you are creating an event for the first time, tap **OK** again to close the introduction screen.
- 5 Add conditions you want to trigger the event under. A condition could be the connection with an accessory, or a specific time interval, or both.
- 6 Tap  to continue.
- 7 Add what you want to happen when you connect an accessory, and set other settings as desired.
- 8 Tap  to continue.
- 9 Set an event name, then tap **Finish**.

 To add a Bluetooth® accessory, you have to first pair it with your device.

### To Edit a Smart Connect™ Event

- 1 Start the Smart Connect™ application.
- 2 On the **Events** tab, tap an event.
- 3 If the event is switched off, drag the slider to the right to turn it on.
- 4 Tap **Edit**, then adjust the settings as desired.

### To Delete an Event

- 1 Start the Smart Connect™ application.
- 2 On the **Events** tab, touch and hold the event you want to delete, then tap **Delete event**.
- 3 Tap **Delete** to confirm.

 You can also open the event you want to delete, then tap  > **Delete event** > **Delete**.

### To Set Smart Connect™ to Read out Incoming Text Messages

- 1 Start the Smart Connect™ application.
  - 2 Tap , then tap **Settings**.
  - 3 Mark the checkbox beside **Text To Speech**, then confirm activation, if necessary.
-  If this feature is turned on, all incoming messages are read aloud. To protect your privacy, you may need to turn off this feature if you are using your device in a public place or at work, for example.

## Managing Accessories

Use the Smart Connect™ application to manage a range of smart accessories that you can connect to your device, including SmartTags, SmartWatch, and Smart Wireless Headset pro from Sony. Smart Connect™ downloads any necessary applications and also finds third-party applications, when available. Previously connected accessories show in a list that allows you to get more information about the features of each accessory.

### To Pair and Connect an Accessory

- 1 Start the Smart Connect™ application. If you are opening Smart Connect™ for the first time, tap **OK** to close the introduction screen.
- 2 Tap **Accessories**, then tap **+**.
- 3 Turn on the Bluetooth® function if it is not already on, then tap the name of the accessory that you want to pair and connect with.
- 4 If required, enter a passcode, or confirm the same passcode on both your device and the accessory.

### To Adjust the Settings for a Connected Accessory

- 1 Pair and connect the accessory with your device.
- 2 Start the Smart Connect™ application.
- 3 Tap **Accessories**, then tap the name of the connected accessory.
- 4 Adjust the desired settings.

## Using your device as a wallet

Use your device as a wallet to pay for goods without reaching for your real wallet. All of your installed payment services are put together to be viewed and managed. Note that when making a payment, you must first turn on the NFC function before your device touches a card reader. For more information about NFC, see *NFC* on page 121.

- ! Mobile payment services may not yet be available in all regions.

### To manage payment services

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Tap & pay**. A list of payment services appears.
- 3 Manage the payment services as desired, for example, change your default payment service.

# Travel and maps

## Using Location Services

Location services allow applications such as Maps and the camera to use information from your cellphone or Wi-Fi network as well as Global Positioning System (GPS) information to determine your approximate location. If you're not within a clear line of sight of GPS satellites, your device can determine your location using the Wi-Fi function. And if you're not within range of a network, your device can determine your location using your cellphone network.

In order to use your device to find out where you are, you need to enable location services.

- ! You may incur data connection charges when you connect to the internet from your device.

### To Enable or Disable Location Services

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings** > **Location**, then tap the slider to enable or disable location services.

## Improving GPS Accuracy

The first time you use the GPS function in your device, it can take a few minutes for your location to be found. To help the search, make sure you have a clear view of the sky. Stand still and don't cover the GPS antenna (the highlighted area in the image). GPS signals can pass through clouds and plastic, but not through most solid objects such as buildings and mountains. If your location isn't found after a few minutes, move to another location.

## Google Maps™ and Navigation

Use Google Maps™ to track your current location, view real-time traffic situations, and receive detailed directions to your destination.

The Google Maps™ application requires an internet connection when used online. You may incur data connection charges when you connect to the internet from your device. To get more detailed information about how to use this application, go to <http://support.google.com> and click the "Maps for mobile" link.

- ! The Google Maps™ application may not be available in every market, country, or region.

### To Use Google Maps™

- 1 From your **Home screen**, tap .
- 2 Find and tap **Google > Maps**.

## Using Data Traffic when Traveling

When you travel outside of your home cellphone network, you may need to access the internet using cellular data traffic. If so, you need to activate data roaming on your device. You may incur additional charges when you activate data roaming. It is recommended to check the relevant data transmission charges in advance.

- ! If you are using a device that has multiple users, you may need to log in as the owner (that is, the primary user) to activate or deactivate data roaming.

### To Enable or Disable Data Roaming

- 1 From your **Home screen**, tap .
  - 2 Find and tap **Settings > More > Mobile networks**.
  - 3 Tap the **Data roaming** slider to enable or disable the function.
- ! You can't activate data roaming while mobile data traffic is turned off.

## Airplane mode

In Airplane mode, the network and radio transceivers are turned off to prevent disturbance to sensitive equipment. However, you can still play games, listen to music, watch videos and other content, as long as all this content is saved on your memory card or internal storage. You can also be notified by alarms, if alarms are activated.

- 💡 Turning on Airplane mode reduces battery consumption.

### To Turn on Airplane Mode

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > More**.
- 3 Drag the slider beside **Airplane mode** to the right.

# Calendar and alarm clock

## Calendar

Use the Calendar application to manage your time schedule. If you have signed in to and synchronized your device with one or several online accounts that include calendars, for example, your Google™ account or Xperia™ with Facebook account, then calendar events from these accounts will also appear in the Calendar application. You can select which calendars you want to integrate into the combined Calendar view.

When an appointment time approaches, your device plays a notification sound to remind you. Also,  appears in the status bar.

- 1 Select a view type and the calendars that you want to view
- 2 Return to the current date
- 3 Access settings and other options
- 4 Flick left or right to browse more quickly
- 5 Selected date
- 6 Agenda for the selected day
- 7 Add a calendar event

### To Create a Calendar Event

- 1 From your Homescreen, tap , then tap **Calendar**.
- 2 Tap .
- 3 If you have synchronized your calendar with one or more accounts, select the account you want to add this event to. If you only want to add this event on your device, tap **Device calendar**.
- 4 Enter or select the desired information and add attendees to the event.
- 5 To save the event and send out invites, tap **Save**.

### To view a calendar event

- 1 From your Homescreen, tap , then tap **Calendar**.
- 2 Tap the event you want to view.

### To View Multiple Calendars

- 1 From your Homescreen, tap , then find and tap **Calendar**.
- 2 Tap , then mark the checkboxes for the calendars you want to view.

### To zoom the calendar view

- When the **Week** or the **Day** view is selected, pinch the screen to zoom in.

### To display national holidays in the Calendar application

- 1 From your Homescreen, tap , then tap **Calendar**.
- 2 Tap , then tap **Settings**.
- 3 Tap **National holidays**.
- 4 Select an option, or a combination of options, then tap **OK**.

### To Display Birthdays in the Calendar Application

- 1 From your Homescreen, tap , then tap **Calendar**.
- 2 Tap , then tap **Settings** > **Birthdays**.
- 3 Drag the slider beside **Birthdays** to the right.

### To Display Weather Forecasts in the Calendar Application

- 1 From your Homescreen, tap , then tap **Calendar**.
- 2 Tap , then tap **Settings**.
- 3 Tap **Weather forecast**, then drag the slider beside **Weather forecast** to the right.
- 4 If location services are disabled, tap **Home location**, then search for the city you want to add.

 For more information about how to enable location services, see *Using Location Services* on the 129 page.

### To change weather forecast settings in the Calendar application

- 1 From your Homescreen, tap , then tap **Calendar**.
- 2 Tap , then tap **Settings**.
- 3 Tap **Weather forecast**.
- 4 Adjust the settings as desired.

## Alarm and Clock

You can set one or several alarms and use any sound saved on your device as the alarm signal. The alarm does not sound if your device is turned off.

The alarm time format displayed is the same as the format you select for your general time settings, for example, 12-hour or 24-hour.

- 1 Access the alarm homescreen
- 2 View a world clock and adjust settings
- 3 Access the stopwatch function
- 4 Access the timer function
- 5 View options
- 6 Open date and time settings for the clock
- 7 Turn an alarm on or off

- ! Alarms are always set as priority interruptions. However, if you use the **Silent** or **Total silence** settings for notifications, your alarms won't be audible. If you need to use an alarm, be sure to allow either all interruptions or priority interruptions.

### To Set a New Alarm

- 1 From your Homescreen, tap .
- 2 Find and tap **Clock**.
- 3 Tap .
- 4 Tap **Time** and select the desired value.
- 5 Tap **OK**.
- 6 If desired, edit other alarm settings.
- 7 Tap **Save**.

### To snooze an alarm when it sounds

- Tap **Snooze**.

### To turn off an alarm when it sounds

- Slide  to the right.

### To Edit an Existing Alarm

- 1 Find and tap **Clock**, and then tap the alarm you want to edit.
- 2 Make the desired changes.
- 3 Tap **Save**.

### To Turn an Alarm On or Off

- Find and tap **Clock**, and then drag the slider next to the alarm to the on or off position.

### To Delete an Alarm

- 1 Find and tap **Clock**, and then touch and hold the alarm you want to delete.
- 2 Tap **Delete alarm**, and then tap **Yes**.

### To Set the Sound for an Alarm

- 1 Find and tap **Clock**, and then tap the alarm you want to edit.
- 2 Tap **Alarm sound** and select an option, or tap  and select a music file.
- 3 Tap **Done**, and then tap **Save**.

-  For more information about how to adjust the alarm volume levels, see *Volume settings* on the 54 page.

### To Set a Recurring Alarm

- 1 Find and tap **Clock**, and then tap the alarm you want to edit.
- 2 Tap **Repeat**.
- 3 Mark the checkboxes for the relevant days, and then tap **OK**.
- 4 Tap **Save**.

### To Activate the Vibrate Function for an Alarm

- 1 Find and tap **Clock**, and then tap the alarm you want to edit.
- 2 Mark the **Vibrate** checkbox.
- 3 Tap **Save**.

# Accessibility

## Magnification Gestures

Magnification gestures allow you to zoom in on parts of the screen by tapping an area of the touchscreen three times in succession.

### To Enable or Disable Magnification Gestures

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Accessibility** > **Magnification gestures**.
- 3 Tap the on-off switch.

### To Magnify an Area and Pan Across the Screen

- 1 Ensure **Magnification gestures** is enabled.
- 2 Tap an area three times, and then hold and drag your finger across the screen.

## Large Text

You can enable the Large Text option to increase the default size of text displayed on your device.

### To enable or disable Large text

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Accessibility**.
- 3 Drag the slider next to **Large text**.

## Color Correction

The Color correction setting adjusts how colors are displayed on the screen for users who are color blind or have difficulty distinguishing between colors.

### To Enable Color Correction

- 1 From your Homescreen, tap .
  - 2 Find and tap **Settings** > **Accessibility** > **Color correction**.
  - 3 Tap the on-off switch.
  - 4 Tap **Correction mode**, and then select the appropriate color sensitivity.
- ! Color correction is currently an experimental feature and may affect device performance.

## Simple Homescreen

The Simple Homescreen is an alternate homescreen that displays your most used applications and includes speed dials to quickly call specific contacts. It also features larger fonts and icons for pre-installed applications such as Contacts, Messaging, and Calendar.

### To Enable the Simple Homescreen

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Home** > **Simple Home**.
- 3 Follow the on-screen instructions, then tap **OK**.

### To Switch to the Standard Homescreen

- From your Homescreen, tap **Settings** > **Exit Simple Home** > **OK**.

## Hearing Aid Compatibility

The hearing aid compatibility option ensures that audio from your device works with standard hearing aids.

### To Enable Hearing Aid Compatibility

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Call > Accessibility**.
- 3 Mark the checkbox beside **Hearing aids**.

## TalkBack

TalkBack is a screen reader service for visually impaired users. TalkBack uses spoken feedback to describe any events or actions performed on your Android device. TalkBack describes the user interface and reads out software errors, notifications, and messages.

### To enable TalkBack

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Accessibility > TalkBack**.
- 3 Tap the on-off switch and then tap **OK**.

! To change speech, feedback and touch preferences for TalkBack, tap **Settings**.

💡 TalkBack launches a tutorial immediately after you enable the feature. To exit the tutorial, tap the **Exit** button twice.

### To Disable TalkBack

- 1 From your Homescreen, double-tap .
- 2 Find and double-tap **Settings > Accessibility > TalkBack**.
- 3 Double-tap the on-off switch and then double-tap **OK**.

## TTY (Teletypewriter) Mode

The TTY (Teletypewriter) feature on your device allows people who are deaf, hard of hearing, or who have speech or language disabilities to communicate using a TTY device or a relay service.

### To Enable TTY Mode

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > Call**.
- 3 Tap **Accessibility > TTY Mode**.
- 4 Select the applicable TTY mode.

# Support and Legal

## Support Application

Use the Support application on your device to browse User Guides, troubleshooting guides, and to find information about software updates and other product-related information.

### To Access the Support Application

- 1 From your **Home screen**, tap .
  - 2 Find and tap , then select the required support item.
-  Connect to the internet when using the Support application for the best available support.

## Xperia™ Tips

Using Xperia™ Tips, you can get useful information for your device via notifications, and learn all you need to get started.

### To Enable or Disable Xperia™ Tips

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings** > **Introduction & Tips**.
- 3 Tap the **Xperia™ Tips** slider.

## Help in menus and applications

Some applications and settings have help available in the options menu, which is normally indicated by  in the specific applications.

## Running Diagnostic Tests on Your Device

The Xperia™ Diagnostics application can test a specific function or run a full diagnostic test to check if your Xperia™ device is working properly.

Xperia™ Diagnostics can:

- Assess potential hardware or software issues on your Xperia™ device.
  - Analyze how well applications perform on your device.
  - Log the number of dropped calls during the previous 10 days.
  - Identify installed software and provide useful details about your device.
-  The Xperia™ Diagnostics application is pre-installed on most Android™ devices from Sony. If the Diagnostics option is not available under **Settings** > **About phone**, you can download a light version using the Play Store™ application.

### To Run a Specific Diagnostic Test

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **About phone** > **Diagnostics** > **Test**.
- 3 Select a test from the list.
- 4 Follow the instructions and tap **Yes** or **No** to confirm if a feature works.

### To Run all Diagnostic Tests

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **About phone** > **Diagnostics** > **Test** > **Run all**.
- 3 Follow the instructions and tap **Yes** or **No** to confirm if a feature works.

### To View Details about Your Device

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **About phone** > **Diagnostics** > **Facts**.

## Restarting, Resetting, and Repairing

You can force your device to restart or shut down if it stops responding or won't restart normally. No settings or personal data get deleted.

You can also reset your device to its original factory settings. This action is sometimes necessary if your device stops functioning properly, but note that if you want to keep any important data, you should first back up this data to a memory card or other non-internal memory. For more information, see *Backing Up and Restoring Content* on page 39.

If your device fails to turn on or you want to reset your device's software, you can use Xperia™ Companion to repair your device. For more information on using Xperia™ Companion, see *Xperia™ Companion* on page 37.

- 💡 If you are sharing a device with multiple users, you may need to log in as the owner, that is, the primary user, to reset your device to its original factory settings.

### To Restart Your Device

- ! Your device may fail to restart if the battery level is low. Connect your device to a charger and try restarting again.
- 1 Press and hold down the power key .
  - 2 In the menu that opens, tap **Restart**. The device restarts automatically.

### To force the device to shut down

- 1 Remove the cover of the memory card slot.
  - 2 Using the tip of a pen or a similar object, press and hold down the OFF button until the device shuts down.
- ! Do not use overly sharp objects that could damage the OFF button.

### To Perform a Factory Data Reset

- 1 Make a backup of any important data stored on the internal memory to avoid permanent loss during the reset process.
  - 2 From your Homescreen, tap .
  - 3 Find and tap **Settings > Backup & reset > Factory data reset**.
  - 4 Tap **Reset phone**.
  - 5 If required, draw your screen unlock pattern, or enter your screen unlock password or PIN to continue.
  - 6 To confirm, tap **Erase everything**.
- 💡 To avoid permanent damage to your device, do not restart your device while a reset procedure is underway.
  - 💡 Your device does not revert to an earlier software version of Android™ when you perform a factory data reset.

## Repairing the Device Software

If you forget your screen unlock password, PIN, or pattern, you can use the device repair feature in Xperia™ Companion to erase the security layer. You need to provide your Google account login details to perform this operation. By running the repair feature, you reinstall software for your device and you may lose some personal data in the process.

If you can't turn off your device before performing a software repair, force it to shut down.

- 💡 When you receive a new Google™ account username or password, you might not be able to use them to log in to and recover your device for 72 hours.

### To Repair the Device Software Using Xperia™ Companion

- ! Before performing a software repair, make sure you know your Google™ account username and password. Depending on your security settings, you may need to enter them in order to restart the device after a software repair.

If your device seems to have frozen, restarts repeatedly or doesn't start at all after you updated the Xperia™ software or after you performed a software repair or a factory data reset, try forcing the device to shut down then try turning it back on. If the problem still exists, force the device to shut down then perform a software repair by following the steps below:

- 1 Make sure Xperia™ Companion is installed on your PC or Mac®.
- 2 Open the Xperia™ Companion software on the computer and click on **Software repair** on the main screen.
- 3 Follow the instructions that appear on the screen to reinstall the software and complete the repair.

## Help us improve our software

You can enable the sending of usage info from your device so that Sony Mobile can receive anonymous bug reports and statistics that help improve our software. None of the information gathered includes personal data.

### To allow the sending of usage info

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings > About phone > Usage info settings**.
- 3 Mark the **Send usage info** checkbox if it is not already marked.
- 4 Tap **Agree**.

## Warranty, SAR, and Usage Guidelines

For information about warranty, SAR (Specific Absorption Rate), and safety guidelines, please read the **Important information** provided under **Settings > About phone > Legal information** on your device.

## Recycling Your Device

Got an old device lying around the house? Why not recycle it? By doing so, you will help us reuse its materials and components, and you'll protect the environment, too! Find out more about the recycling options in your region at [www.sonymobile.com/recycle/](http://www.sonymobile.com/recycle/).
