Professional Integration Services

Customer

Samsung's 2G, 3G, LTE solutions build on more than 35 years of experience in developing and commercializing some of the world's most popular communication services. This wide range of experience and innovation in the cutting-edge technology has enabled Samsung to successfully partner with dozens of mobile service providers in industry-leading countries around the world.

Challenge

In the Vodafone Innovation Park Lab Samsung intends to integrate its 2G/3G /LTE radio for doing Interworking's against core and radio equipment of different vendors. Work to be done is to integrate the Samsung radio equipment against the different vendors and to run a set of test executions.

Solution

Vodafone together with its equipment suppliers provides the complete IP planning to integrate the Samsung equipment into the Vodafone Innovation Park and connect it to the other lab environment. After the complete integration Samsung jointly starts to run the test plan together with the different established equipment vendors. After successful test execution the outcome was a test report signed by all parties.

Benefit

With the Vodafone Innovation Park Labs Samsung found the right place for the project in a real end to end multi-vendor environment. Javier López (Samsung): "We did a lot a research and at the end the Vodafone Innovation Park for us is a very unique place to run interworking tests against other equipment vendors. Also, the support of the Vodafone team and the service they provide is really state of the art."
