### Product

Professional IoT Services

### Customer

In a connected world Intel® mobile modem solutions deliver the speed and agility to keep you intelligently connected. Designed for smartphones, tablets, PCs and Internet of Things (IoT) devices Intel's modems and system on chips (SoCs) are among the industry's most compact mobile solutions.

### Challenge

In the Vodafone Innovation Park Lab Intel intended to certify their products to ensure their solution works as specified in the Vodafone Global network footprint.

The Vodafone Innovation Park performed a certification service against the Vodafone Global Terminal Requirements to verify the cellular modems and modules are performing within expected tolerances.

### Solution

The test execution was realised as joint test session with Intel and Vodafone experts in the Vodafone Innovation Park Lab in a very early state of product development.

After the successful test execution the outcome was a detailed test report and a Vodafone Group signed certificate.

### Benefit

With test execution in the Vodafone Innovation Park Lab devices will be adjusted to Vodafone specific network parameters in a very early stage of product development. This reduces time to market in a significant way.
